

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are in a circus today!

They will practice with multiplication strategies (arrays, equal groups, repeated addition, skip counting) in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practice with multiplication strategies (arrays, equal groups, repeated addition, skip counting).

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

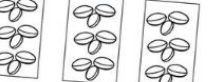

WELCOME TO THE CIRCUS
Put a check next to each act once you've completed that challenge.

	<input type="checkbox"/>	Lion		<input type="checkbox"/>	Unicycle
	<input type="checkbox"/>	Seal		<input type="checkbox"/>	Dog
	<input type="checkbox"/>	Tightrope		<input type="checkbox"/>	Trapeze
	<input type="checkbox"/>	Clown		<input checked="" type="checkbox"/>	Elephant
	<input type="checkbox"/>	Horse		<input type="checkbox"/>	Bear

THE ELEPHANT
Elephants LOVE peanuts! The pictures below show equal groups of peanuts. Write a multiplication equation for each question below to show how many equal groups of peanuts each elephant has.

#1  
Equation: $3 \times 3 = 9$

#2  
Equation: $6 \times 3 = 18$

#3  
Equation: $9 \times 3 = 27$

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

1 Digital Scavenger Hunt

Let students "find" the facts on Google Slides

2 Printable Facts

Hang facts around room

3 QR Codes

Students scan to read fun facts

THE CONTENT:

10 themed math challenges aligned to math standards

THE CLOWN

We need help figuring out which clown ate the most popcorn and the least amount of popcorn!

Fill in the equations and blanks below.

I have 2 groups of popcorn. There are 4 pieces of popcorn in each group.

I have 5 groups of popcorn. There are 8 pieces of popcorn in each group.

$_ \times _ =$

$_ \times _ =$

I have 4 groups of popcorn. There are 7 pieces of popcorn in each group.

I have 3 groups of popcorn. There are 10 pieces of popcorn in each group.

$_ \times _ =$

$_ \times _ =$

The clown with the most popcorn was _____

The clown with the least popcorn was _____

THE ELEPHANT

Elephants LOVE peanuts! The pictures below show equal groups of peanuts. Write a multiplication equation for each question below to show how many equal groups of peanuts each elephant has.

Equation:

Equation:

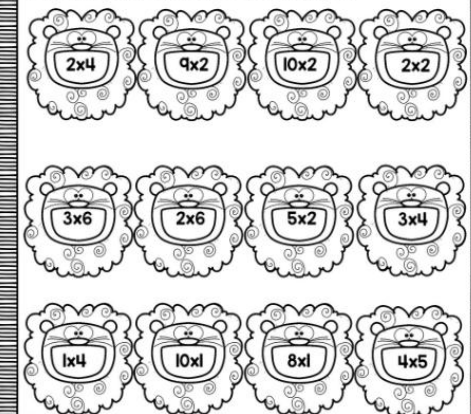

Equation:

THE LION

All of the lions are looking for their mates at the circus.

- Solve the equation on each lion by skip counting.
- Then, color the two lions that are the same answer: the same color.

For example, if two lions both equal 10, color them the same color.

HOW TO USE THIS:

Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

that works best for you!**

Every activity relates to real-life mathematics!

THE UNICYCLIST

The guy on the unicycle really likes cotton candy! He ate a whole bunch of it and needs your help to figure out how many pieces of cotton candy is in each pile. Write an equation to solve the problem.

THE SEAL

Seals don't know how to do math! They need your help to solve the following equations. Match each equation to its answer. Use any strategy to solve and show your work.

THE TRAPEZE ARTIST

The trapeze artist is really busy. Because of this, he needs some help with his math homework. He used skip counting to solve the problem. Write the questions he solved correctly and an X on the ones he got wrong.

THE DOGS

There are 4 dogs at the morning circus show. Use repeated addition to find out how many legs those dogs have in all. Draw a picture to show your work.

THE BEAR

There are 5 bears standing on balls at the circus. Each bear's ball has 7 stripes. How many stripes do the balls have altogether?

CIRCUS PONY

4×6

The circus pony is trying to show us the audience how smart she is. Write a multiplication equation to solve the problem above 4 different ways. Please show your work.

THE CLOWNS

We need help figuring out which clown ate the least amount of popcorn. Write an equation to solve the problem.

Fill in the equations and blanks below.

I have 2 groups of popcorn. There are 4 pieces of popcorn in each group.

I have 3 groups of popcorn. There are 5 pieces of popcorn in each group.

$__ \times __ =$

$__ \times __ =$

I have 4 groups of popcorn. There are 7 pieces of popcorn in each group.

I have 3 groups of popcorn. There are 6 pieces of popcorn in each group.

Draw the stripes on the balls.

THE LION

All of the lions are looking for their mates at the circus. Write an equation to solve the problem.

- Solve the problem.
- Then, color the picture.

For example, if two lions...

THE ELEPHANT

The elephant loves peanuts! The pictures below show equal groups of peanuts. Write a multiplication equation for each question below. How many equal groups of peanuts each elephant has.

focuses on:
multiplication strategies (arrays, equal groups, repeated addition, skip counting)

THE SEAL

Seals don't know how to do math! They need your help to solve the following equations. Match each equation to its answer. Use any strategy to solve and show your work.

2×4 → 21
 7×3 → 70
 4×7 → 36
 10×5 → 8

THE TIGHTROPE

The person on the tightrope is confused. They don't understand how 3×5 is the same thing as 5×3 . Use a picture AND words to explain why these equations give you the same answer.

Picture:

Words:

THE TRAPEZE

The guy on the trapeze is really busy. Because of this, he needs some help checking over his math homework. He used skip counting to solve.

Put a check on the questions he solved correctly and an X on the ones he got wrong. If he got it wrong, please write the correct answer and fix his work too!

Question 1: $8 \times 4 = 32$ ✓
4, 8, 12, 16, 20, 24, 28, 32

Question 2: $5 \times 5 = 20$ ✗
5, 10, 15, 20

5, 10, 15, 20, 25

Question 3: $6 \times 9 = 57$

Question 4: $2 \times 3 = 6$

THE UNICYCLE

The guy on the unicycle really likes cotton candy! He buys a whole bunch of it and needs your help to figure out how much cotton candy is in each pile. Write an equation next to each array showing how much cotton candy he has.

$4 \times 4 = 16$

$2 \times 8 = 16$

$2 \times 4 = 8$

$4 \times 5 = 20$

THE LIFETIME LEARNER'S CLASSROOM TRANSFORMATIONS ARE:

1. Engaging to Students
2. Classroom Tested (and Student-Approved)
3. Print and Digital Compatible
4. Jam-Packed with Content
5. Aligned to Math Standards
6. Easy to Implement
7. Flexible for Every Classroom
8. Versatile Ways to Reward Students
9. Rigorous Student Learning Activities

All content is included so you can simply **print**
and get ready for an **AMAZING** experience
with your students!

Please Note:

- **There are 10 math challenges provided as well as décor, a fast finisher activity, and additional extras.**
- **The digital version is provided in Google Slides.**
- **Nervous about trying your first room transformation? You'll be hooked once you try one! I promise!**
- **Feel free to contact me if you have questions or want to chat about room transformations. You can email me at lindsaythelifetimelearner@gmail.com**
