

# WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

# Let's start with the basics...

## What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

# STEP 1:

Tell your class they are doctors today!

They will practice writing simple expressions (order of operations) in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!

Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

# STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practicing writing simple expressions (order of operations).

## Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

## Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

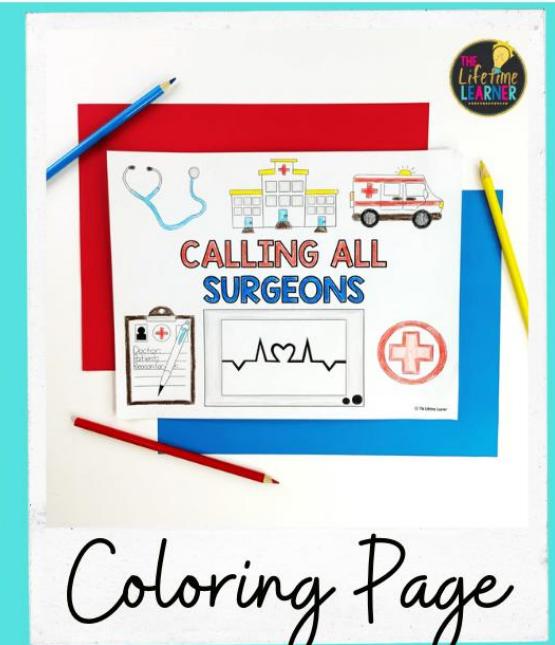

# STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

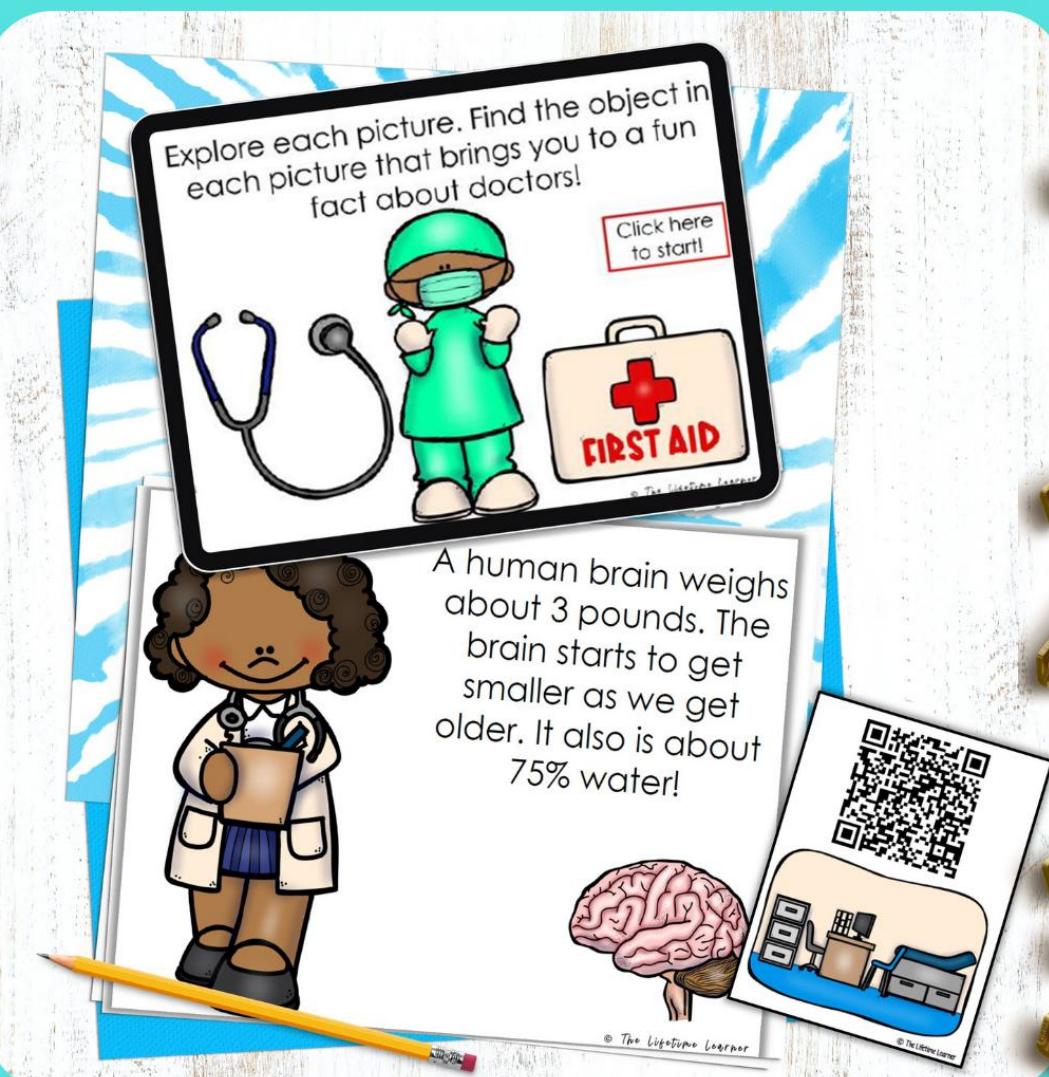

## Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

# STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

**Choose from 3 versions!**

**1 Digital Scavenger Hunt**  
Let students "find" the facts on Google Slides

2

**Printable Facts**

Hang facts around room

3

**QR Codes**  
Students scan to read fun facts

## 10 themed math challenges aligned to math standards

### SPLEEN SURGERY

For this surgery, choose the answer choice that matches the words.

Find the quotient of two divided by nine and then multiply by six

A.  $(2 \div 9) + 6$   
B.  $6 \times (2 \div 9)$   
C.  $9 \div 2 \times 6$   
D.  $6 \times (9 \div 2)$

Find two times as much as four less than six

A.  $(2 \times 4) - 6$   
B.  $(2 \times 6) - 4$   
C.  $2 \times (4 - 6)$   
D.  $(6 - 4) \times 2$

Find the product of six and five and then take that from eighty

A.  $(6 \times 5) - 80$   
B.  $80 - (6 \times 5)$   
C.  $(6 + 5) - 80$   
D.  $(6 \div 5) - 80$

Subtract five from fifty and then add three

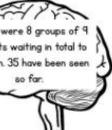

A.  $(50 - 5) + 3$   
B.  $(50 - 5) - 3$   
C.  $(5 - 50) + 3$   
D.  $(50 + 5) + 3$

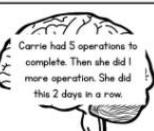

### BRAIN SURGERY

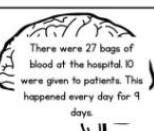

Complete the surgery on each brain below by writing the expression that matches the words.

  
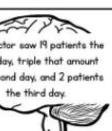

The doctor needed 3 doses of 5mL and 4 doses of 7 mL medicine to make the patient better.

  
There were 8 groups of 9 patients waiting in total to be seen. 35 have been seen so far.

  
Carrie had 5 operations to complete. Then she did 1 more operation. She did this 2 days in a row.

  
For 4 hours in a row, the nurse gave out 6 lollipops to girls and 15 lollipops to boys.

  
There were 27 bags of blood at the hospital. 10 were given to patients. This happened every day for 9 days.

  
The doctor saw 18 patients the first day, triple that amount the second day, and 2 patients the third day.

### SMALL INTESTINE SURGERY

Give each doctor the medicine they need by coloring each medicine bottle the same color as the doctor.

  
I need 2 more than 5 plus 8 grams of medicine, stat!

  
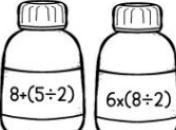

I need 5 less than 8 grams and then take the difference from 22, stat!

  
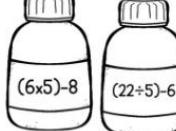

I need 6 times as many grams of medicine as 8 divided by 2, stat!

  
I need the quotient of 5 divided by 2 and then add 8 grams of medicine, stat!

  
I need 6 less than 22 divided by 5 grams of medicine, stat!

  
I need the product of 6 and 5 and then 8 fewer grams medicine, stat!

  
 $8 + (5 \div 2)$   
 $6 \times (8 \div 2)$

  
 $(6 \times 5) - 8$   
 $(22 \div 5) - 6$

  
 $22 - (8 - 5)$   
 $(5 + 8) + 2$

# HOW TO USE THIS:

## Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

# PRINT & DIGITAL

**HEART SURGERY**

During heart surgery, you have to administer lots of medication to make sure the heart stays healthy. Please write each medication dose in word form so you don't get confused later.

$(8+4)\div 2$   
Eight plus four divided by two

$(5\times 2)+(2\times 7)$   
Add the product of five and two with the product of two and seven

$(1+10)\times 5$   
The sum of one and ten multiplied by five

$60\div(6+(41-17))$   
Sixty divided by the difference of forty-one and seventeen plus six

**EYEBALL SURGERY**

Surgeons have to complete paperwork too. You need to fill out the paperwork on the laser eye surgeries you completed this week. Complete the chart below.

Surgery Days	Amount of Surgeries Performed as Numerical Expressions	Amount of Surgeries Performed as Written Expressions	Solve the Expression
Monday	$(12\times 5)-(4\times 11)$	Subtract the product of four and eleven from the product of twelve and five	$60-44=16$
Tuesday	$(40+60)\div(5\times 5)$	The sum of Forty and sixty divided by the product of five and five	$100/25=4$
Wednesday	$9\times(10+3)$	Multiply nine by the sum of ten and three	$9\times 13=117$
Thursday	$15\times(3-1)$	Fifteen multiplied by the difference between three and one	$15\times 2=30$
Friday	$71-[7\times 8]$	Subtract the product of seven and eight from seventy-one	$71-56=15$
Saturday	$(9\times 10)-8$	Subtract eight from the product of nine and ten	$90-8=82$

that works best for you!

# Every activity relates to real-life mathematics!

**LIVER SURGERY**  
Write right or wrong next to each to show if the doctor wrote the or not. If it's wrong, write the expression correct.  
 $9 \times (4+9)$   
Multiply nine by the product of

**SPLEEN SURGERY**  
For this surgery, choose the answer choice that matches the words.  
Find the quotient of two divided by nine and then multiply by six.  
A.  $(2 \div 9) + 6$   
B.  $2 \times (9 \div 6)$

**BRAIN SURGERY**  
Complete the surgery on each brain below by writing that matches the words.  
There were patients who

**STOMACH SURGERY**  
For this surgery, draw a rectangle that follows the instructions inside each stomach. Then, write the total number of squares.  
A rectangle with 3 rows and 11 columns.

**STOMACH SURGERY**  
For this surgery, choose the answer choice that matches the words.  
A. Subtract seven from fifty-six, subtract one  
B. Subtract seven from fifty-six, by six  
C. Subtract seven from fifty-six, subtract one  
D. Subtract one from seven, subtract fifty-six, and divide by six  
 $[(56-7)-1] \div 6$

**SMALL INTESTINE SURGERY**  
Give each doctor the medicine they need by coloring each medicine bottle the same color as the doctor.  
I need 2 more than 5 plus 8 grams of medicine, stat!  
I need 5 less than 8 grams and then take the difference from 22, stat!  
I need 6 times as many grams of medicine as 8 divided by 2, stat!  
 $2 \times (8 \div 2)$

**SKIN SURGERY**  
sed a specific amount of skin in each operation below. picture and write an expression to show how much skin he h numbers and words.

**ART SURGERY**  
you have to administer lots of medication to make sure healthy. Please write each medication dose in word form so used later.

**LUNG SURGERY**  
s are fighting about what numbers are shown in the lungs.

**focuses on:**  
**writing simple expressions**  
**(order of operations)**

# EYEBALL SURGERY

Surgeons have to complete paperwork too. You need to fill out the paperwork on the laser eye surgeries you completed this week. Complete the chart below.

Surgery Days	Amount of Surgeries Performed as Numerical Expressions	Amount of Surgeries Performed as Written Expressions	Solve the Expression
Monday	$(12 \times 5) - (4 \times 11)$	Subtract the product of four and eleven from the product of twelve and five.	$60 - 44 = 16$
Tuesday	$(40 + 60) \div (5 \times 5)$	The sum of forty and sixty divided by the product of five and five.	$100 \div 25 = 4$
Wednesday	$9 \times (10 + 3)$	Multiply nine by the sum of ten and three.	$9 \times 13 = 117$
Thursday	$15 \times (3 - 1)$	Fifteen multiplied by the difference between three and one.	$15 \times 2 = 30$

# SPLEEN SURGERY

For this surgery, choose the answer choice that matches the words.

Find the product of six and five and then take that from eighty

A.  $(6 \times 5) - 80$

B.  $80 - (6 \times 5)$

C.  $(6 + 5) - 80$

D.  $(6 \div 5) - 80$

Find the quotient of two divided by nine and then multiply by six

A.  $(2 \div 9) + 6$

B.  $6 \times (2 \div 9)$

C.  $9 \div 2 \times 6$

D.  $6 \times (9 \div 2)$

Subtract five from fifty and then add

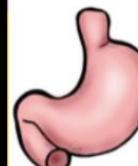

A.  $(50 - 5) + 3$

Find two times as much as four less than

A.  $(2 \times 4) - 6$

# STOMACH SURGERY

$[(56 - 7) - 1] \div 6$

- A. Subtract seven from fifty-six, then divide by six, and subtract one
- B. Subtract seven from fifty-six, then subtract one, and divide by six
- C. Subtract seven from fifty-six, then divide by seven, and subtract one
- D. Subtract one from seven, subtract the difference from fifty-six, and divide by six

- A. Add seven and thirty-three, then multiply by four
- B. Add seven and thirty-three, multiplied by

$(4 + 12) \div 2$

- A. Add four and twelve, then subtract two
- B. Add four and twelve, then divide by two
- C. Divide by two and then add twelve and four
- D. Divide twelve by two and then add four

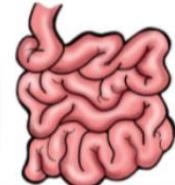

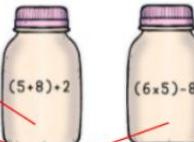

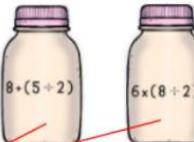

$(23 - 6) \times 5$

- A. Subtract six from twenty-three, then subtract five
- B. Subtract six from twenty-three, then

# SMALL INTESTINE SURGERY

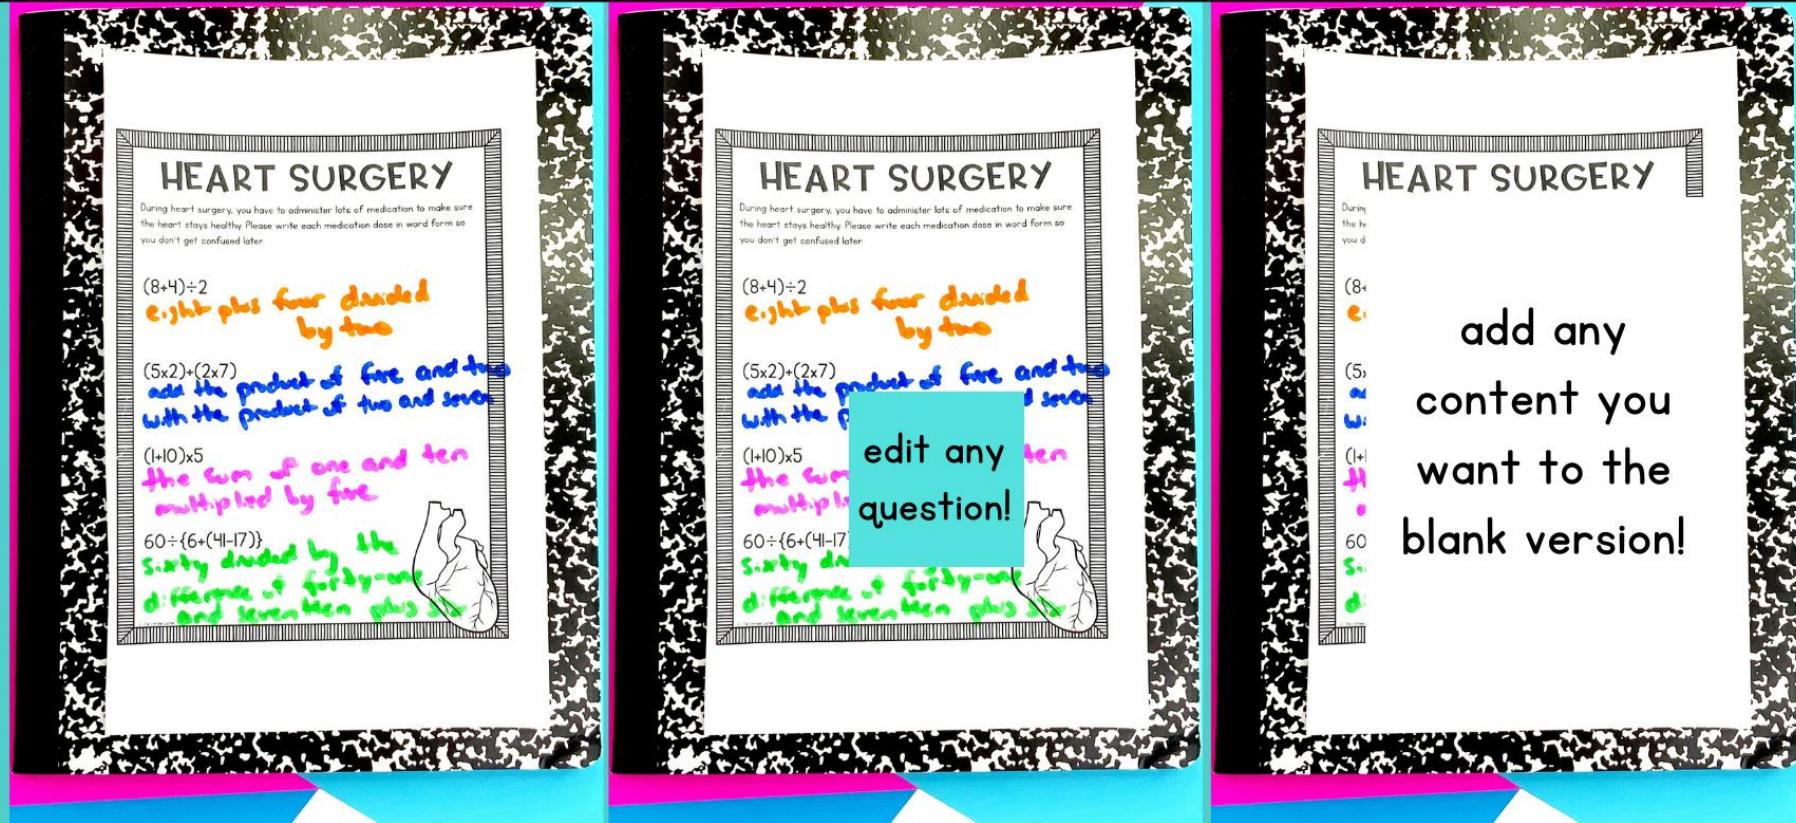

Give each doctor the medicine they need by drawing a line from the correct medicine bottle to the doctor.

- I need 2 more than 5 plus 8 grams of medicine, stat!
- I need 5 less than 8 grams and then take the difference from 22, stat!
- I need 6 times as many grams of medicine as 8 divided by 2, stat!
- I need the quotient of 5 divided by 2 and then add 8 grams of medicine, stat!
