

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are working
in an ice cream shop today!

They will practice multi-digit multiplication and division word problems in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will
need to complete and what time frame
they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a
recording sheet for each student. Place them
around your room and you're ready to begin!

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practice with multi-digit multiplication and division word problems.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Prize

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

THE CONTENT:

10 themed math challenges aligned to math standards

ICE CREAM CUP

Solve each problem. Write your answer in the ice cream cup.

DeShawn gets 9 cups of ice cream. If each cup has 123 scoops, then how many ice cream scoops does he have?

There are 53 kids at the party. Each kid gets 38 ice cream cups. How many ice cream cups are given in all?

ICE CREAM SUNDAE

Stuart eats 1,121 sundaes per month. If he eats sundaes for 7 months, how many sundaes has he eaten in all?

The ice cream shop has 4,399 cherries available to sell this week. If there are 5 cherries per sundae, how many sundaes could've been sold?

ICE CREAM CAKE

Dairy Monster has 41 ice cream cakes. Each cake has 15 slices. How many slices of ice cream cake are there total?

There are 2,352 ice cream cakes sold this month. If there are 4 weeks this month, how many cakes were sold per week?

HOW TO USE THIS:

Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

that works best for you!**

Every activity relates to real-life mathematics!

BANANA SPLIT

Priscilla has 1,026 bananas. If it takes 3 bananas to make a banana split, then how many banana splits can she make?

ICE CREAM SANDWICH

Leslie has 67 ice cream sandwiches. If it takes 43 bites to eat one, how many bites will it take to eat them all?

MILKSHAKE

An ice cream parlor puts 6 different flavors in each milkshake. If they have made 438 milkshakes, how many flavors have they used?

POPSICLE

There are 37 different flavored popsicles and each kind. How many popsicles did he buy in all?

ICE CREAM CAKE

Dairy Monster has 41 ice cream cakes. Each cake has 15 slices. How many slices of ice cream cake are there total?

ROOT BEER FLOAT

8 root beer floats from the ice cream shop. If he drinks 1 float each day, how many days will it take for him to drink all?

ICE CREAM SUNDAE

Stuart eats 1,121 sundaes per month. If he eats 1 sundae each day, how many sundaes has he eaten in all?

ICE CREAM CONE

At Desmond's birthday party, there are 107 kids. If each kid eats 6 mini ice cream cones, how many ice cream cones were eaten in all?

=

Minnie's ice cream shop serves 50

ICE CREAM CUP

Problem. Write your answer in the ice cream cup.

9 cups of ice cream. If each cup has 123 scoops, how many scoops of ice cream does he have?

focuses on:
multi-digit multiplication
& division word problems

ICE CREAM CONE

At Desmond's birthday party, there are 107 kids. If each kid eats 6 mini ice cream cones, how many ice cream cones were eaten in all?

=

$$107 \times 6 = 642$$

Minnie's ice cream shop serves 504 ice cream toppings a day. If there are 8 toppings per ice cream cone, how many ice cream cones are sold each day?

ICE CREAM CUP

Solve each problem. Write your answer in the ice cream cup.

DeShawn gets 9 cups of ice cream. If each cup has 123 scoops, then how many ice cream scoops does he have?

$$9 \times 123 = 1107$$

There are 53 kids at the party. Each kid gets 38 ice cream cups. How many ice cream cups are given in all?

ICE CREAM SUNDAE

Stuart eats 1,121 sundaes per month. If he eats sundaes for 7 months, how many sundaes has he eaten in all?

$$1121 \times 7 = 7847$$

The ice cream shop has 4,399 cherries available to sell this week. If there are 5 cherries per sundae, how many sundaes could've been sold?

FROZEN YOGURT

Froggy's Frozen Yogurt has 771 toppings available for purchase right now. If each customer is allowed 6 toppings on their frozen yogurt, how many yogurts can be made total?

$$771 \div 6 = 128$$

3 left over

128 yogurts can be made

Jack has 900 tablespoons of frozen yogurt. If there are 4 tablespoons per cup of yogurt, how many cups of frozen yogurt does he have?

THE LIFETIME LEARNER'S CLASSROOM TRANSFORMATIONS ARE:

1. Engaging to Students
2. Classroom Tested (and Student-Approved)
3. Print and Digital Compatible
4. Jam-Packed with Content
5. Aligned to Math Standards
6. Easy to Implement
7. Flexible for Every Classroom
8. Versatile Ways to Reward Students
9. Rigorous Student Learning Activities

All content is included so you can simply **print**
and get ready for an **AMAZING** experience
with your students!

Please Note:

- There are 10 math challenges provided as well as décor, a fast finisher activity, and additional extras.
- The digital version is provided in Google Slides.
- Nervous about trying your first room transformation? You'll be hooked once you try one! I promise!
- Feel free to contact me if you have questions or want to chat about room transformations. You can email me at lindsaythelifetimelearner@gmail.com
