

# WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

# Let's start with the basics...

## What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

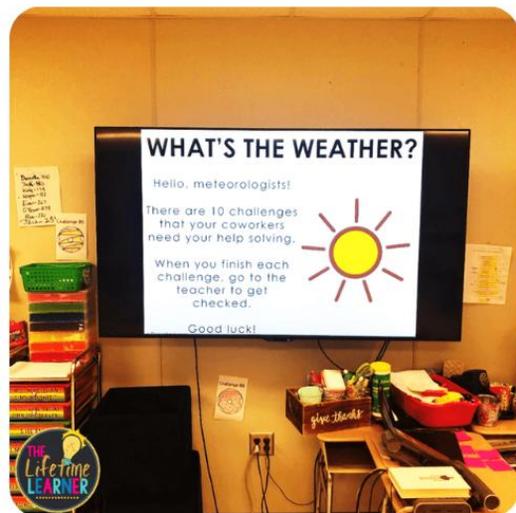

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

# STEP 1:

Tell your class they are studying the weather today!

They will practice multi-digit subtraction in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

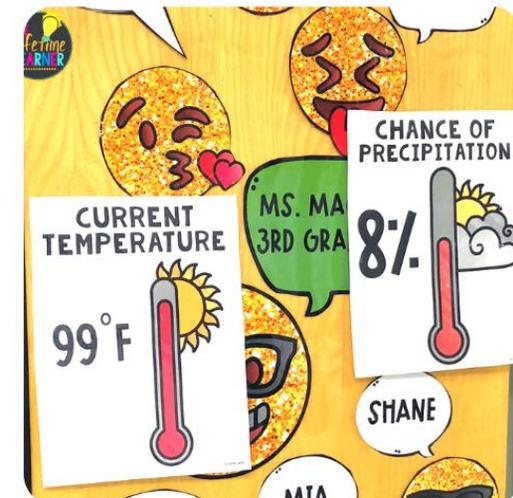

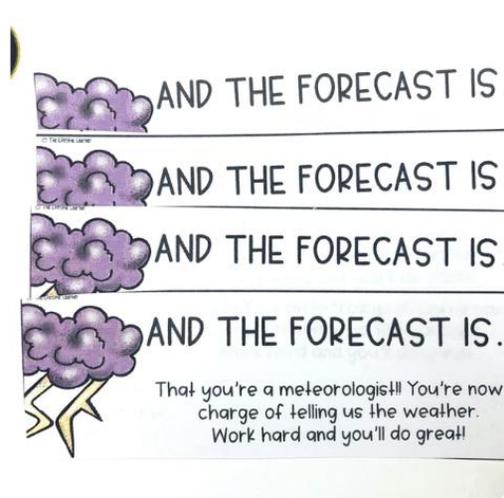

Flexibility is key.

Need to modify? No problem!  
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

# STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practice with multi-digit subtraction.

## Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

## Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

The image displays two educational worksheets. The first, titled "WHAT'S THE WEATHER?", is a recording sheet with a grid of weather icons and checkboxes. The icons include Sunny, Cloudy, Fog, Rainy, Windy, Hail, Tornado, Snow, Thunderstorm, and Ice Storm. The "Windy" checkbox is marked with a pink signature. The second worksheet is a subtraction practice sheet with two problems:  $600 - 462 = 138$  and  $700 - 81 = 619$ . Both problems show the standard subtraction algorithm with carrying. The entire scene is decorated with colorful arrows at the top and a blue bird-like character at the bottom.

# STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

## Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Prize

# STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

## Choose from 3 versions!

## 10 themed math challenges aligned to math standards

### WINDY

$$\begin{array}{r} 600 \\ - 462 \\ \hline \end{array}$$

$$700 - 81$$

### RAINY

This year, it rained 637 times on the continent of North America. Last year, it rained 248 times in North America. What is the difference in the amount of times it rained this year and last year?

Augustin measures the rainfall in the rainforest every day. It has rained a total of 250 inches so far this year. If he expects it to rain 325 inches by the end of the summer, how many more inches does he still need to collect?

### CLOUDY

The table below shows the number of times it was cloudy each year. Use the table to answer the questions below.

2018	237
2017	344
2016	108
2015	200
2014	65

1. How many more times was it cloudy in 2015 than 2014?

2. How many fewer times was it cloudy in 2016 than in 2017?

# HOW TO USE THIS:

## Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days
