

# WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

**Room transformations can be stress-free and low-prep.**

**Keep scrolling to learn how!**

# Let's start with the basics...

## What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

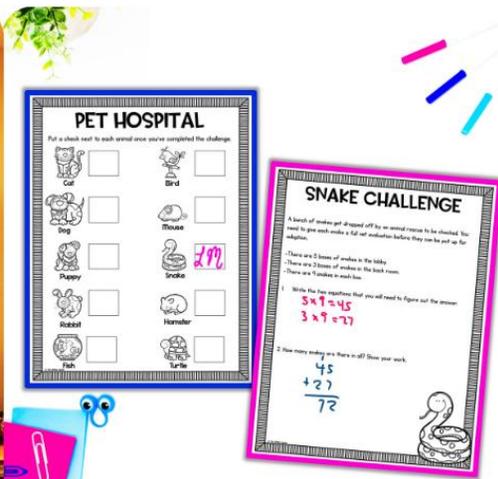

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

# STEP 1:

Tell your class they are vets today!

They will practice solving 3rd grade multi-step word problems (includes add, subtract, multiply, divide) in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!  
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

# STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practicing solving 3rd grade multi-step word problems (includes add, subtract, multiply, divide).

## Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

## Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

**PET HOSPITAL**  
Put a check next to each animal once you've completed the challenge.

Cat <input type="checkbox"/>	Bird <input type="checkbox"/>
Dog <input type="checkbox"/>	Mouse <input type="checkbox"/>
Puppy <input type="checkbox"/>	Snake <input checked="" type="checkbox"/>
Rabbit <input type="checkbox"/>	Hamster <input type="checkbox"/>
Fish <input type="checkbox"/>	Turtle <input type="checkbox"/>

**SNAKE CHALLENGE**  
A bunch of snakes get dropped off by an animal rescue to be checked. You need to give each snake a full vet evaluation before they can be put up for adoption.

- There are 5 boxes of snakes in the lobby.
- There are 3 boxes of snakes in the back room.
- There are 9 snakes in each box.

1. Write the two equations that you will need to figure out the answer:  
 $5 \times 9 = 45$   
 $3 \times 9 = 27$

2. How many snakes are there in all? Show your work:  
$$\begin{array}{r} 45 \\ + 27 \\ \hline 72 \end{array}$$

# STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

## Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Certificate

Coloring Page

In Action Pic

Prize

# STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

**Choose from 3 versions!**

**Digital Scavenger Hunt**

*Let students "find" the facts on Google Slides*

**Printable Facts**

*Hang facts around room*

**QR Codes**

*Students scan to read fun facts*

# THE CONTENT:

## 10 themed math challenges aligned to math standards

### TURTLE CHALLENGE

Someone just bought a turtle from the pet store 2 days ago. They come in to have their turtle get a check up to make sure everything's okay.

You are trying to check the turtle out but he keeps popping back inside his shell. He's very shy!

The 1<sup>st</sup> time you try to look at him, he pops into his shell 27 times. The 2<sup>nd</sup> time, he pops into his shell double the amount of times he did the first time! The final time you try to look at him, he only goes into his shell to hide 15 times. How many times did he hide in his shell in all?

Show your work.

### FISH CHALLENGE

You're taking inventory of the fish in an aquarium that comes in. You want to make sure you check each fish.

- There are 8 blue fish.
- There are half as many red fish as blue fish.
- There are three times as many green as blue fish.
- There are 6 more yellow fish than blue fish.
- There are 7 fewer orange fish than blue fish.

Tell how many of each type of fish there are. Show your work.

Red:

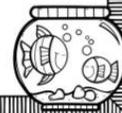

Orange:

Yellow:

Green:

Blue:

Tell how many fish there are in all:

### PUPPY CHALLENGE

Puppies are the most popular animal brought into your pet hospital today! You keep them all in crates in the back while you check on other animals.

Unfortunately, one of your vet aides forgets to lock the door to the kennel. All of the crates were left open and all of the puppies escaped. Read the lines below and tell how many puppies you need to find!

- There were 5 crates of puppies that had 5 puppies in each crate.
- There were 8 crates of puppies with 3 puppies in each crate.
- There were 2 crates of puppies that had 6 puppies in each crate.
- There were also 8 puppies in a large holding area.

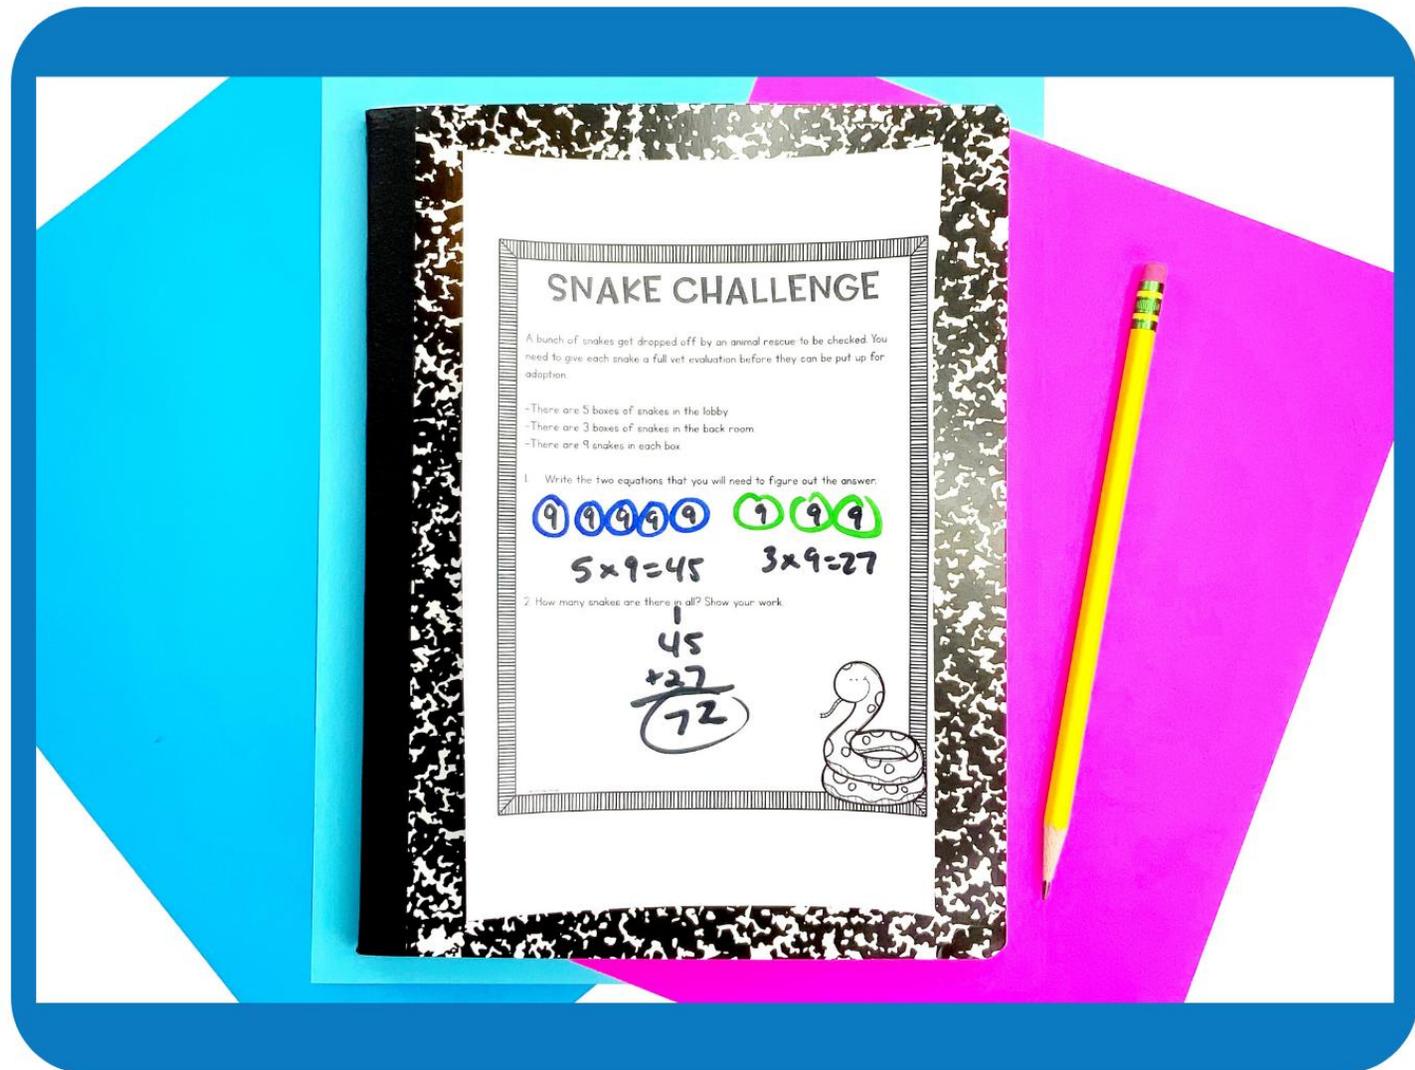

How many puppies are on the loose in all? Show your work.

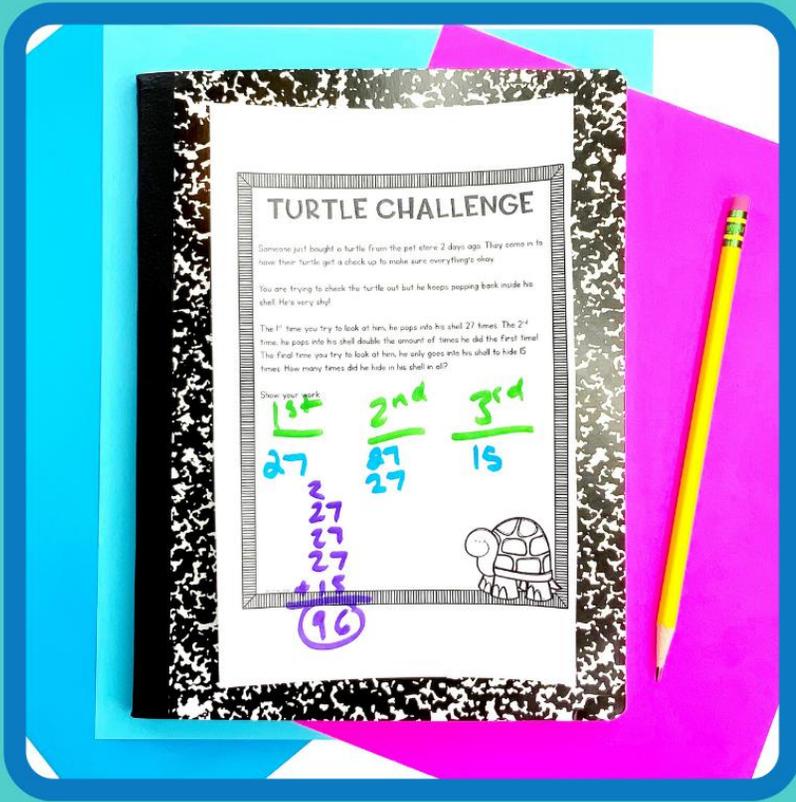

# HOW TO USE THIS:

## Ideas for Implementation:

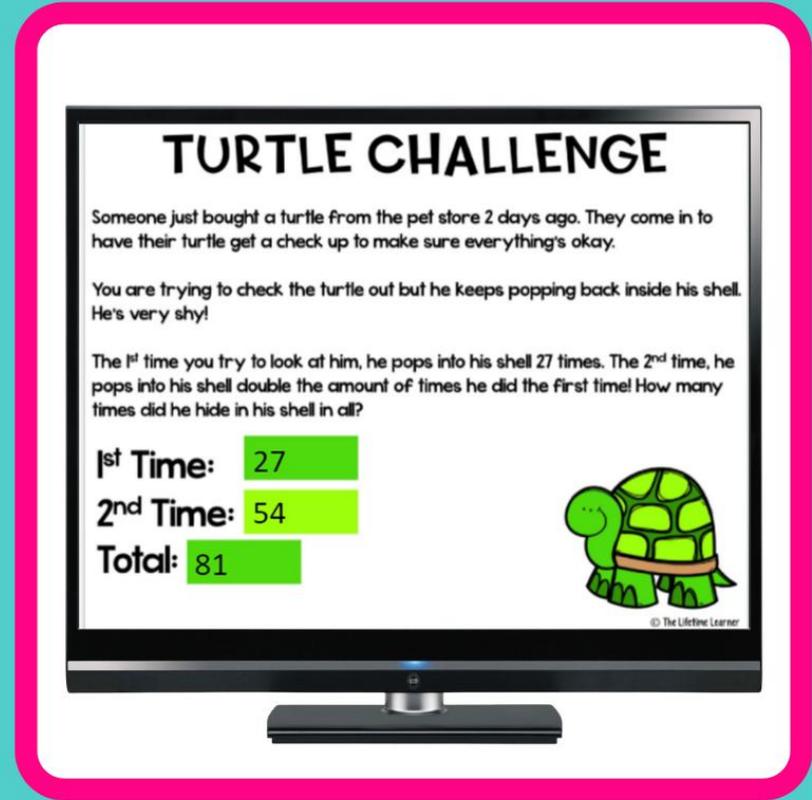

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

Choose the format  
that works best for you!

# Every activity relates to real-life mathematics!

## RABBIT CHALLENGE

A rabbit comes in with a sick tummy because he ate too many carrots.  
According to his owner:

## DOG CHALLENGE

Lots of dogs come into the Pet Hospital needing x-rays to see if they have any broken bones.

## HAPPY CHALLENGE

The most popular animal brought into your pet hospital today! You have to check on other animals in the back while you check on other animals.

## FISH CHALLENGE

You're taking inventory of the fish in an aquarium that has 100 fish. You have to make sure you check each fish.

## BIRD CHALLENGE

A parrot and a parakeet come in to be treated for broken wings. It takes 90 minutes for you to fix the parrot's wing. It takes 3 times as long to treat the parakeet's wing. How long did it take you to treat both birds?

## MOUSE CHALLENGE

You are in the waiting room while waiting to be seen on Saturday. You chase the mouse for 485 seconds. You don't catch him. On Saturday, you chase him for 28 more seconds than you did on Saturday. How long did you chase the mouse over the weekend?

## TURTLE CHALLENGE

Someone just bought a turtle from the pet store 2 days ago. You have to have their turtle get a check up to make sure everything is okay.  
You are trying to check the turtle out but he keeps popping his head out of his shell. He's very shy!  
The 1<sup>st</sup> time you try to look at him, he pops into his shell. The 2<sup>nd</sup> time, he pops into his shell double the amount of times he did the first time.  
The final time you try to look at him, he only goes into his shell 1/2 the amount of times.  
How many times did he hide in his shell in all?  
Show your work.

## SNAKE CHALLENGE

A bunch of snakes get dropped off by an animal rescue to be checked. You need to give each snake a full vet evaluation before they can be put up for adoption.

- There are 5 boxes of snakes in the lobby.
- There are 3 boxes of snakes in the back room.
- There are 9 snakes in each box.

1. Write the two equations that you will need to solve for the total number of snakes.

## HAMSTER CHALLENGE

You have 12 hamsters in her hamsters. She has 5 girl hamsters and 6 times as many boy hamsters. She also has 12 hamster babies. How many hamsters does she have in total?  
Use a drawing to represent how many hamsters she has.

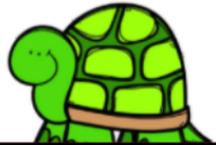

**focuses on:**  
**3rd grade multi-step word problems**

You are trying to check the turtle out but he keeps popping back inside his shell. He's very shy!

The 1<sup>st</sup> time you try to look at him, he pops into his shell 27 times. The 2<sup>nd</sup> time, he pops into his shell double the amount of times he did the first time! How many times did he hide in his shell in all?

1<sup>st</sup> Time: 27  
2<sup>nd</sup> Time: 54  
Total: 81

Boy hamsters. She also has 12 hamster babies. How many hamsters does she have in all?

Write an equation to represent how many hamsters she has.

Girl Hamsters: 5

Boy Hamsters:  $5 \times 6 = 30$

Baby Hamsters: 12

Tell how many hamsters she has in all.

$$5 \times 6 + 12 + 5 = 47$$

adoption.

- There are 5 boxes of snakes in the lobby.
- There are 3 boxes of snakes in the back room.
- There are 9 snakes in each box.

1. Write the two equations that you will need to figure out the answer.

Equation #1:  $5 \times 9$

Equation #2:  $3 \times 9$

2. How many snakes are there in all?

72

On Saturday, you chase the mouse for 485 seconds. You don't catch him. On Sunday, you chase him for 28 more seconds than you did on Saturday. How many total seconds did you chase the mouse over the weekend?

Saturday: 485

Sunday: 513

Total: 998
