

# WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

# Let's start with the basics...

## What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

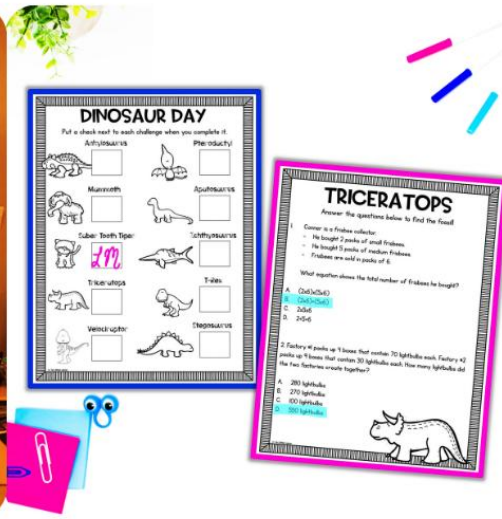

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

# STEP 1:

Tell your class they are going to see dinosaurs today!

They will practice 3rd grade math skills in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!  
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

# STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

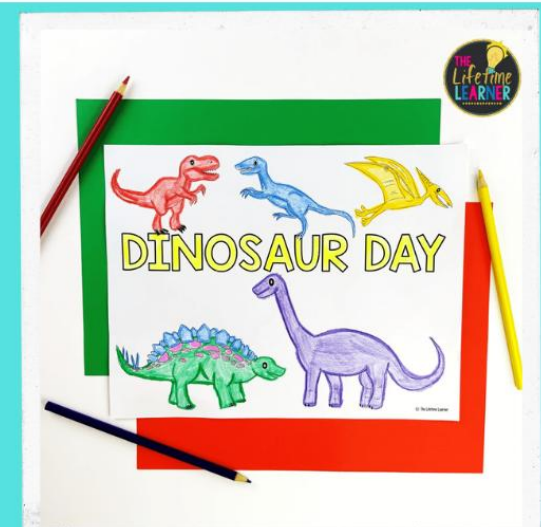

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

## Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

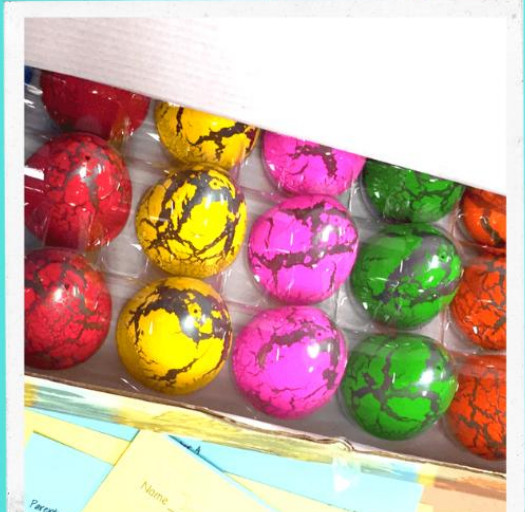

Certificate

Coloring Page

In Action Pic

Prize

# STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

## Choose from 3 versions!

### Digital Scavenger Hunt

Let students "find" the facts on Google Slides

### Printable Facts

Hang facts around room

### QR Codes

Students scan to read fun facts

# THE CONTENT:

## 10 themed math challenges aligned to math standards

### T-REX

Answer the questions below to find the fossil!

1. Use the line plot below to answer the following question.

Roller Coaster Height Requirements

How many roller coasters require riders to be taller than 51 inches?

A. 4  
B. 5  
C. 14  
D. 2

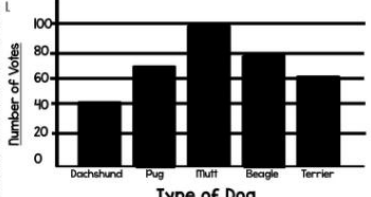

2. Kal has 45 pumpkins. He will split them equally between 9 relatives. Each relative will have the same amount of pumpkins. Which equation shows how many pumpkins Kal needs to give each relative?

A.  $45 - 9 = n$   
B.  $45 + 9 = n$   
C.  $9 \times n = 45$   
D.  $n + 9 = 45$

### PTERODACTYL

Answer the questions below to find the fossil!

Number of Votes

Type of Dog

By looking at the graph, how many more students voted for mutts and pugs than for dachshunds and terriers?

A. 170  
B. 100  
C. 70  
D. 60

2. Which number does point L represent on the number line?

A.  $\frac{1}{6}$   
B.  $\frac{2}{4}$   
C.  $\frac{2}{5}$   
D.  $\frac{1}{3}$

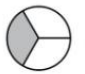

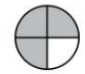

### SABER TOOTH TIGER

Answer the questions below to find the fossil!

1. Cori traveled 228 miles on business trips the first two weeks of January. In the last two weeks of January, she traveled another 175 miles. She plans to travel the same amount of miles in February as she did in January. About how many miles will she travel in January and February combined?

A. 400  
B. 600  
C. 800  
D. 1000

2. Which model shows  $\frac{1}{4}$ ?

A.  C. 

B.  D. 

# HOW TO USE THIS:

## Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

The image shows a worksheet titled "TRICERATOPS" with the instruction "Answer the questions below to find the fossil".

1. Conner is a frisbee collector.  
- He bought 2 packs of small frisbees.  
- He bought 5 packs of medium frisbees.  
- Frisbees are sold in packs of 6.

What equation shows the total number of frisbees he bought?

A.  $(2 \times 6) + (5 \times 6)$   
B.  $(2 \times 5) + (5 \times 6)$   
C.  $2 \times 5 \times 6$   
D.  $2 \times 5 \times 6$

Handwritten work for question 1 shows two equations:  $6 \times 2 = 12$  and  $6 \times 5 = 30$ , with a total of 42. The correct answer, A, is circled in blue.

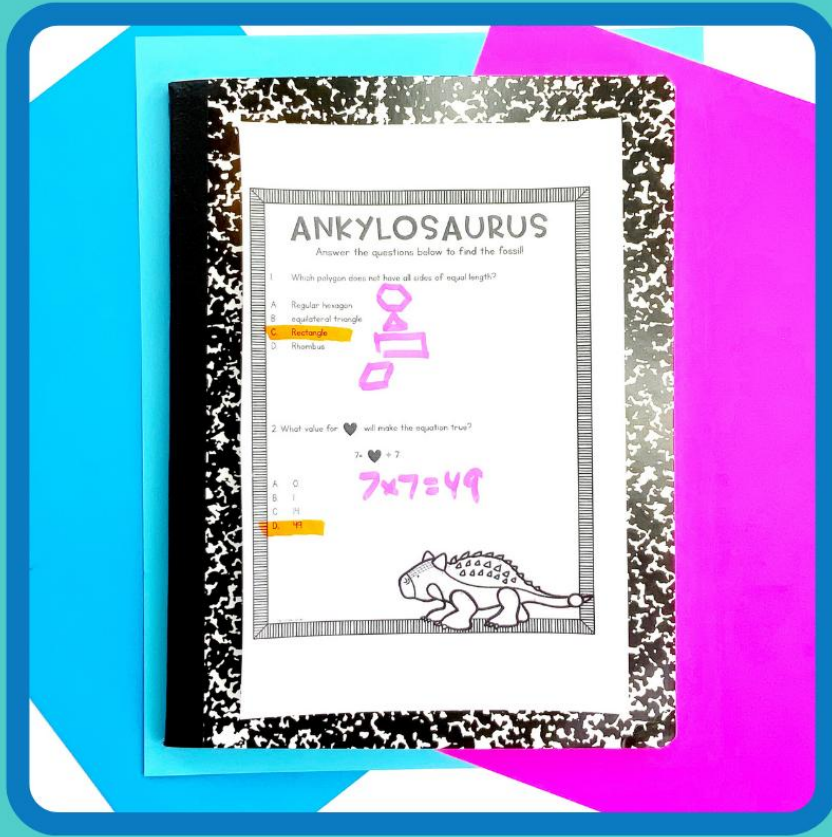

2. Factory #1 packs up 4 boxes that contain 70 lightbulbs each. Factory #2 packs up 9 boxes that contain 30 lightbulbs each. How many lightbulbs did the two factories create together?

A. 280 lightbulbs  
B. 270 lightbulbs  
C. 100 lightbulbs  
D. 550 lightbulbs

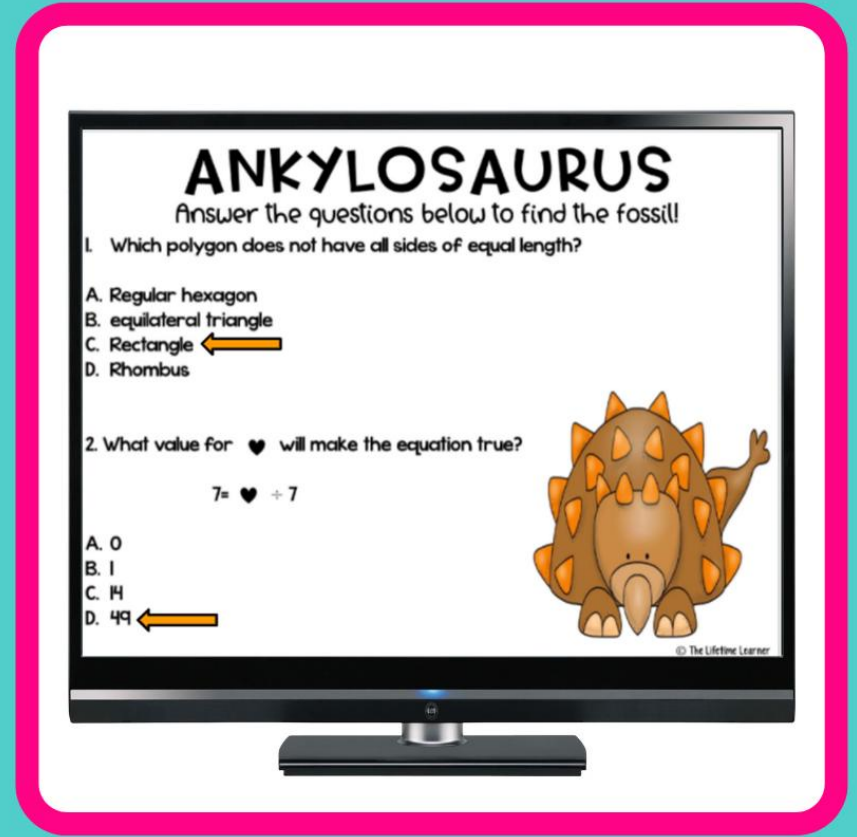

Handwritten work for question 2 shows  $4 \times 70 = 280$  and  $9 \times 30 = 270$ , with a total of 550. The correct answer, D, is circled in blue.

At the bottom of the page, there is a drawing of a triceratops and a handwritten calculation:  $280 + 270 = 550$ .

## SABER TOOTH TIGER

Answer the questions below to find the fossil!

1. Cori traveled 228 miles on business trips the first two weeks of January. In the last two weeks of January, she traveled 156 miles. How many more miles did she travel in the first two weeks than in the last two weeks?

## MAMMOTH

Answer the questions below to find the fossil!

1. You go to the gym 5 times a month. Your sister goes to the gym 7 times a month. How many more times do you go to the gym than your sister?

## TRICERATOPS

Answer the questions below to find the fossil!

1. A pentagon does not have all sides of equal length.

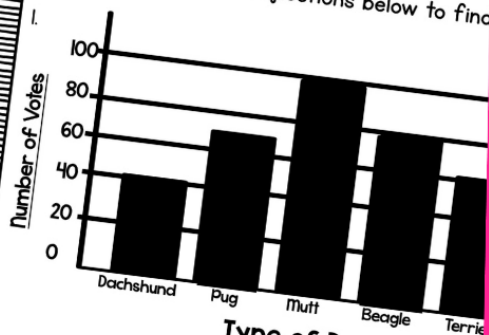

## T-REX

Answer the questions below to find the fossil!

Use the line plot below to answer the following questions.

## PTERODACTYL

Answer the questions below to find the fossil!

By looking at the graph, how many more students voted for mutts than for dachshunds and terriers?

- A. 170  
B. 100  
C. 70  
D. 60

## ICHTHYOSAURUS

Answer the questions below to find the fossil!

1. Shannon's living room has an area of 81 square feet. If the carpet on her living room floor is 6 feet long and 8 feet wide, how much space in the living room is not covered in carpet?

## DIPLODOCOSAURUS

Answer the questions below to find the fossil!

1. An octagon shaped sandbox. The width of each side is 44 inches. What is the perimeter of the sandbox?

## VELOCIRAPTOR

Answer the questions below to find the fossil!

1. Which answer below will tell us the missing number in the pattern?

13, 26, 39,    , 65, 78, 91

- A. 39+65  
B. 65-13  
C. 78-65  
D. 26+39

## TRICERATOPS

Answer the questions below to find the fossil!

1. A frisbee collector bought 2 packs of small frisbees, 3 packs of medium frisbees, and 5 packs of large frisbees. Each pack contains 6 frisbees. How many frisbees did he buy in total?

2. A table shows the total number of frisbees he bought?

**focuses on:**  
**3rd grade math skills**

# ANKYLOSAURUS

Answer the questions below to find the fossil!

1. Which polygon does not have all sides of equal length?

- A. Regular hexagon
- B. equilateral triangle
- C. Rectangle ←
- D. Rhombus

2. What value for ♥ will make the equation true?

$$7 = \heartsuit \div 7$$

# SABER TOOTH TIGER

Answer the questions below to find the fossil!

1. Cori traveled 228 miles on business trips the first two weeks of January. In the last two weeks of January, she traveled another 175 miles. She plans to travel the same amount of miles in February as she did in January. About how many miles will she travel in January and February combined?

- A. 400
- B. 600
- C. 800 ←
- D. 1000

2. Which model shows  $\frac{1}{4}$  ?

# MAMMOTH

Answer the questions below to find the fossil!

1. You go to the gym 5 times a month. Your sister goes to the gym 7 times the amount you go. How many times do you go to the gym combined?

- A. 35
- B. 42
- C. 12
- D. 40 ←

2. Clark runs 346 miles in 2015. In 2016, he runs 394 miles and double that amount in 2017. How many miles did he run in all?

# TRICERATOPS

Answer the questions below to find the fossil!

1. Conner is a frisbee collector.

- He bought 2 packs of small frisbees.
- He bought 5 packs of medium frisbees.
- Frisbees are sold in packs of 6.

What equation shows the total number of frisbees he bought?

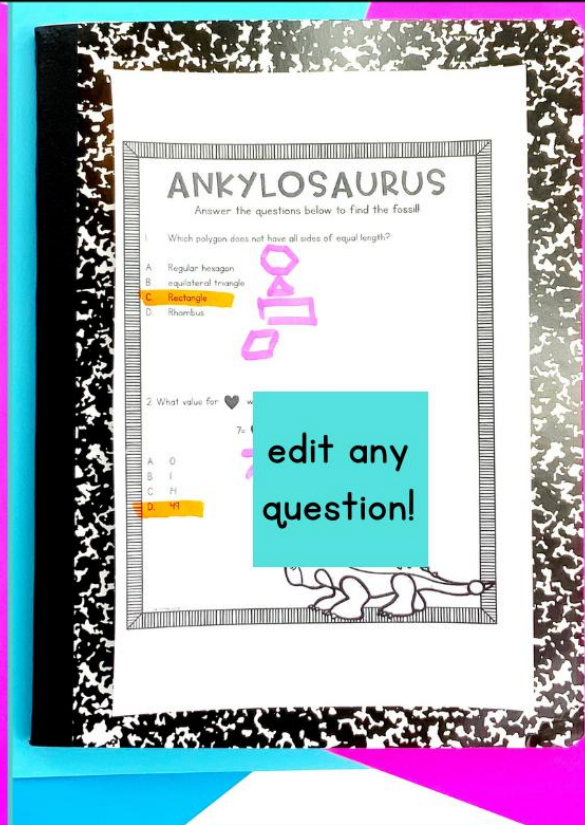

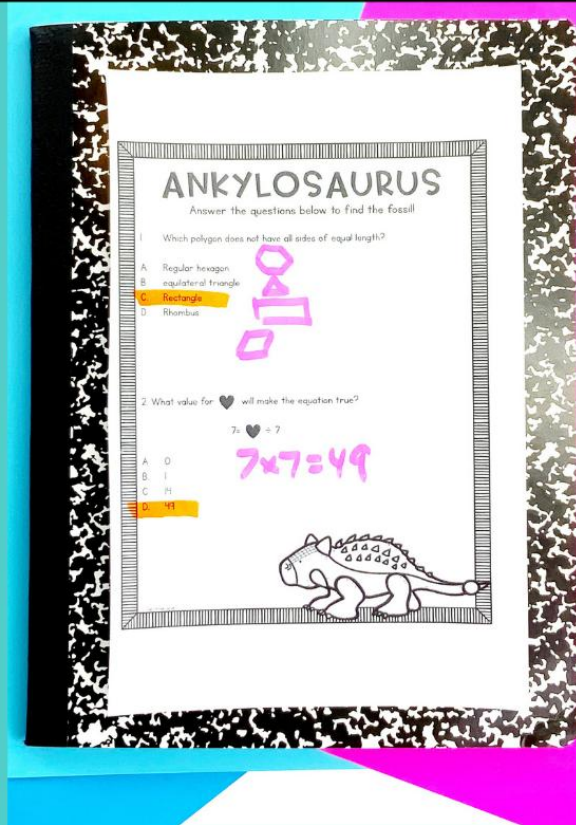

- A.  $(2 \times 6) \times (5 \times 6)$
- B.  $(2 \times 6) + (5 \times 6)$  ←
- C.  $2 \times 5 \times 6$
- D.  $2 + 5 + 6$

2. Factory #1 packs up 4 boxes that contain 70 lightbulbs each. Factory #2 packs up 9 boxes that
