

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

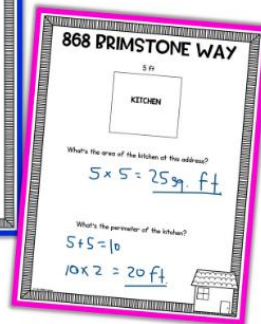

Tell your class they are **realtors today!**

They will practice finding the area and perimeter of rectangles in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practicing finding the area and perimeter of rectangles.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

REALTOR: OPEN HOUSE
Put a check next to each challenge once you've completed it!

868 BRIMSTONE WAY
5 ft
KITCHEN

What's the area of the kitchen at this address?
 $5 \times 5 = 25 \text{ sq. ft.}$

What's the perimeter of the kitchen?
 $5 + 5 = 10$
 $10 \times 2 = 20 \text{ ft.}$

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Prize

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

THE CONTENT:

10 themed math challenges
aligned to math standards

123 ACORN ROAD

Please find the area and perimeter of the family room below.

8 ft

12 ft

Area:

Perimeter:

This page features a math challenge for a family room. It includes a rectangle with dimensions 8 ft by 12 ft and asks for the area and perimeter. A small house icon is at the bottom right.

789 DOGWOOD COURT

There's a lot of amenities close to this address. Please tell if each one is the area or perimeter.

You walk around the edge of a pool. Did you walk around the area or perimeter of the pool?

You put a fence up in your backyard. Did you put a fence up on the area or perimeter of your yard?

Your child plays soccer at the soccer field. Do they play soccer on the area or perimeter of the field?

There is tennis court and you play on every inch of it. Did you play tennis on the area or perimeter of the court?

There's a walking trail that goes around a lake. Is the walking trail on the area or perimeter of the lake?

There is mulch all over a playground. Is the mulch on the area or perimeter of the playground?

This page features a math challenge with six scenarios asking whether the area or perimeter is being described. A small house icon is at the bottom right.

890 PINE NUT WAY

There are 5 bedrooms at this address.

Bedroom #1 2 ft 10 ft

Bedroom #2 3 ft 8 ft

Bedroom #3 4 ft 11 ft

Bedroom #4 6 ft 8 ft

Bedroom #5 5 ft 9 ft

Which bedroom has the largest area?

Which bedroom has the smallest area?

This page features a math challenge with five bedrooms of different dimensions. It asks for the largest and smallest area. A small house icon is at the bottom right.

HOW TO USE THIS:

Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days
