

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

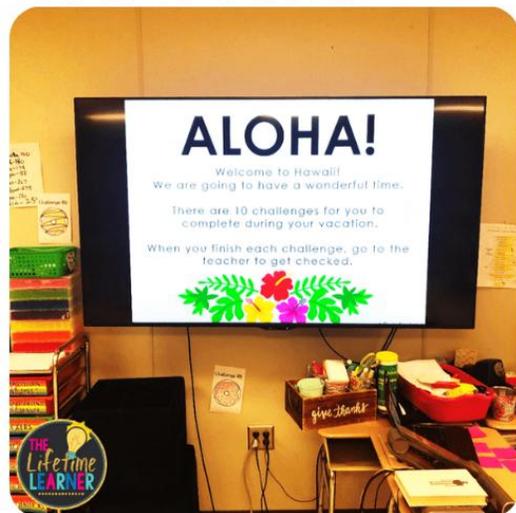

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are in Hawaii today!

They will practice reviewing 3rd grade math concepts in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

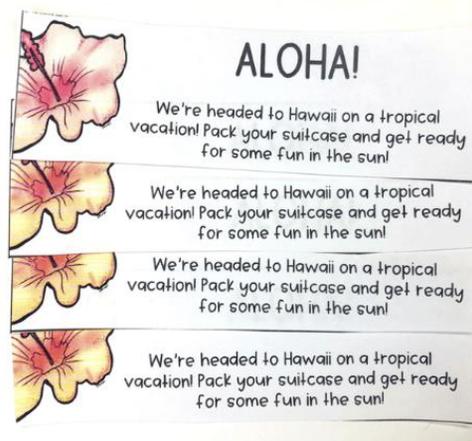

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!

Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include reviewing 3rd grade math concepts.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

WELCOME TO HAWAII
Please visit all ten spots around the island to complete your vacation.

TROPICAL BIRD CHALLENGE
Answer the questions below.

1. Liz started driving 256 miles to Charlotte on Wednesday. On Thursday, she finished her travels after driving another 81 miles. She plans to take the same route back on Friday and Saturday. If she drives the same amount of miles each of those days, estimate how many miles she traveled in all to the nearest hundred?

A. 700
B. 800
C. 900
D. 1000

2. Which model shows $\frac{1}{2}$?

A. 

B. 

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

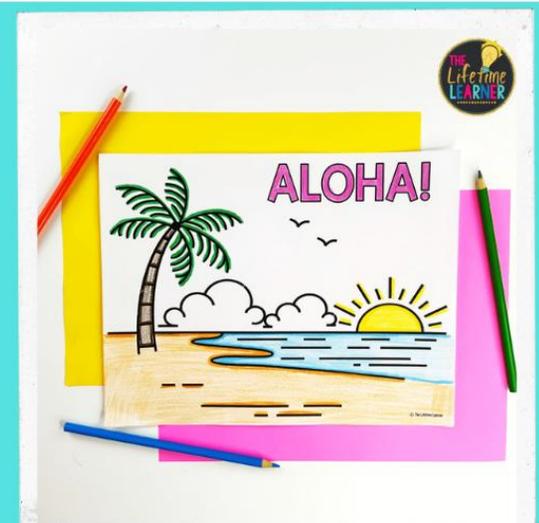

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.
