Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

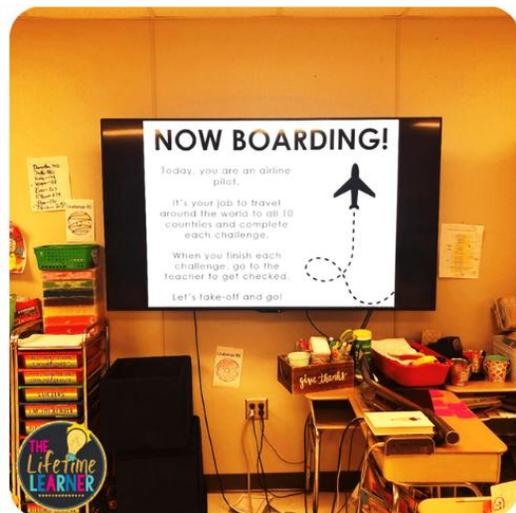

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are pilots today!

They will practice skip counting within 1000 in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practicing skip counting within 1000.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

WELCOME TO JAPAN

In Japan, you meet a little boy who needs your help. He doesn't speak English very well. He would like you to teach him how to count to 1000 in English. You help him by counting by 100s.

He is currently at the number 85. He thinks the number that comes next is 100 when counting by 100s. You know that 185 comes next.

Explain why.

If you go from 85 to 100, you're only adding 15. You need to add 100 when counting by 100s so $85+100$ is 185.

Help him count all the way to 1000, starting at 85.
