

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

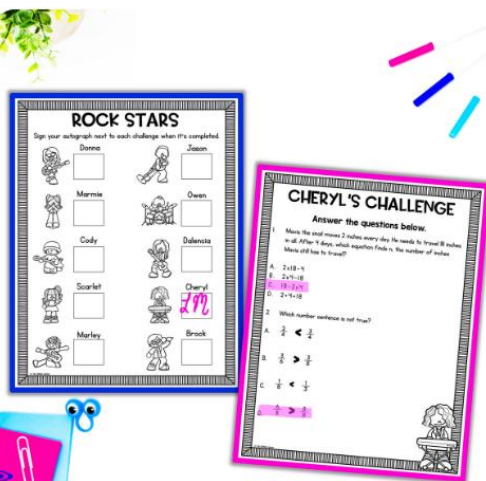

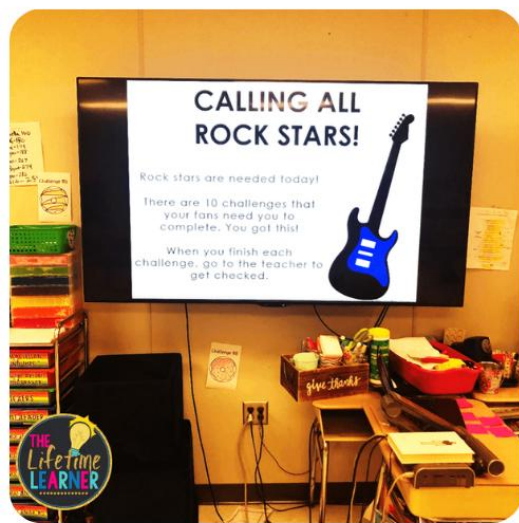

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are rock stars today!

They will practice a variety of 3rd grade math skills in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!

Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include reviewing a variety of 3rd grade math skills.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

The image displays two challenge sheets and decorative elements. The 'ROCK STARS' sheet is a 2x5 grid of boxes for signing off on challenges for students: Donna, Jason, Marmie, Owen, Cody, Dalencia, Scarlet, Cheryl (with a signature), and Marley, Brock. The 'CHERYL'S CHALLENGE' sheet contains two math problems. Problem 1 asks for the number of inches Mavis still has to travel after 4 days, with options A: $2 \times 18 - 4$, B: $2 \times 4 - 18$, C: $18 - 2 \times 4$ (highlighted), and D: $2 \times 4 + 18$. Problem 2 asks which number sentence is not true, with options A: $\frac{2}{4} < \frac{3}{4}$, B: $\frac{3}{6} > \frac{3}{8}$, C: $\frac{1}{8} < \frac{1}{3}$, and D: $\frac{6}{8} > \frac{8}{5}$ (highlighted). Decorative elements include a paperclip, a cartoon notepad, and colorful arrows.

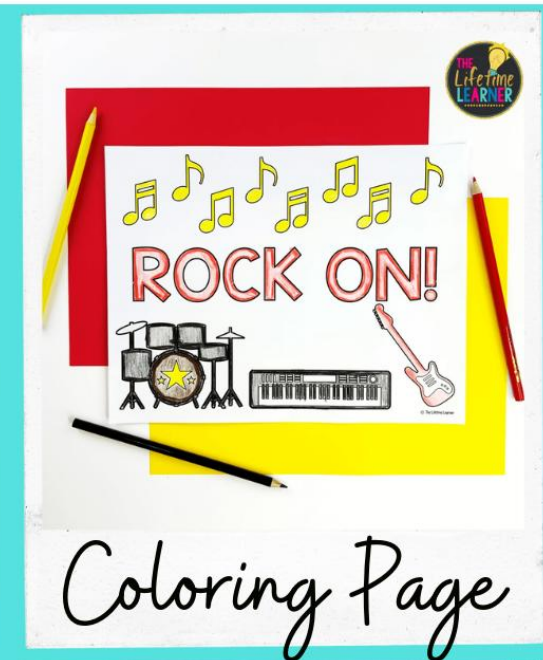

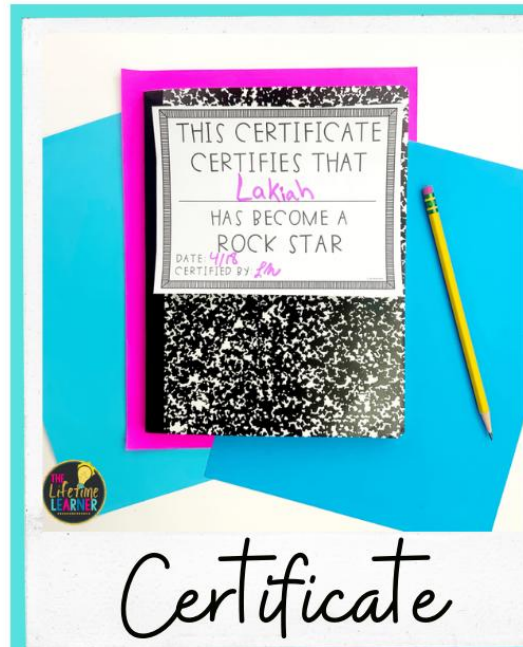

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

THE CONTENT:

10 themed math challenges aligned to math standards

JASON'S CHALLENGE

Answer the questions below.

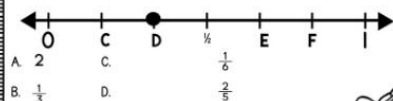

People Who Attended The Football Game

1. By looking at the graph, how many more people attended the game in Week 2 and 3 than in Week 1 and 4?

- A. 900
- B. 500
- C. 300
- D. 400

2. Which number does point D represent on the number line?

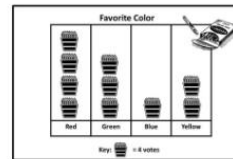

OWEN'S CHALLENGE

Answer the questions below.

1. Gehrig's house is shaped like a rectangle. The length of his house is 6 yards. The width of his house is 8 yards. How much fencing does he need to put a fence around the whole house?

- A. 48 yards
- B. 42 yards
- C. 28 yards
- D. 14 yards

2. The pictograph below shows each kid's favorite colors.

How many more kids would need to vote for blue for it to be equal to red?

- A. 12
- B. 3
- C. 9
- D. 4

CHERYL'S CHALLENGE

Answer the questions below.

1. Mavis the snail moves 2 inches every day. He needs to travel 18 inches in all. After 4 days, which equation finds n , the number of inches Mavis still has to travel?

- A. $2 \times 18 - 4$
- B. $2 \times 4 - 18$
- C. $18 - 2 \times 4$
- D. $2 \times 4 + 18$

2. Which number sentence is not true?

- A. $\frac{2}{4} < \frac{3}{4}$
- B. $\frac{3}{6} > \frac{3}{8}$
- C. $\frac{1}{8} < \frac{1}{3}$
- D. $\frac{6}{8} > \frac{8}{8}$

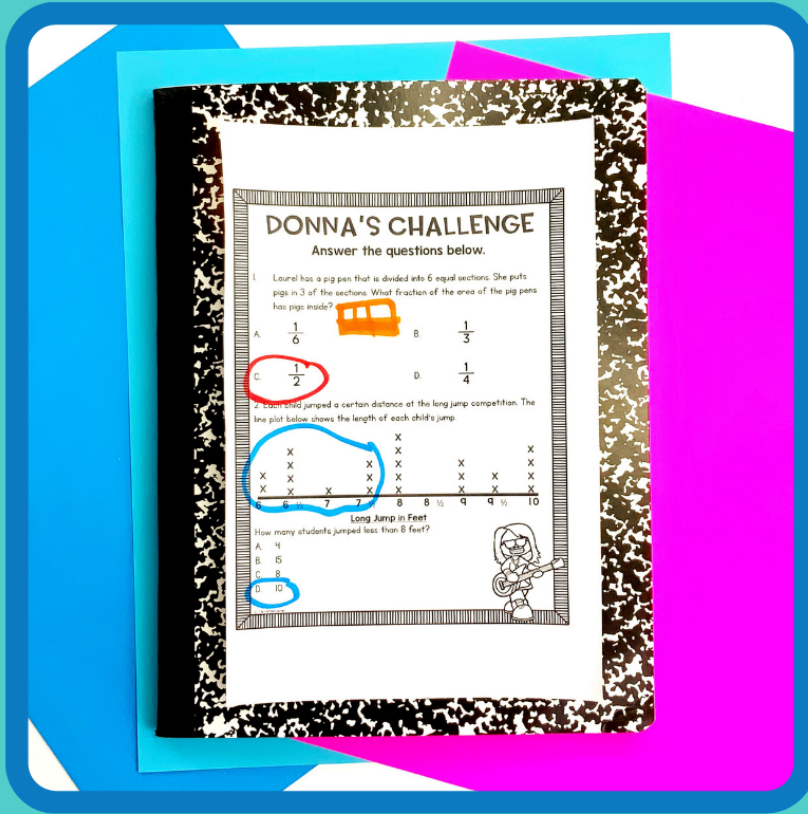

HOW TO USE THIS:

Ideas for Implementation:

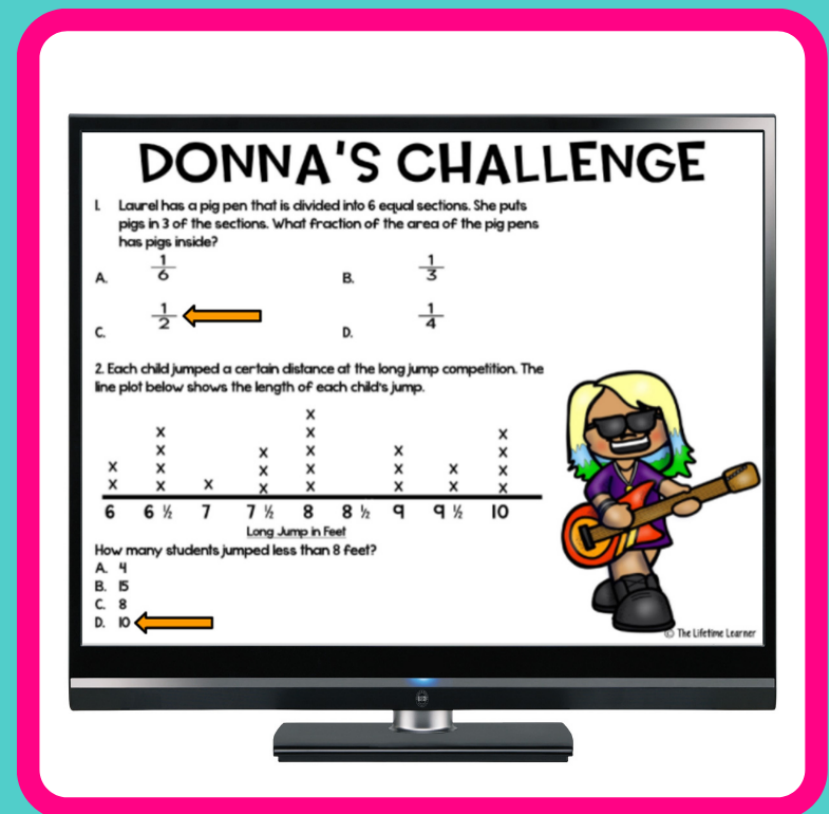

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

The image shows a notebook page titled "MARLEY'S CHALLENGE" with the instruction "Answer the questions below." The page contains two math problems. Problem 1 asks for an equation showing the total number of footballs owned by Tim, given he has 6 boxes in the family room and 3 boxes in the game room, with 4 footballs in each box. Student work shows "6x4" and "3x4" written in green, and the equation $(6+3) \times 4$ circled in red. Problem 2 asks for the time Lucille leaves the house 15 minutes after the time shown on a clock. The clock shows 2:35. Student work shows "15 min later" and "2:35" written in purple, and the time 2:50 circled in blue. A small cartoon character is at the bottom left of the page.

CHERYL'S CHALLENGE

Answer the questions below.

1. Mavis the snail moves 2 inches every day. He needs to travel 18 inches to reach the end of the garden. How many days will it take Mavis to reach the end of the garden?

LENANCIA'S CHALLENGE

Answer the questions below.

1. A square below has a perimeter of 36 centimeters. What is the length of one side?

SCARLET'S CHALLENGE

Answer the questions below.

1. What fraction of the shape below is shaded?

CODY'S CHALLENGE

Answer the questions below.

1. Look at the pattern below.
32, 29, 26, 23, n, 17, 14, 11

A. n is equal to $23 - 3$

MIE'S CHALLENGE

Answer the questions below.

1. What is the distance from A to B on the number line below?

MARLEY'S CHALLENGE

Answer the questions below.

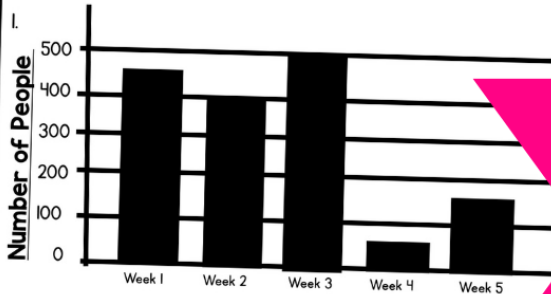

1. Tim has a large amount of footballs at his house.
- He has 6 boxes of footballs in the family room.
- He has 3 boxes of footballs in the game room.
- Each box has 4 footballs in it.

What equation shows the total number footballs?

- A. $6+3+4$
B. $6 \times 3 \times 4$
C. $(6 \times 4) + (3 \times 4)$
D. $(6 \times 3) + (3 \times 4)$

JASON'S CHALLENGE

Answer the questions below.

By looking at the graph, how many more people attended...

DONNA'S CHALLENGE

Answer the questions below.

1. A pig pen that is divided into 6 equal sections. She puts 2 piglets in 4 of the sections. What fraction of the area of the pig pens is shaded?

B. $\frac{1}{3}$

focuses on:
reviewing a variety of
3rd grade math skills

MARMIE'S CHALLENGE

1. What is the distance from A to B on the number line below?

- A. $\frac{1}{2}$ B. $\frac{1}{4}$ ←
 C. $\frac{3}{8}$ D. $\frac{4}{8}$

2. Meagan has a lot to do around the farm. She starts work at 8:20 AM.
 -She cleans the pig pen for 10 minutes.
 -She mucks out the stalls for 25 minutes.
 -She feeds the chickens for 5 minutes.

CODY'S CHALLENGE

1. Look at the pattern below.
 32, 29, 26, 23, n, 17, 14, 11

- A. n is equal to 23 - 3 ←
 B. n is 3 more than 23
 C. n is 3 less than 17
 D. n is equal to 17-3

2. Stephanie has 5 bags of mulch. There are 20 pounds in each bag. Stephanie gives half of the mulch to her friend Cynthia. Which expression shows how much mulch Stephanie still has?

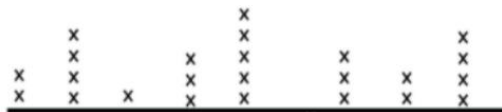

DONNA'S CHALLENGE

1. Laurel has a pig pen that is divided into 6 equal sections. She puts pigs in 3 of the sections. What fraction of the area of the pig pens has pigs inside?

- A. $\frac{1}{6}$ B. $\frac{1}{3}$
 C. $\frac{1}{2}$ ← D. $\frac{1}{4}$

2. Each child jumped a certain distance at the long jump competition. The line plot below shows the length of each child's jump.

MARLEY'S CHALLENGE

1. Tim has a large amount of footballs at his house.
 - He has 6 boxes of footballs in the family room.
 - He has 3 boxes of footballs in the game room
 - Each box has 4 footballs in it.

What equation shows the total number footballs he owns?

- A. $6 + 3 + 4$
 B. $6 \times 3 \times 4$
 C. $(6 \times 4) + (3 \times 4)$ ←
 D. $(6 \times 3) + (3 \times 4)$

2. Lucille wakes up at the time shown on the clock. She is ready to leave the house 15 minutes later. What time does she leave the

THE LIFETIME LEARNER'S CLASSROOM TRANSFORMATIONS ARE:

1. Engaging to Students
2. Classroom Tested (and Student-Approved)
3. Print and Digital Compatible
4. Jam-Packed with Content
5. Aligned to Math Standards
6. Easy to Implement
7. Flexible for Every Classroom
8. Versatile Ways to Reward Students
9. Rigorous Student Learning Activities

All content is included so you can simply **print**
and get ready for an **AMAZING** experience
with your students!

Please Note:

- **There are 10 math challenges provided as well as décor, a fast finisher activity, and additional extras.**
- **The digital version is provided in Google Slides.**
- **Nervous about trying your first room transformation? You'll be hooked once you try one! I promise!**
- **Feel free to contact me if you have questions or want to chat about room transformations. You can email me at lindsaythelifetimelearner@gmail.com**
