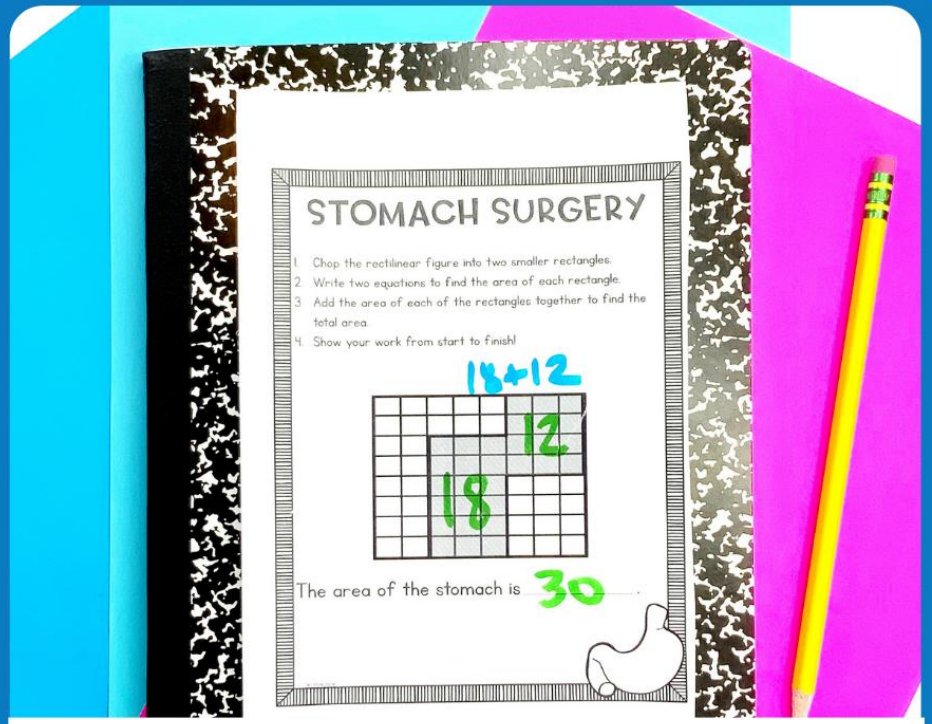
WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!



Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

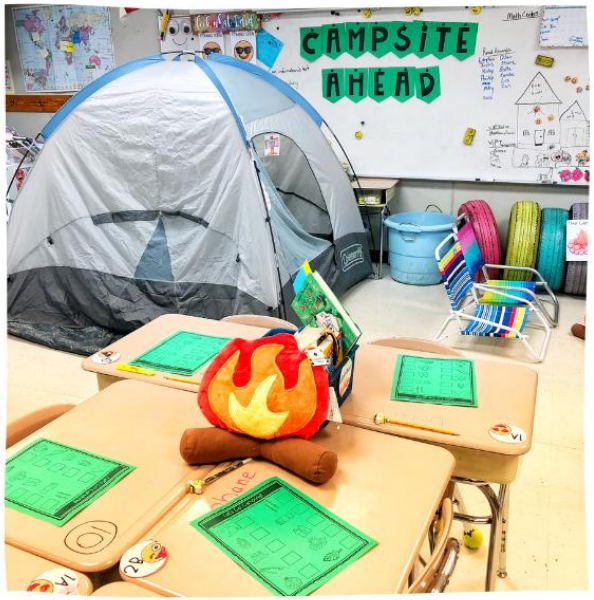
Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day



Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it SO MUCH FUN!

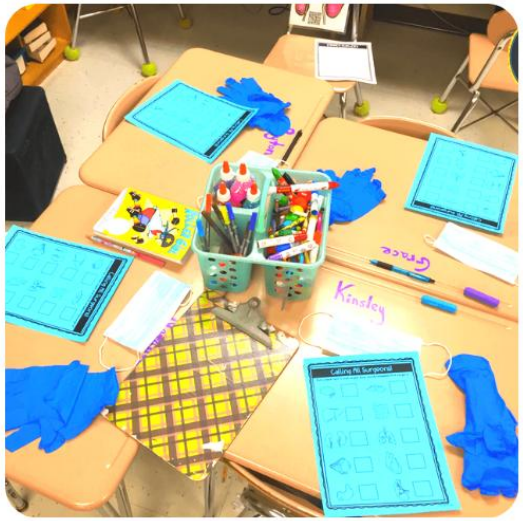
STEP 1:

Tell your class they are doctors today!

They will practice finding the area of rectilinear figures in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.



Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

STEP 2:

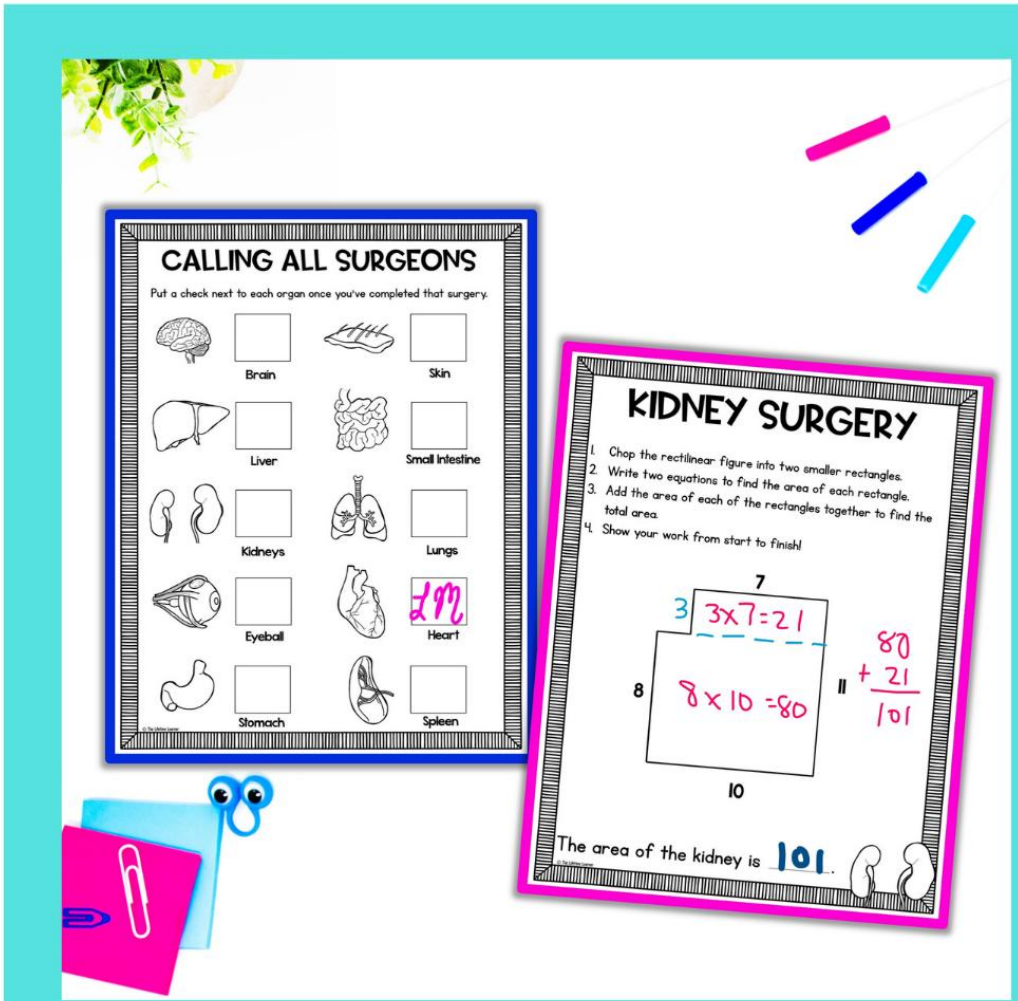
Let students move around the room and complete each center. They can be completed in any order. All centers include practicing finding the area of rectilinear figures.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!



STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

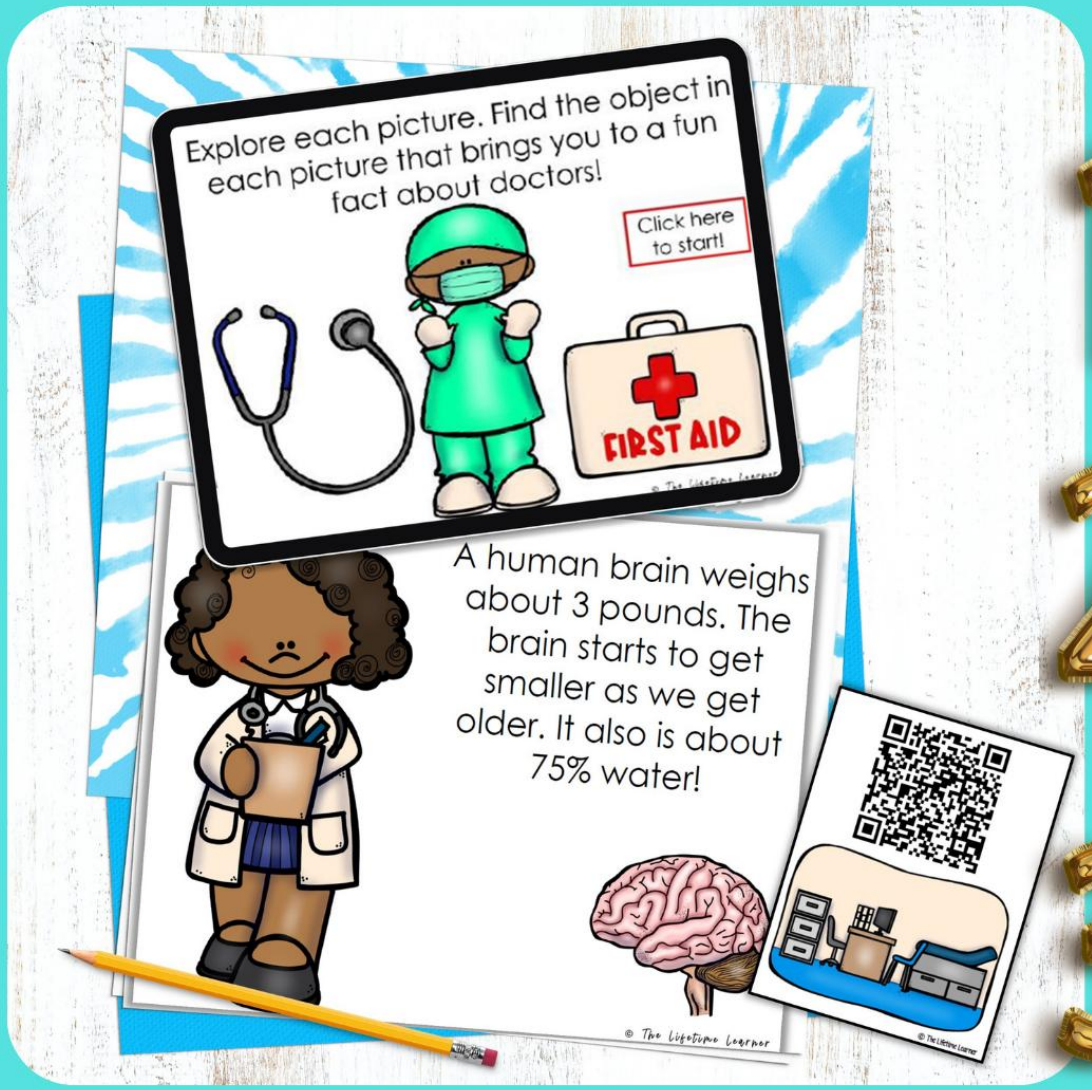
STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.



Choose from 3 versions!

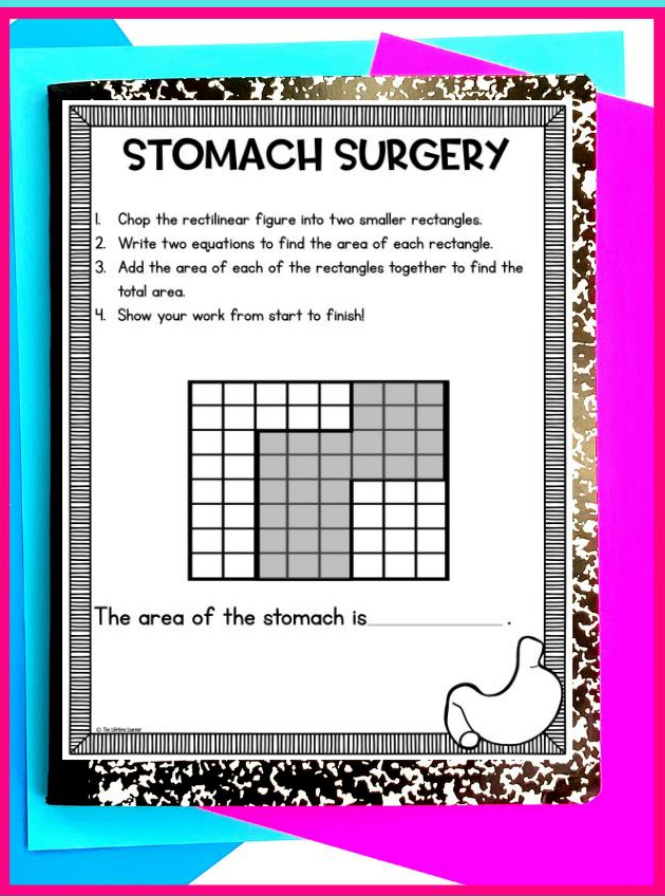
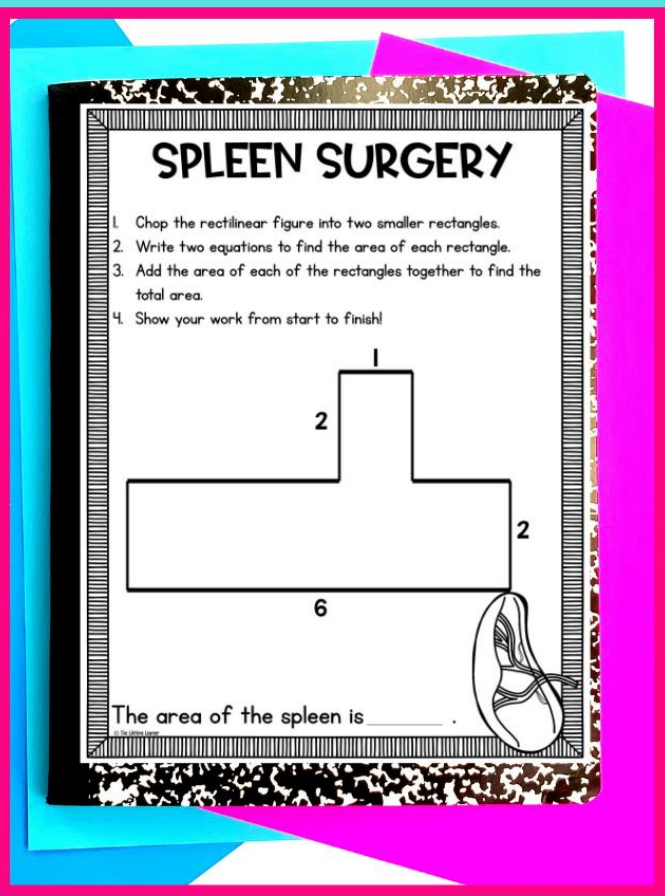
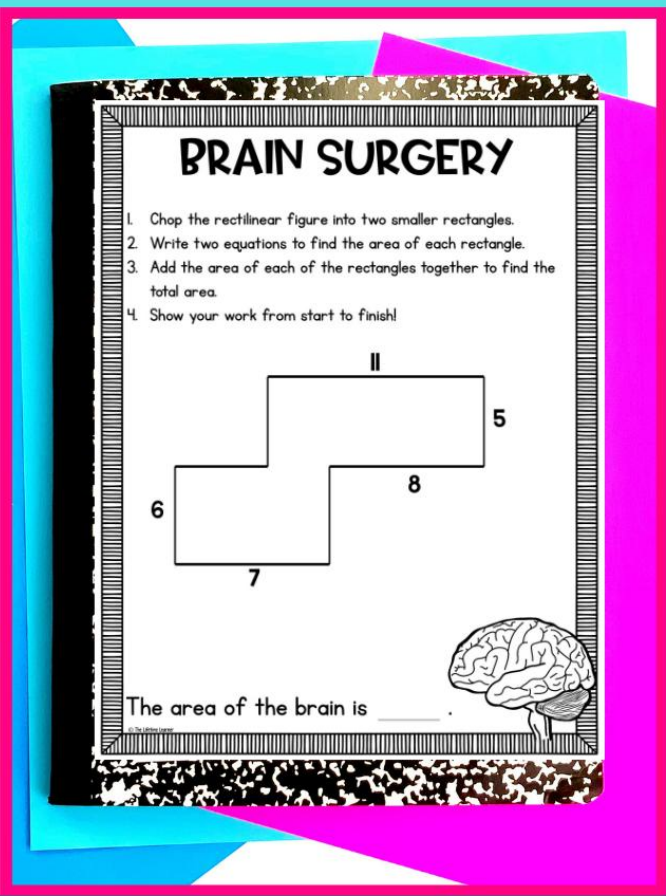
THE CONTENT:

10 themed math challenges aligned to math standards







HOW TO USE THIS:

Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

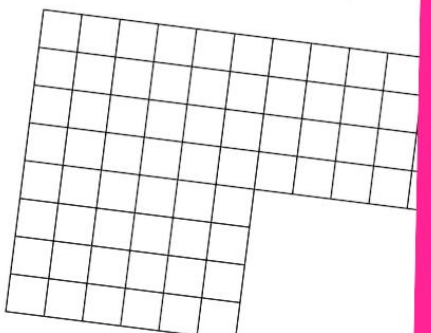
uations to find the area of each rectangle.
of each of the rectangles together to find the

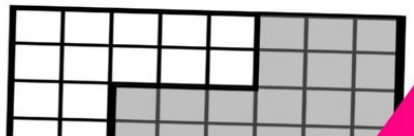
EYEBALL SURG

1. Chop the rectilinear figure into two smalle
2. Write two equations to find the area of ea
3. Add the area of each of the rectangles tog total area.
4. Show your work from start to finish!



STOMACH SURGERY

1. Chop the rectilinear figure into two smaller rectangles.
2. Write two equations to find the area of each rectangle.
3. Add the area of each of the rectangles toget total area.
4. Show your work from start to finish!



SPLEEN SURGERY

ectilinear figure into two smaller rectangles.
equations to find the area of each rectangle.
ea of each of the rectangles together to find the

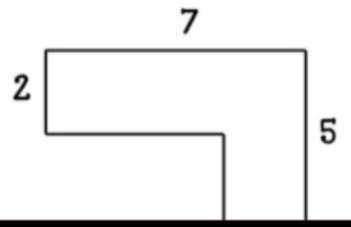
work from start to finish!

focuses on:

finding the area of rectilinear figures

HEART SURGERY

1. Chop the rectilinear figure into two smaller rectangles.
2. Write two equations to find the area of each rectangle.
3. Add the area of each of the rectangles together to find the total area.



EQUATION #1:

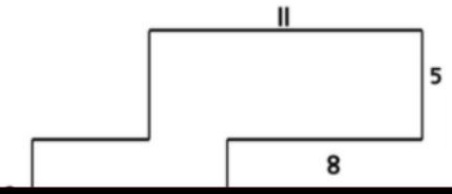
7x2=14

EQUATION #2:

3x2=6

BRAIN SURGERY

1. Chop the rectilinear figure into two smaller rectangles.
2. Write two equations to find the area of each rectangle.
3. Add the area of each of the rectangles together to find the total area.



EQUATION #1:

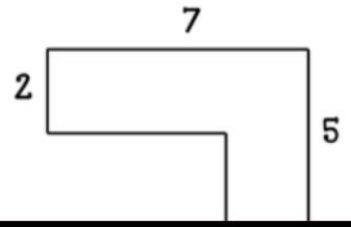
11x5=55

EQUATION #2:

7x6=42

HEART SURGERY

1. Chop the rectilinear figure into two smaller rectangles.
2. Write two equations to find the area of each rectangle.
3. Add the area of each of the rectangles together to find the total area.



EQUATION #1:

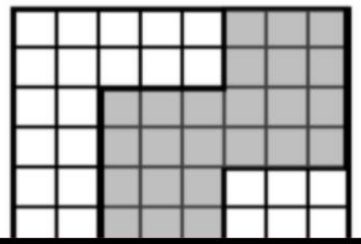
7x2=14

EQUATION #2:

3x2=6

STOMACH SURGERY

1. Chop the rectilinear figure into two smaller rectangles.
2. Write two equations to find the area of each rectangle.
3. Add the area of each of the rectangles together to find the total area.



EQUATION #1:

3x4=12

EQUATION #2:

3x6=18

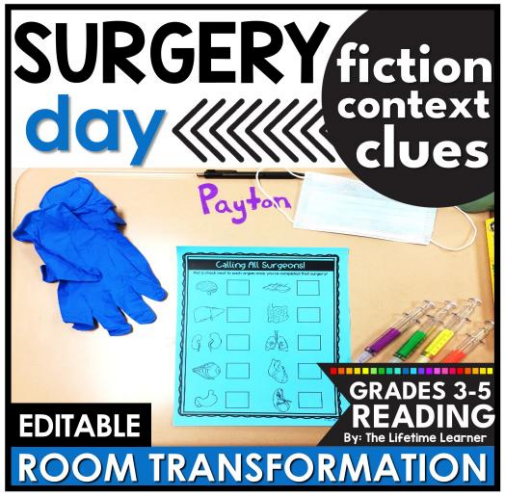
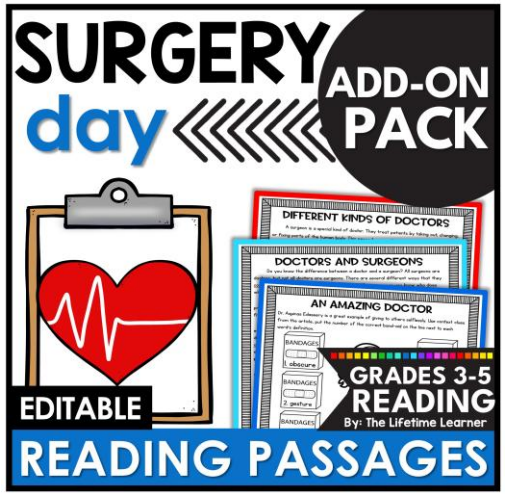
other resources this pairs well with:

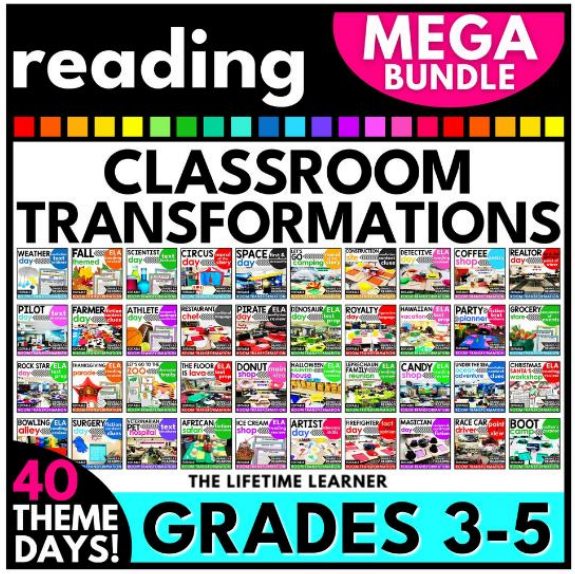
Differentiate by grabbing <u>math</u> for multiple grade levels!

Or, add in some <u>reading</u> to your themed learning day!



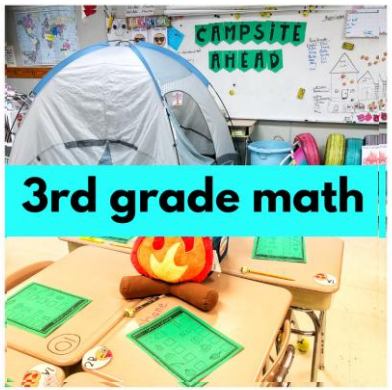


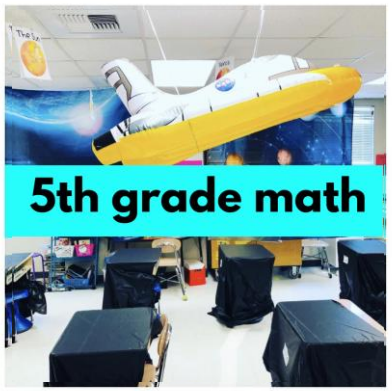
When you purchase a <u>Mega Bundle,</u> you save 50% off the price of the individual resources!



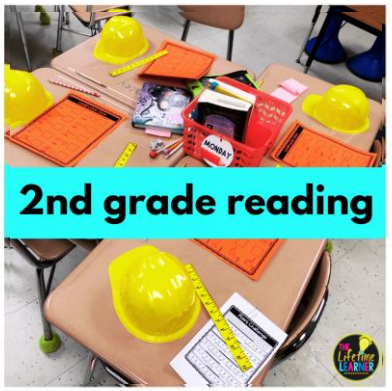
classroom transformations

low prep, fun, and engaging!





K-5 MATH & READING



THE LIFETIME LEARNER'S CLASSROOM TRANSFORMATIONS ARE:

1. Engaging to Students
2. Classroom Tested (and Student-Approved)
3. Print and Digital Compatible
4. Jam-Packed with Content
5. Aligned to Math Standards
6. Easy to Implement
7. Flexible for Every Classroom
8. Versatile Ways to Reward Students
9. Rigorous Student Learning Activities

All content is included so you can simply print and get ready for an AMAZING experience with your students!

Please Note:

- There are 10 math challenges provided as well as décor, a fast finisher activity, and additional extras.
- The digital version is provided in Google Slides.
- Nervous about trying your first room transformation? You'll be hooked once you try one! I promise!
- Feel free to contact me if you have questions or want to chat about room transformations. You can email me at lindsaythelifetimelearner@gmail.com
