

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

CHALLENGE #2

The table shows the score of each bowler during the course of the day bowling. Answer the questions about the chart below.

Shane	192
Lacey	125
Layton	256
Finn	115
Nora	279

1 How many points did Nora and Lacey score together?

$$279 + 125 = 404$$

2 How many points did Shane and Finn score in all?

$$192 + 115 = 307$$

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

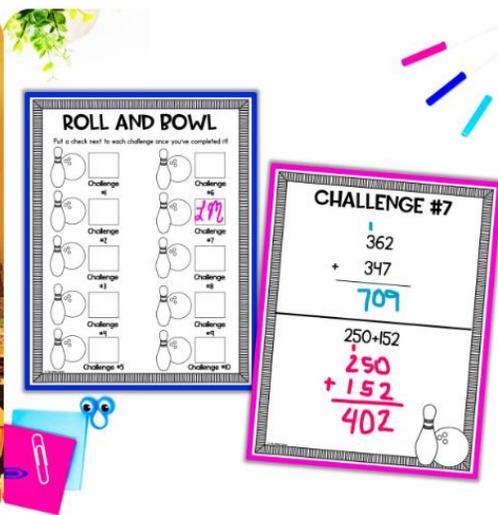

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are bowling today!

They will practice multi-digit addition in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

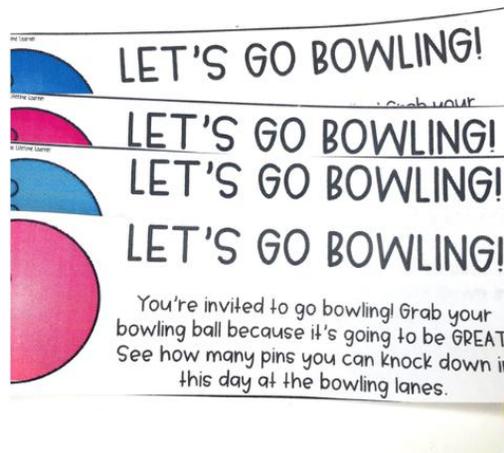

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem! Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practice with multi-digit addition. A bowling card is included so students can bowl after each turn too!

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

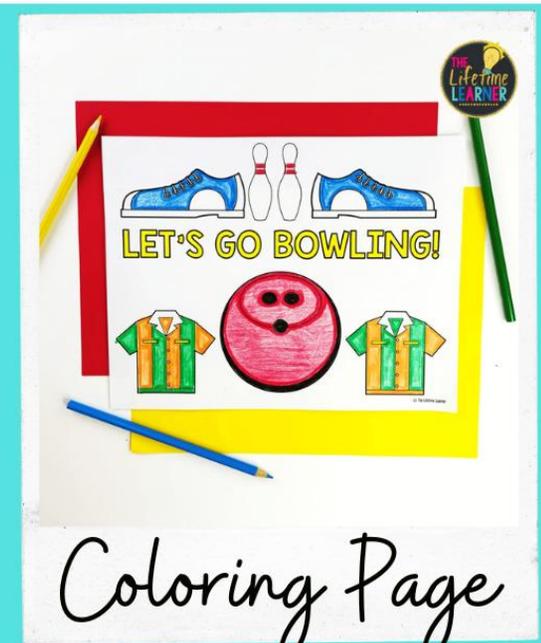

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

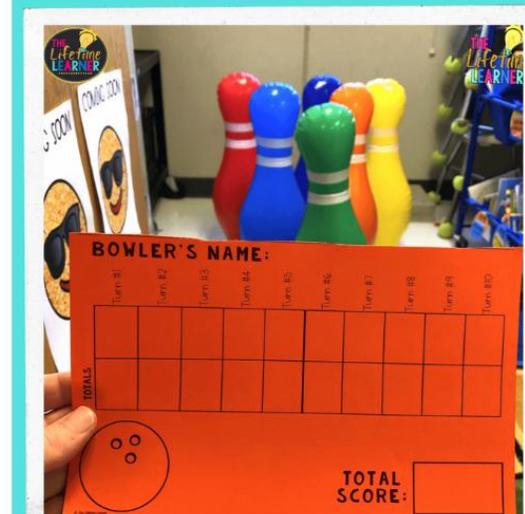

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

CHALLENGE #2

The table shows the score of each bowler during the course of the day bowling. Answer the questions about the chart below.

Shane	192
Lacey	125
Layton	256
Finn	115
Nora	279

1. How many points did Nora and Lacey score together?

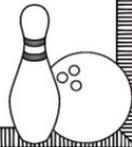

2. How many points did Shane and Finn score in all?

CHALLENGE #7

$$250+152$$

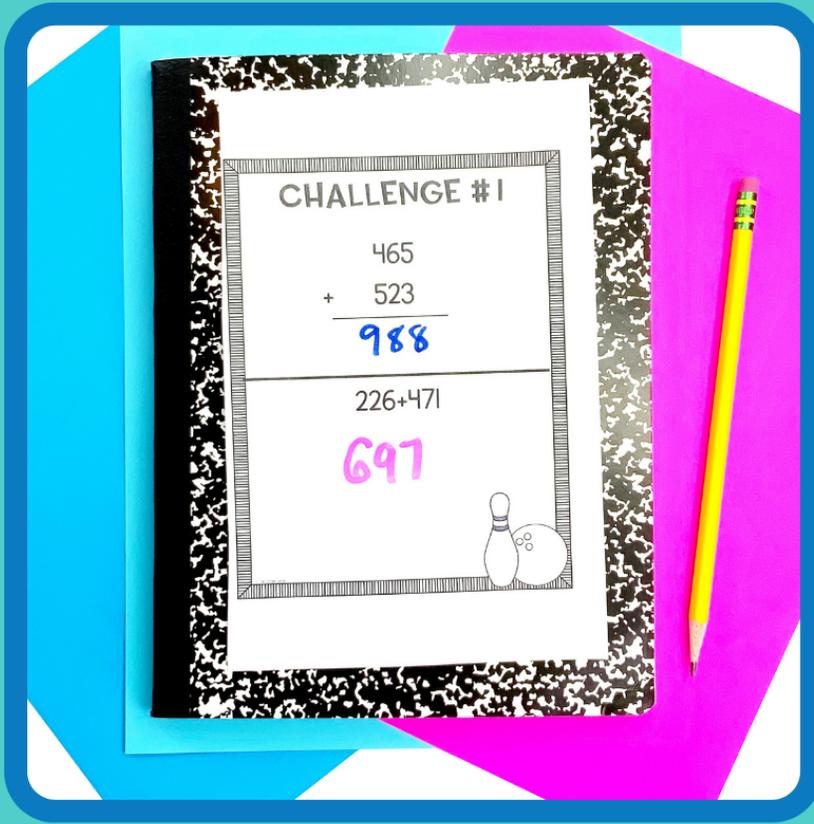

HOW TO USE THIS:

Ideas for Implementation:

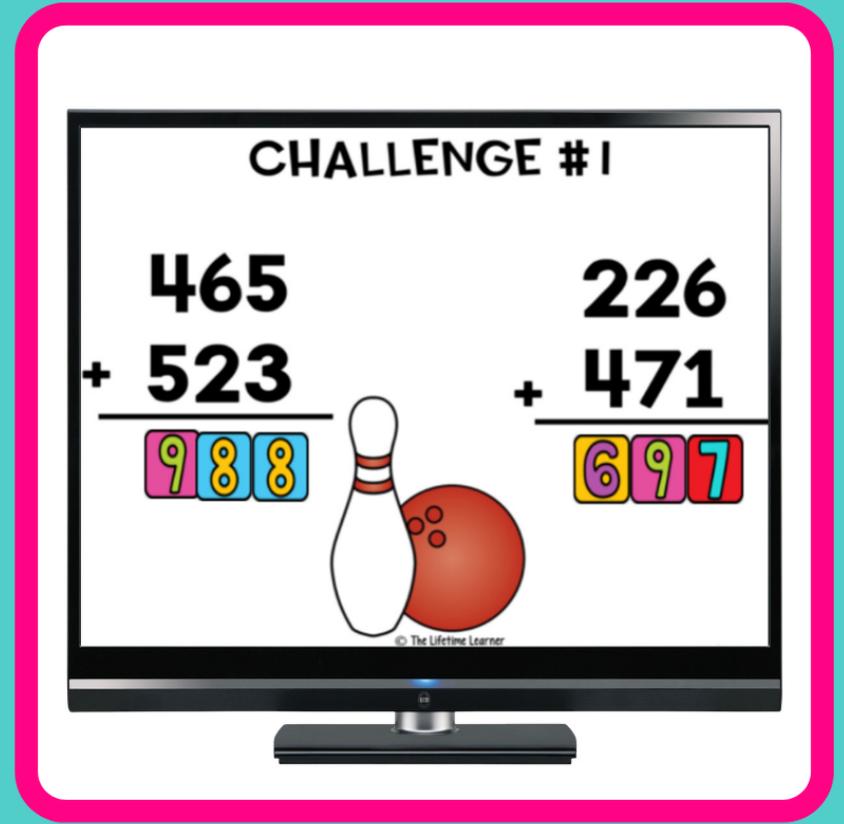

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

A notebook page with a math challenge. The page is titled "CHALLENGE #3" and contains a table of bowling scores. The table has two columns: names and scores. The names are Dylan (192), Molly (125), Jameson (256), Mia (115), and Justus (279). Below the table, there are two questions. Question 1 asks for the combined score of Mia and Molly, with the handwritten answer $115 + 125 = 240$ in purple. Question 2 asks for the total sum of Dylan, Jameson, and Justus's scores, with the handwritten answer $192 + 256 + 279 = 727$ in blue. There is a small drawing of a bowling ball and pins. A yellow pencil is lying on the right side of the page. The notebook page is placed on a background with large blue and pink arrow shapes pointing right.
