Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

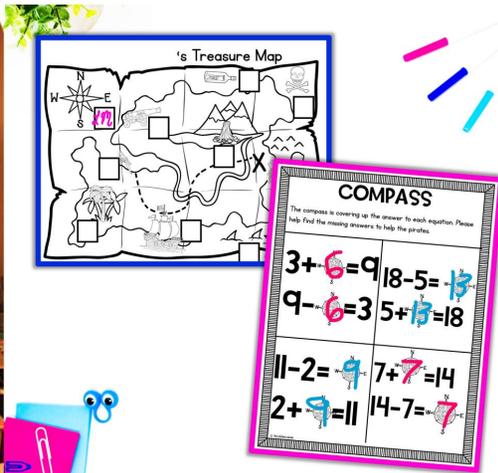

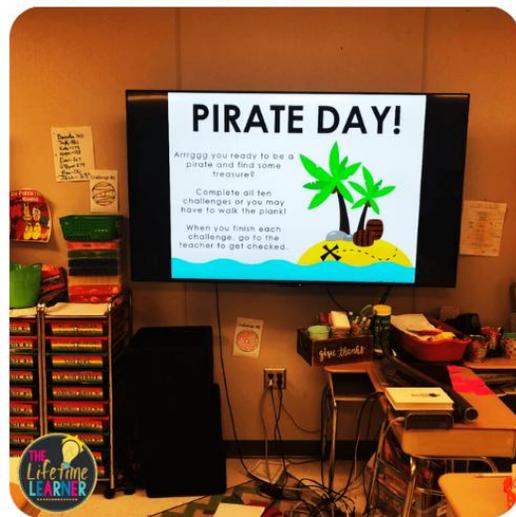

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are pirates today!

They will practice reviewing addition and subtraction standards in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

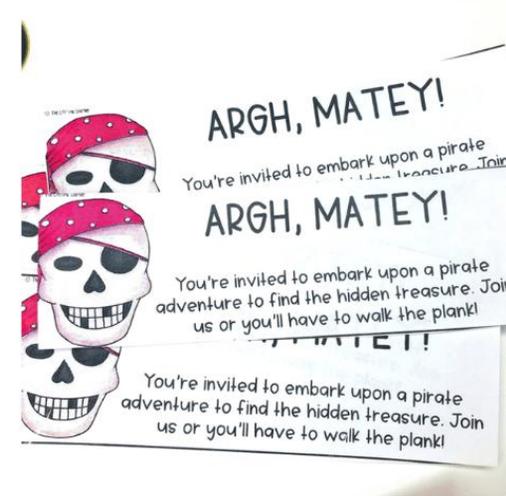

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

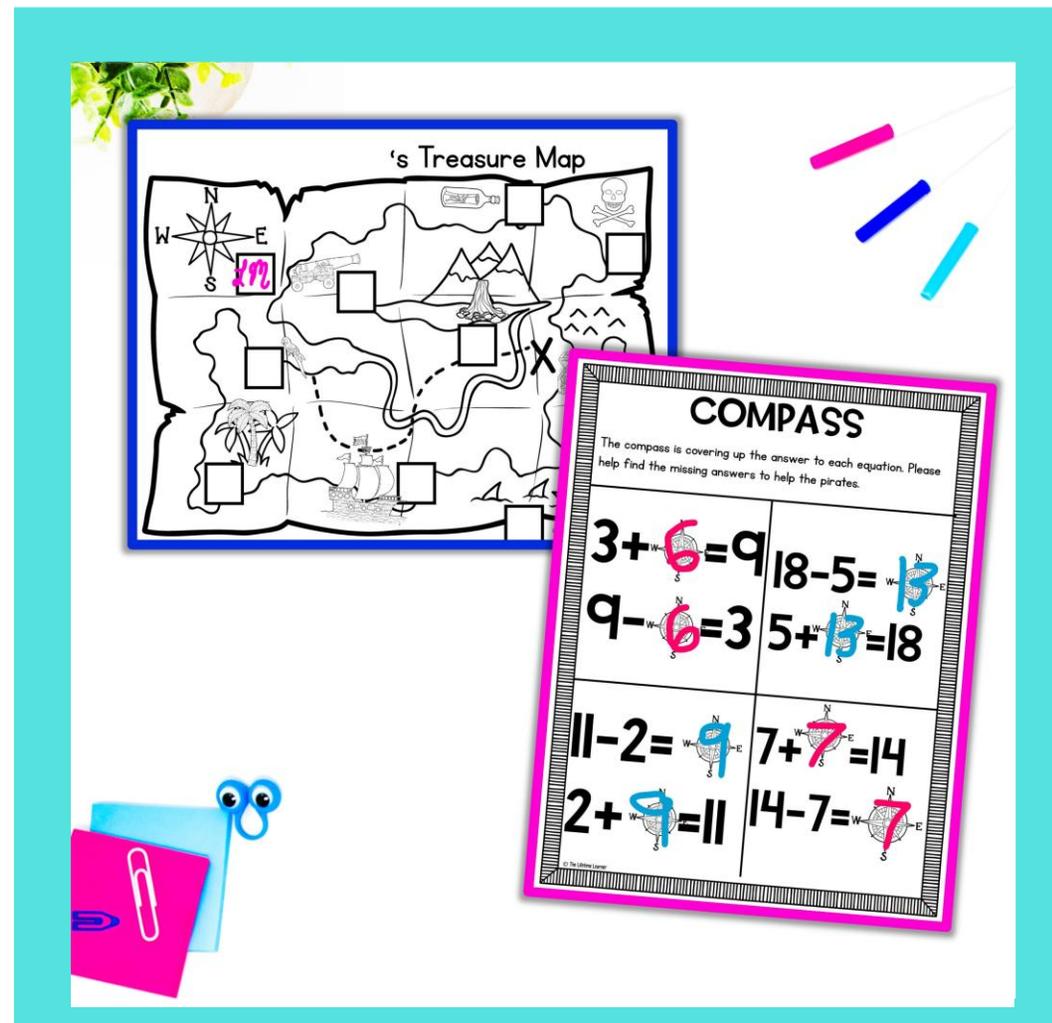

Let students move around the room and complete each center. They can be completed in any order. All centers include reviewing addition and subtraction standards.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

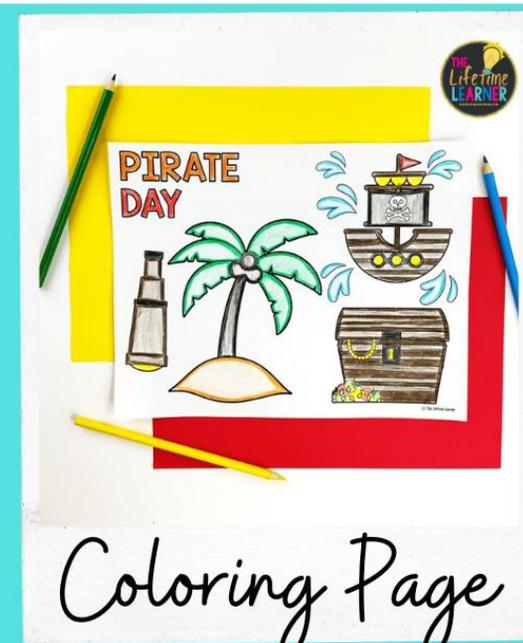

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

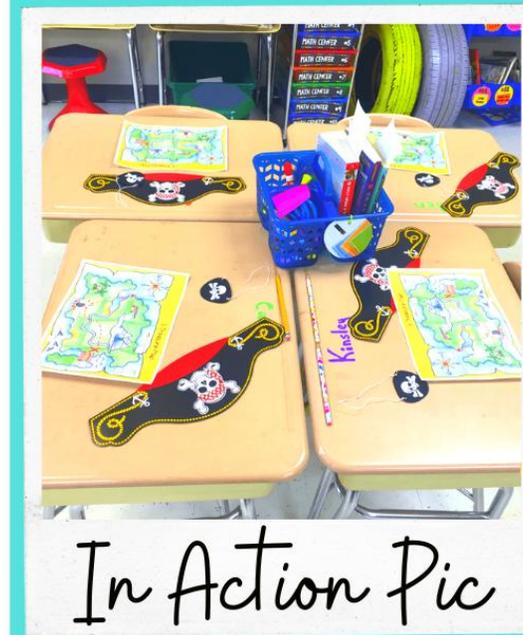

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

COMPASS

The compass is covering up the answer to each equation. Please help find the missing answers to help the pirates.

$3 + 6 = 9$	$18 - 5 = 13$
$9 - 6 = 3$	$5 + 13 = 18$
$11 - 2 = 9$	$7 + 7 = 14$
$2 + 9 = 11$	$14 - 7 = 7$

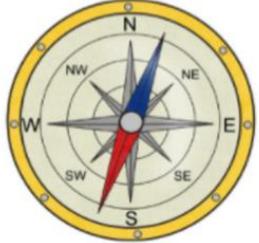

The worksheet features a grid of math problems. Each problem has a small compass icon where the answer is missing. The answers are: 6, 13, 3, 18, 9, 7, 11, and 7. The compass icons are drawn in various colors (purple, red, orange, blue) and are positioned over the missing numbers in the equations.
