

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are camping today!

They will practice with different division strategies in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practice with different division strategies.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

The image displays two educational activity sheets. The first sheet, titled "LET'S GO CAMPING", is a checklist with 12 items, each with a corresponding illustration and a checkbox. The items are: a tent, a knife, a water bottle, a roll of fabric, a hat, binoculars, a saw, a campfire, a compass, a leaf, and a magnifying glass. The second sheet, titled "THE COMPASS", features a central compass rose with the cardinal directions N, E, S, and W. Eight division equations are placed around the compass, with lines connecting them to the cardinal directions: 18 ÷ 3 connects to North, 14 ÷ 2 connects to East, 6 ÷ 1 connects to South, 35 ÷ 7 connects to West, 40 ÷ 10 connects to North, 48 ÷ 8 connects to East, 28 ÷ 4 connects to South, and 36 ÷ 9 connects to West. The sheets are decorated with colorful arrows and paper clips.

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

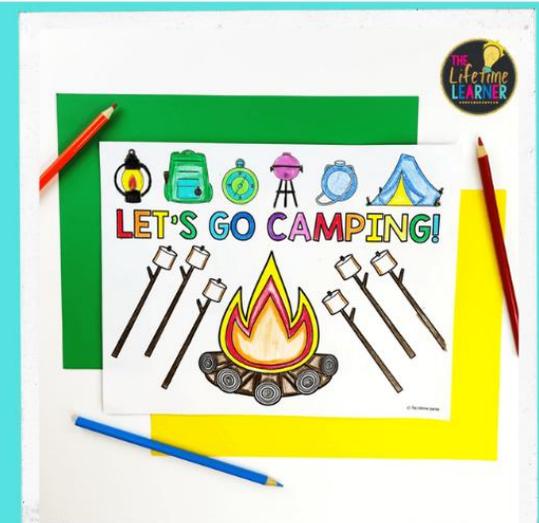

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Certificate

Coloring Page

Prize

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

THE CONTENT:

10 themed math challenges
aligned to math standards

THE BINOCULARS

You are trying to solve the following division problems. Choose the correct answer in each pair of binoculars.

$8 \div 2$

$40 \div 8$

$12 \div 4$

$70 \div 10$

$60 \div 6$

$9 \div 3$

$54 \div 9$

$25 \div 5$

THE FISHING POLE

There are a bunch of fish in the lake! Each kid below will get the same amount of fish! Color the fish so each kid gets an equal amount.

Green

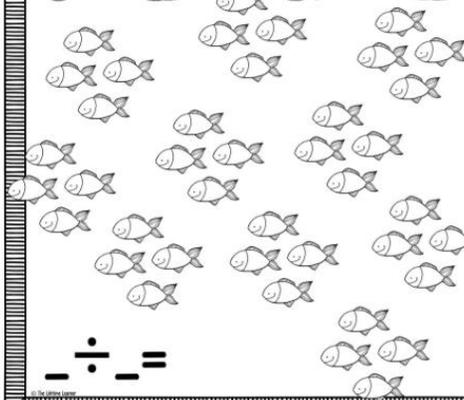

Blue

Orange

Yellow

THE COMPASS

Each division equation matches a side of the compass. Draw a line from each division equation to either North, East, South, or West based on the answer to each division equation.

$14 \div 2$

$18 \div 3$

$6 \div 1$

4

$40 \div 10$

$35 \div 7$

$48 \div 8$

$36 \div 9$

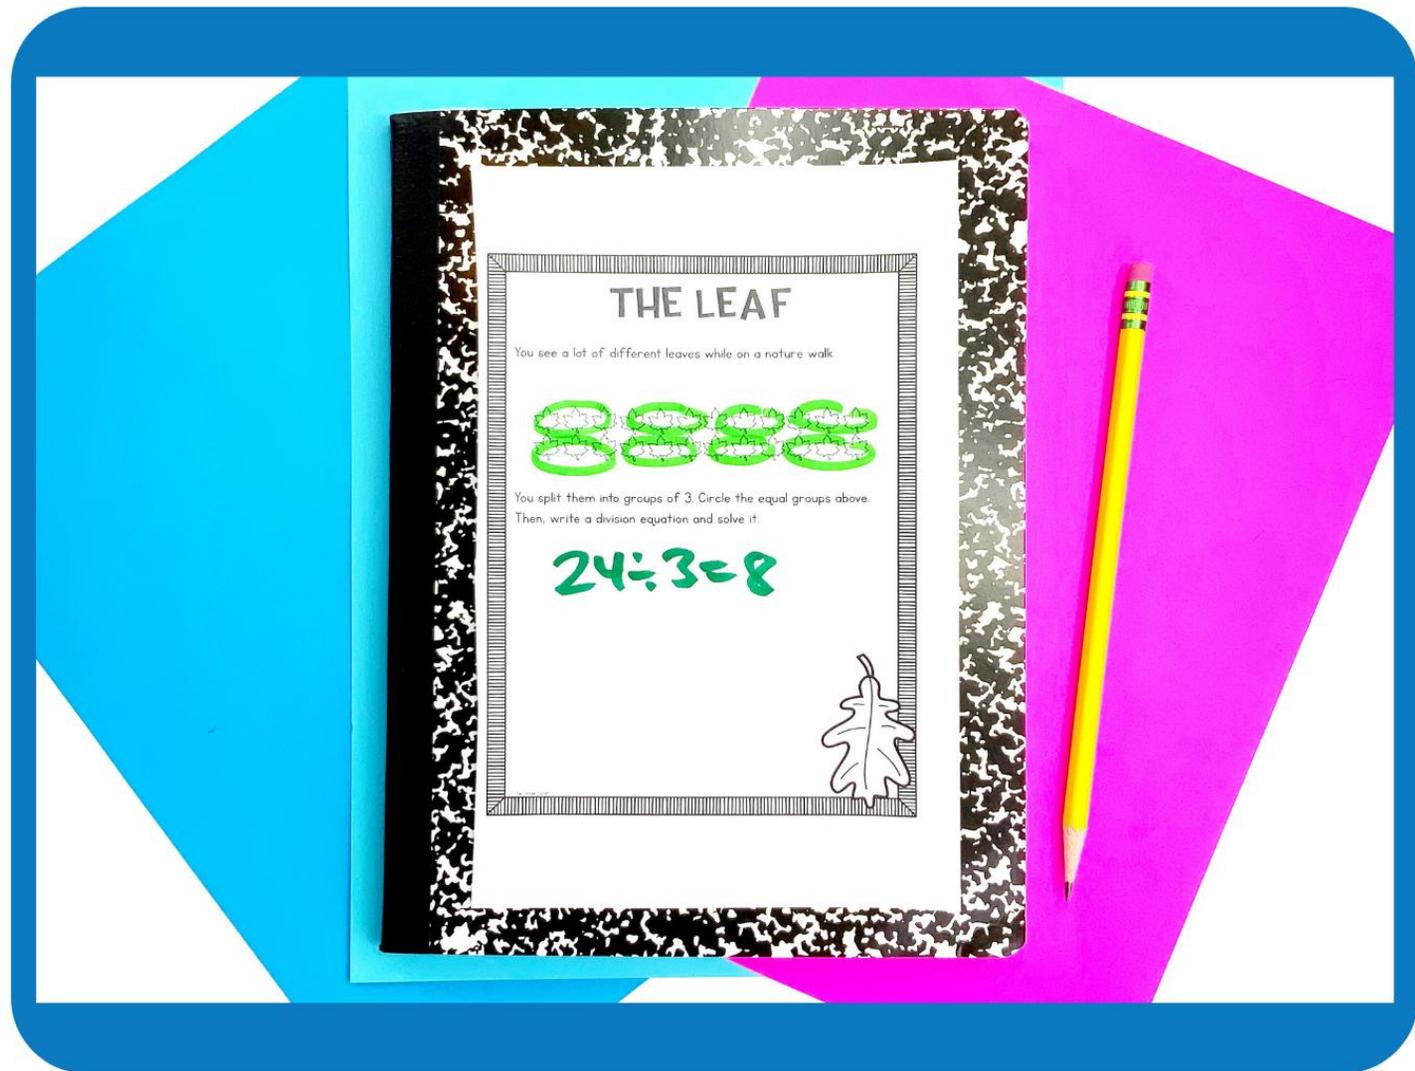

6

$28 \div 4$

HOW TO USE THIS:

Ideas for Implementation:

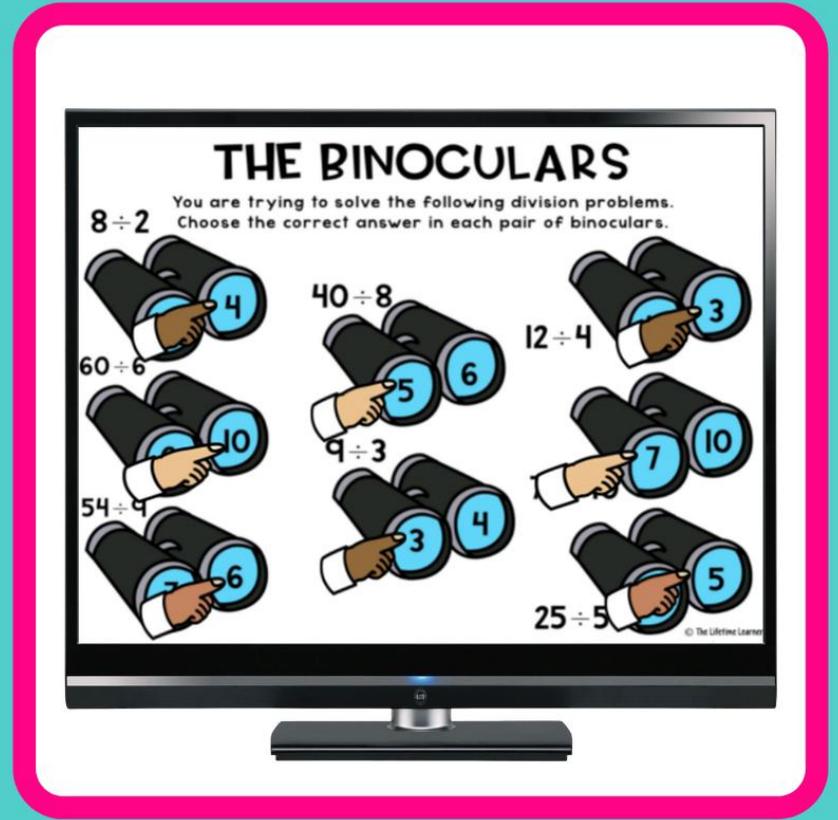

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

**Choose the format
that works best for you!**

Every activity relates to real-life mathematics!

THE CAMPFIRE

You have to put a new log on the campfire every 6 minutes. How many logs do you put on the campfire in 48 minutes of work.

THE LEAF

You see a lot of different leaves while on a nature walk.

THE SLEEPING BAG

nap in the afternoon for 20 minutes. A mosquito is biting you in your ear so you keep waking up every 4 minutes. How many naps do you need to take to get through the night? Use division and use repeated subtraction to solve.

MARSHMALLOW ROASTING

You need a lot of marshmallows for the marshmallow roasting at the campfire. How many marshmallows do you need to give each child 3 marshmallows if you have 12 children?

THE COMPASS

Each division equation matches a side of the compass. Draw a line from each division equation to either North, East, South, or West based on the answer to each division equation.

$$14 \div 2$$

$$18 \div 3$$

$$4$$

THE TENT

20 kids are split between 4 tents. How many kids are in each tent? Use division to solve.

THE BINOCULARS

You are trying to solve the following division equations. Write the correct answer in each pair of binoculars.

$$8 \div 2$$

$$40 \div 8$$

$$12 \div 4$$

$$70 \div 10$$

$$60 \div 6$$

$$9 \div 3$$

THE FISHING POLE

There are a bunch of fish in the lake! Each kid below will get the same amount of fish! Color the fish so each kid gets an equal amount.

Green

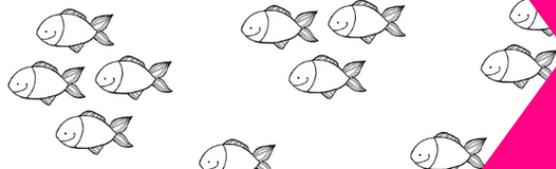

Blue

Orange

Yellow

THE HAT

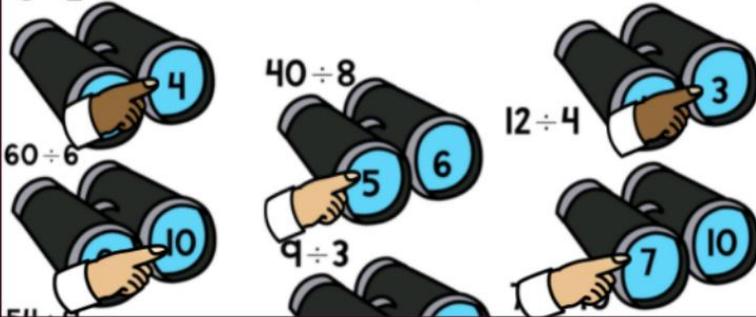

Match the following division equations by skip counting. Match it to the correct hat.

**focuses on:
division strategies**

THE BINOCULARS

$8 \div 2$ You are trying to solve the following division problems. Choose the correct answer in each pair of binoculars.

THE SLEEPING BAG

You take a nap in the afternoon for 20 minutes. A mosquito keeps buzzing in your ear so you keep waking up every 4 minutes. Write an equation and use repeated subtraction to solve.

$20 - 4 = 16$
 $16 - 4 = 12$
 $12 - 4 = 8$
 $8 - 4 = 4$
 $4 - 4 = 0$

Division Equation:

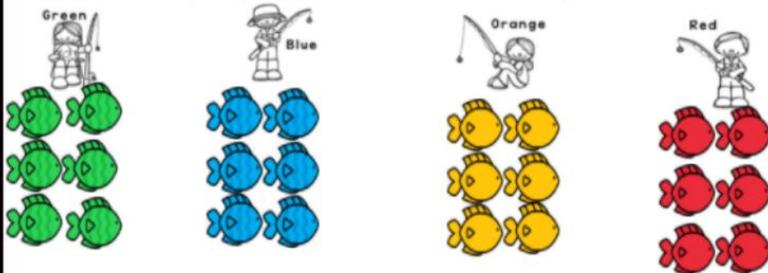

$$20 \div 4 = 5$$

You go to sleep for 60 minutes. You end up waking up every 10 minutes because of the spooky stories your friend told around the camp fire. How many times did you wake up in all? Write an equation and use repeated subtraction to solve.

$60 - 10 = 50$

THE FISHING POLE

There are a bunch of fish in the lake! Each kid below will get the same amount of fish! Split up the fish so each kid has an equal amount of fish.

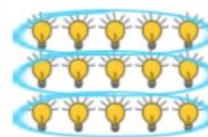

THE LANTERN

$$15 \div 5$$

When you turn on the lantern late at night, you see that someone solved the problem above 4 different ways. Show your work below.

Equal Groups

Fact Families

$$5 \times \underline{3} = 15$$

5, 10, 15

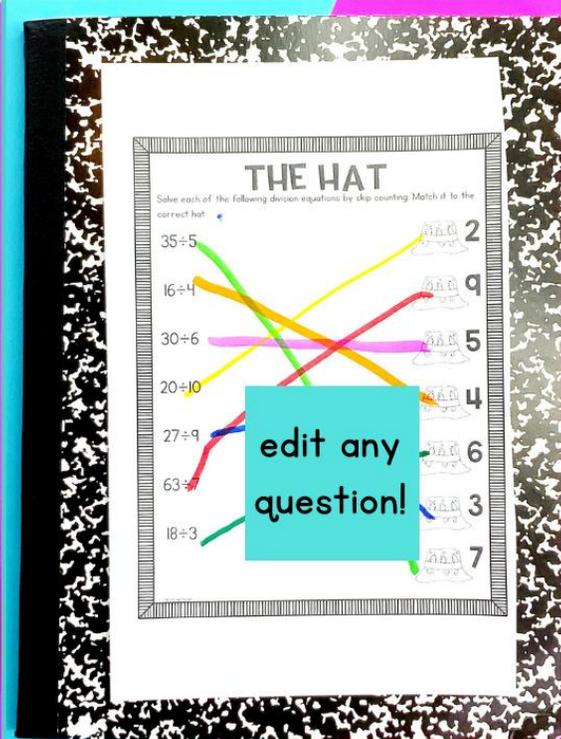

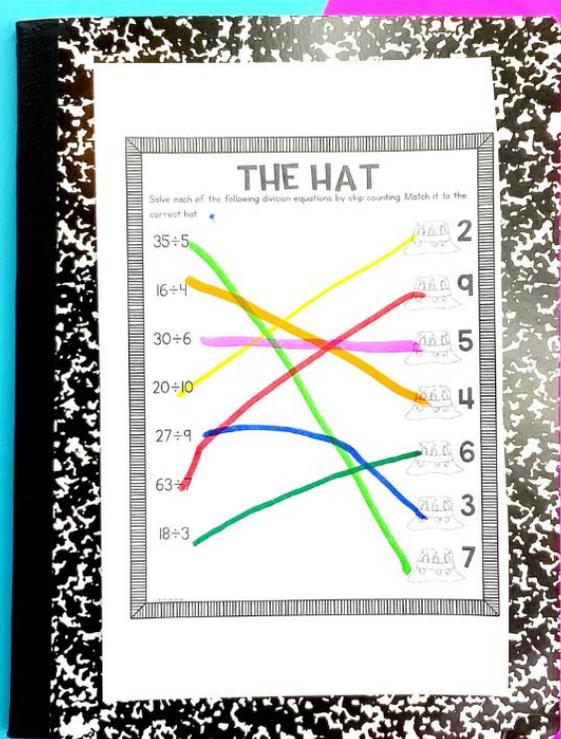

Skip Count

Repeated Subtraction
