

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are on a safari today!

They will practice reviewing measurement and geometry concepts in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

STEP 2:

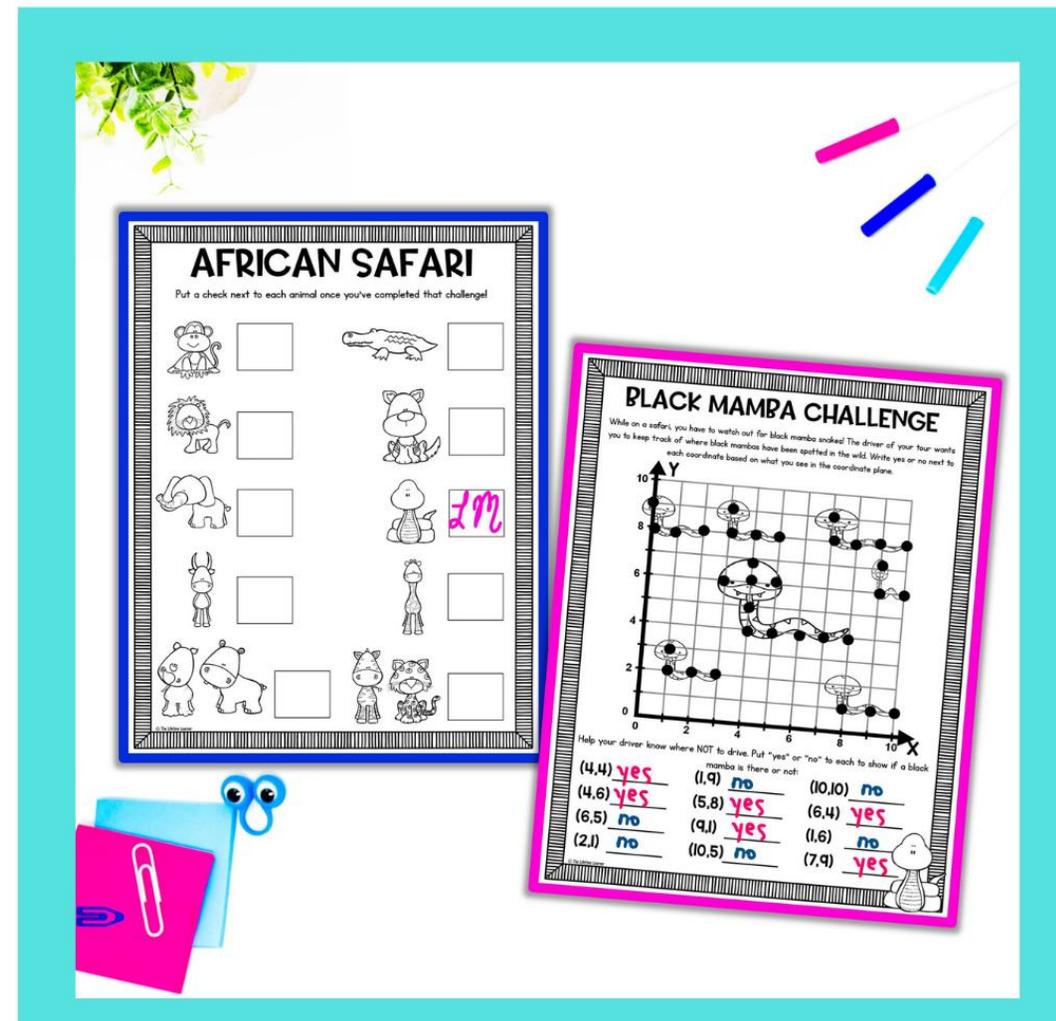

Let students move around the room and complete each center. They can be completed in any order. All centers include reviewing measurement and geometry concepts.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

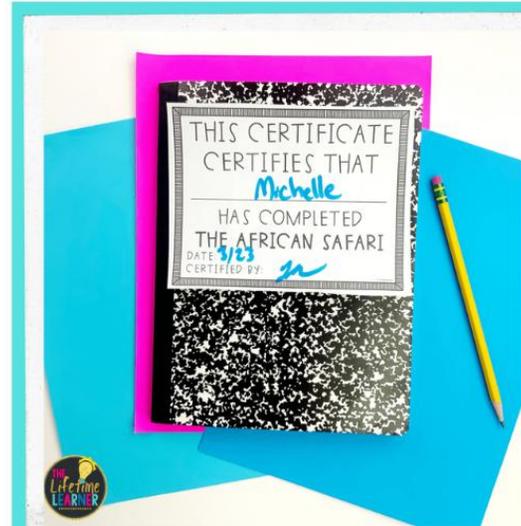

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

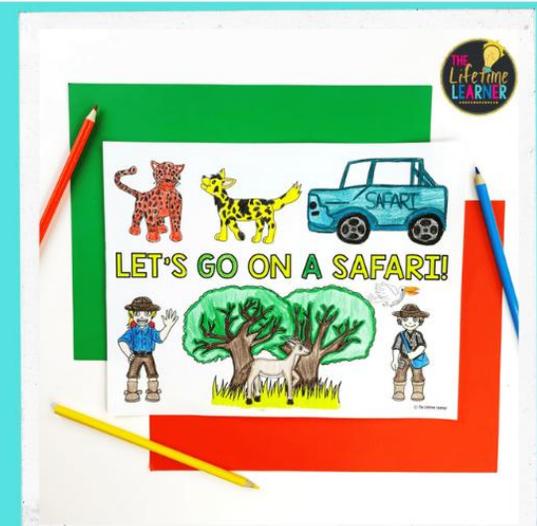

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

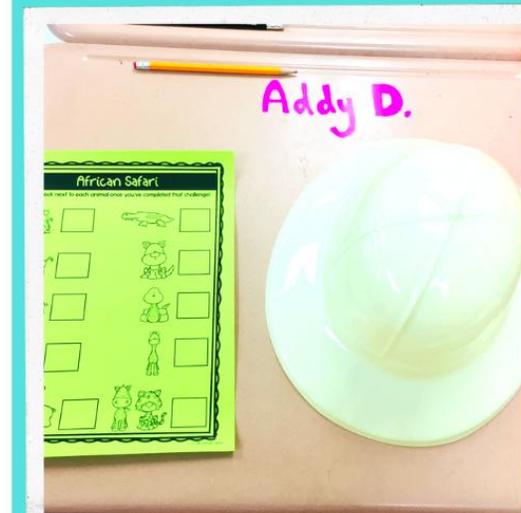

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Certificate

Coloring Page

In Action Pic

Prize

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

1 Digital Scavenger Hunt

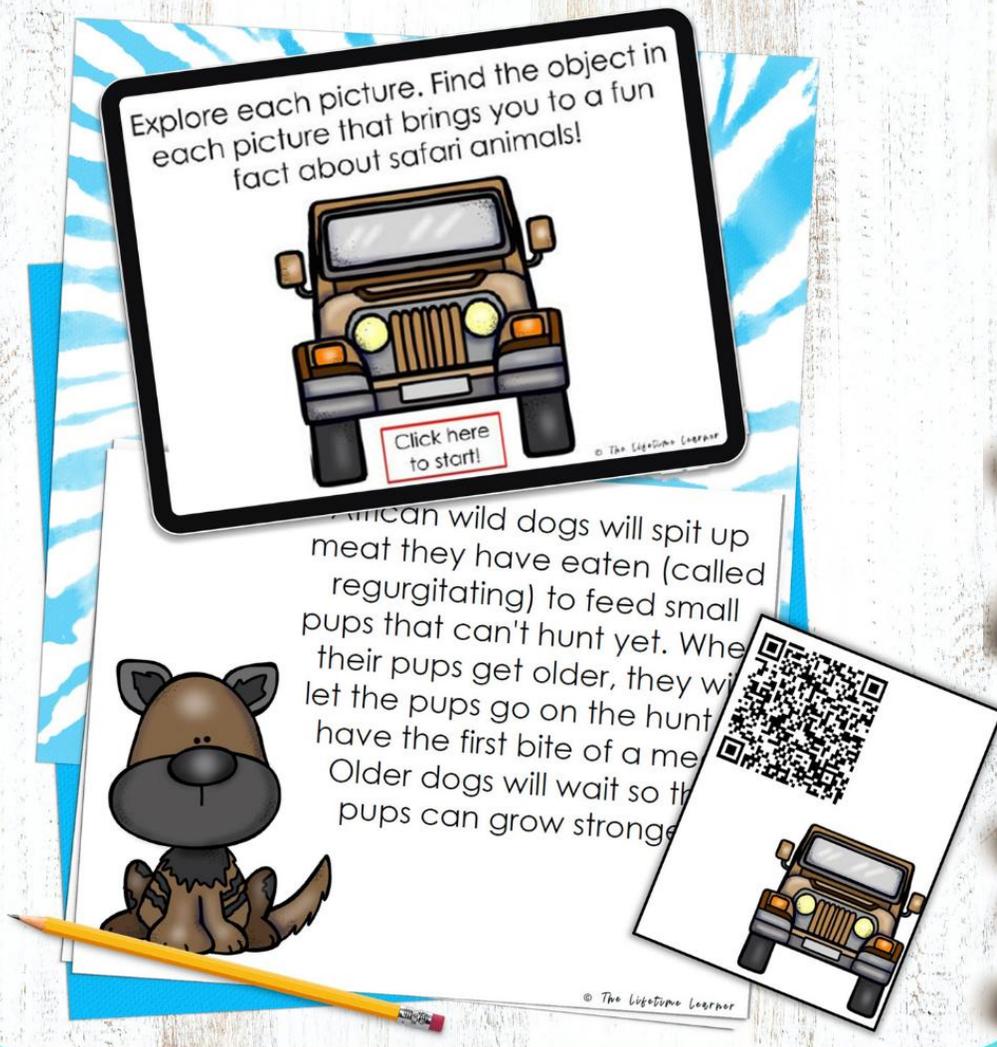

Let students "find" the facts on Google Slides

2 Printable Facts

Hang facts around room

3 QR Codes

Students scan to read fun facts

THE CONTENT:

10 themed math challenges aligned to math standards

HIPPO + RHINO CHALLENGE

The hippo and rhino are arguing about which figure does not belong in each row. In each row, which two figures have the same volume? Cross out the one that does not belong.

BLACK MAMBA CHALLENGE

While on a safari, you have to watch out for black mamba snakes! The driver of your four wants you to keep track of where black mambas have been spotted in the wild. Write yes or no next to each coordinate based on what you see in the coordinate plane.

Help your driver know where NOT to drive. Put "yes" or "no" to each to show if a black mamba is there or not:

(4,4) _____	(1,9) _____	(10,10) _____
(4,6) _____	(5,8) _____	(6,4) _____
(6,5) _____	(9,1) _____	(1,6) _____
(2,1) _____	(10,5) _____	(7,9) _____

ZEBRA + LEOPARD CHALLENGE

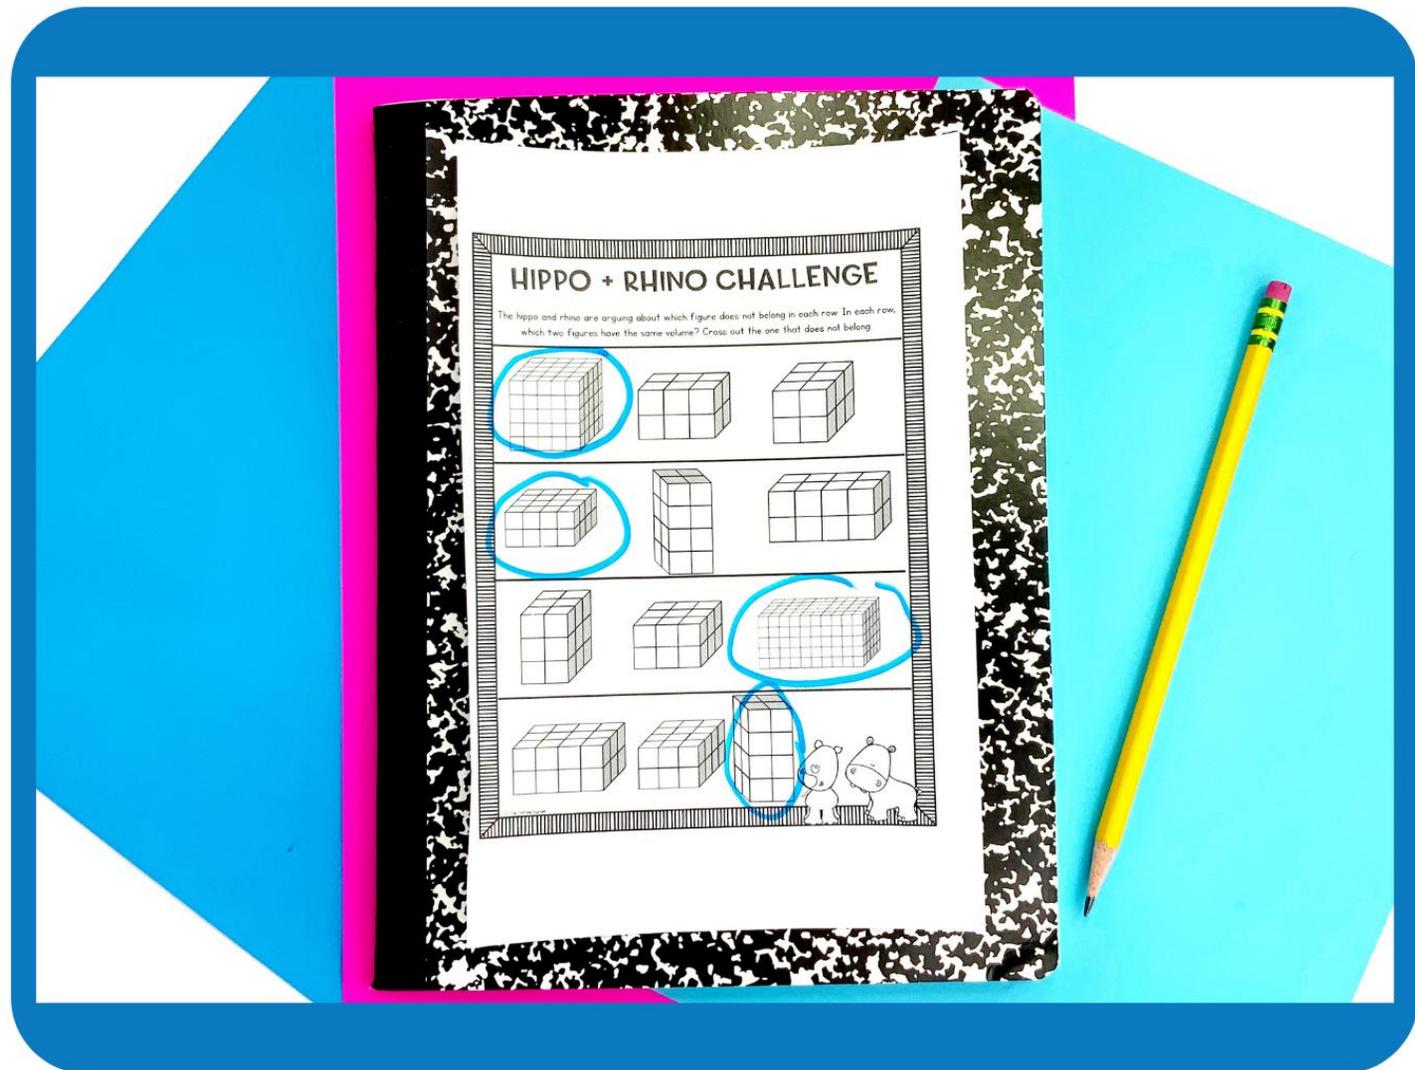

Zebras and leopards don't know how to do math. They need your help. Choose the best answer that fits in each hierarchy.

<p>quadrilaterals</p> <p>├── ?</p> <p>└── kite square</p> <p>A. Trapezium B. Hexagon C. Octagon D. Circle</p>	<p>?</p> <p>├── octagon hexagon heptagon</p> <p>A. Quadrilaterals B. Parallelograms C. Polygons D. Triangles</p>
<p>triangles</p> <p>├── obtuse triangle ?</p> <p>└── Right triangle</p> <p>A. Acute angle B. Acute triangle C. Right angle D. Obtuse angle</p>	<p>Quadrilateral</p> <p>├── rectangle</p> <p>└── ?</p> <p>A. Rhombus B. Quadrilateral C. Kite D. Square</p>

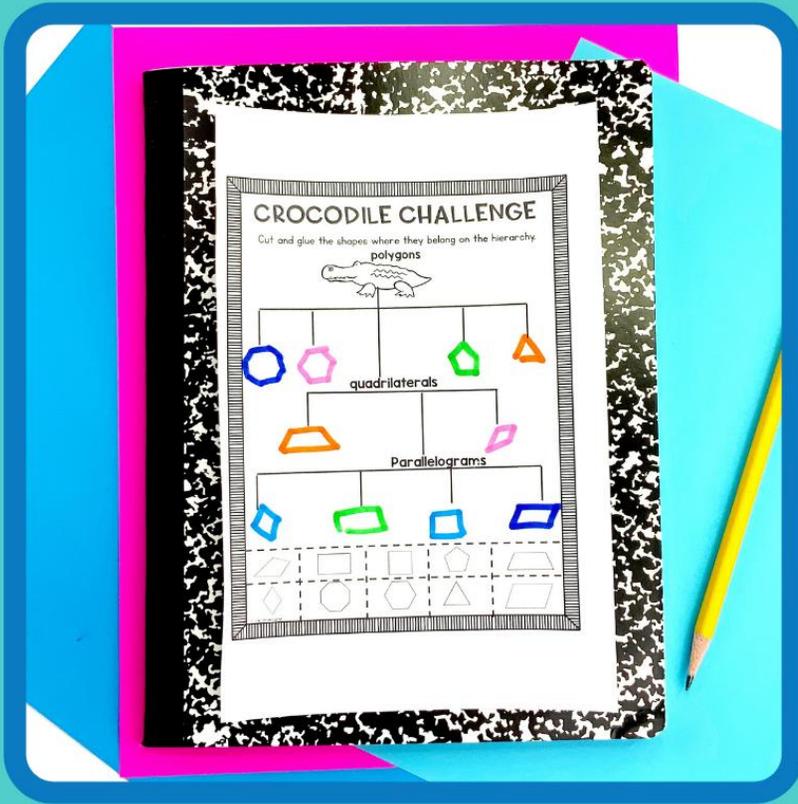

HOW TO USE THIS:

Ideas for Implementation:

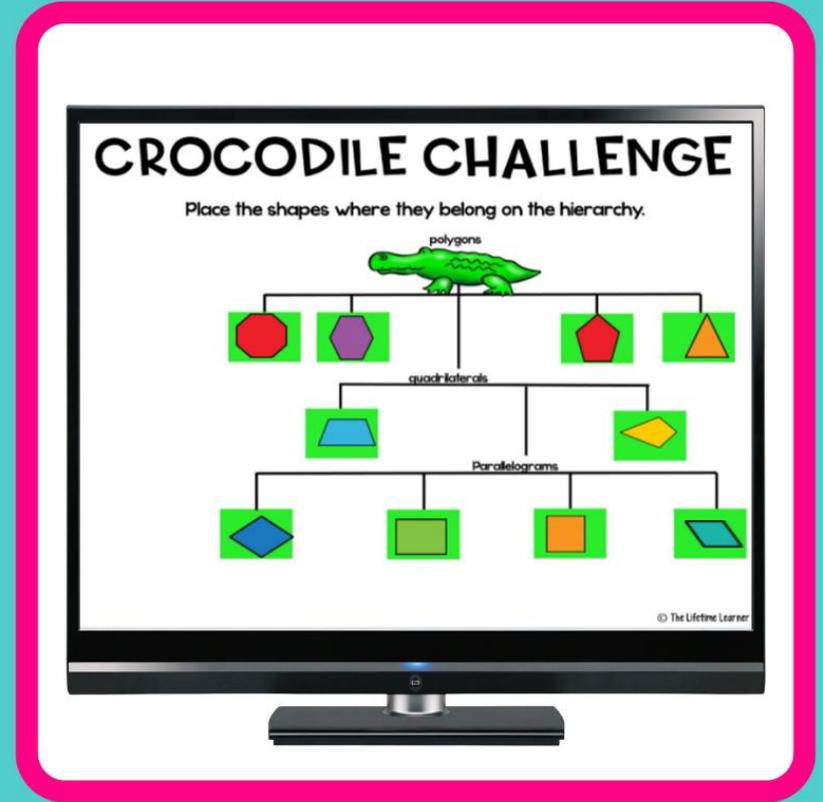

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

that works best for you!**

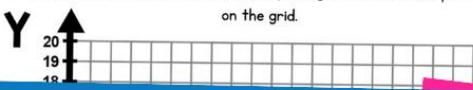

Every activity relates to real-life mathematics!

ELEPHANT CHALLENGE

A mother elephant needs your help deciding where each of her babies should live. Cut out each baby at the bottom and glue it in the cage.

GIRAFFE CHALLENGE

The giraffe is slowly traveling towards the watering hole. Every day, the giraffe walks 4 miles closer to the water. Show the giraffe's progress by filling in the chart and plotting her progress on the grid.

TIGER + LEOPARD CHALLENGE

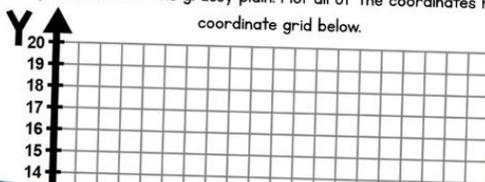

Leopards don't know how to do math. They need your help to choose the best answer that fits in each hierarchy.

WILD DOG CHALLENGE

Answer the questions about how large each wild dog is.

MONKEY CHALLENGE

The monkey went all over the grassy plain. Plot all of the coordinates he visited on the coordinate grid below.

ANTelope CHALLENGE

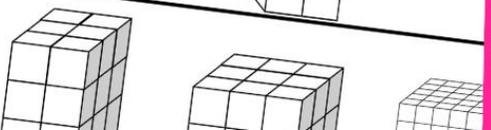

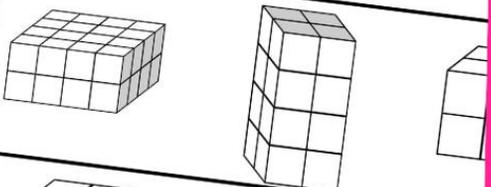

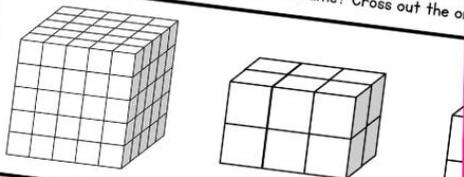

Put the answer in each question below.

1. An antelope that can provide meat. A lion has already eaten today. If the lion eats only drinks 3L of water. Did she drink less?

2. The antelope drinks 4,000 mL of water during the month of April. The next month, only drinks 3L of water. Did she drink less?

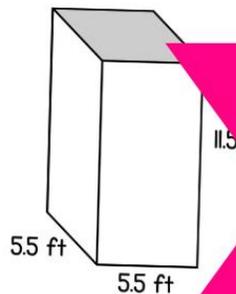

HIPPO + RHINO CHALLENGE

The hippo and rhino are arguing about which figure does not belong. Which two figures have the same volume? Cross out the one that does not.

LION CHALLENGE

Each lion has been trapped in a cage by hunters. Figure out the volume of each cage below that the lions are trapped inside of.

CROCODILE CHALLENGE

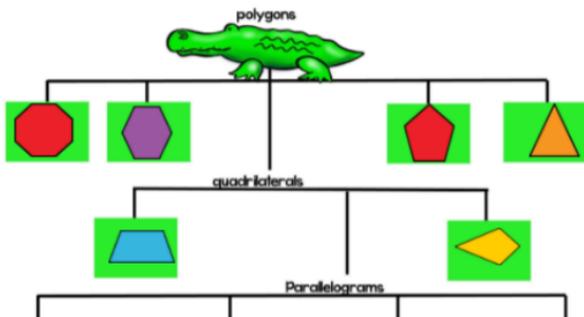

Put the shapes where they belong on the hierarchy.

focuses on:
reviewing measurement
& geometry concepts

CROCODILE CHALLENGE

Place the shapes where they belong on the hierarchy.

ANTELOPE CHALLENGE

Figure out the answer in each question below.

A lion takes down an antelope that can provide him with 256 ounces of meat. A lion has already eaten 16 pounds of meat today. If the lion eats the antelope he has just taken down, how many ounces has he eaten in total today?

$$16 \times 16 = 256 \text{ ounces}$$

$$256 + 256 = 512 \text{ ounces}$$

in all

The antelope drinks 4,000 mL of water during the month of April. The next month, only drinks 3L of water. Did she drink less water in April or May? Tell how much less in liters.

$$4000 \text{ mL} = 4 \text{ L}$$

(1 L less)

The antelope is able to run across a large field in 6 minutes. A second antelope is able to run across the field in 340 seconds. Tell how much faster the second antelope can run in seconds.

$$6 \times 60 = 360$$

First antelope
340 Second antelope
2nd antelope ran 20 seconds faster

An antelope travels 8,000 meters. A zebra traveled 80 km. Who traveled a shorter distance? Tell how much shorter in meters.

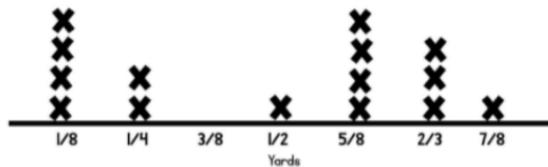

$$80 \text{ km} = 80,000 \text{ meters}$$

Zebra walked 72,000 less.

WILD DOG CHALLENGE

Answer the questions about how large each wild dog is below (in yards).

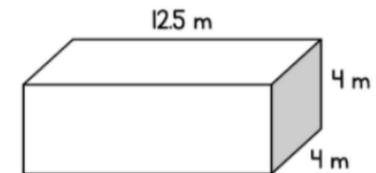

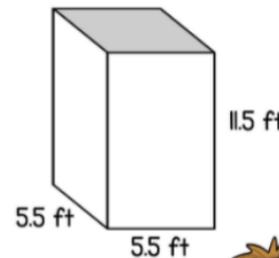

- If you added up the total amount of wild dogs in the 5/8 category, how many yards long would those dogs be? $2 \frac{1}{2}$ yards
- The length of wild dogs in the 1/4 yard section is equal to the length of dogs in the $\frac{1}{2}$ section.
- How much larger are dogs in the 5/8 section combined than the total length of the dogs

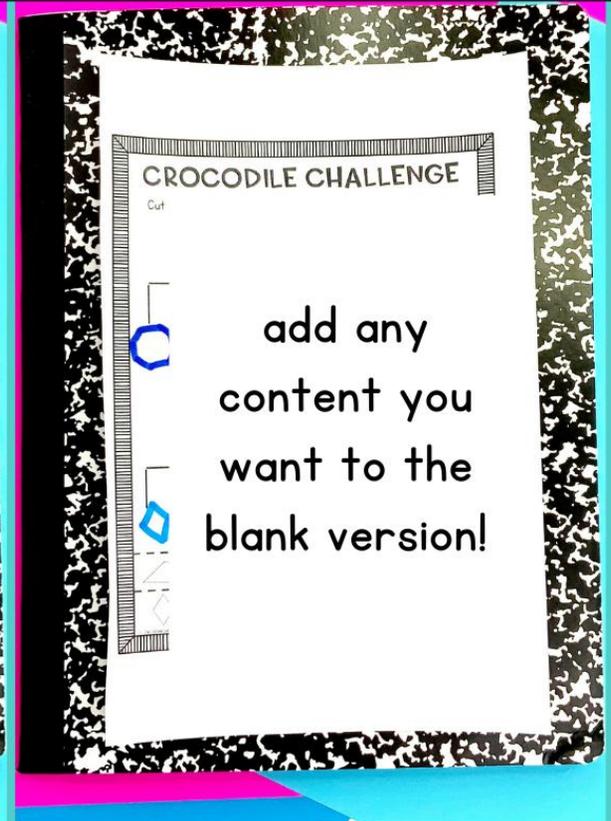

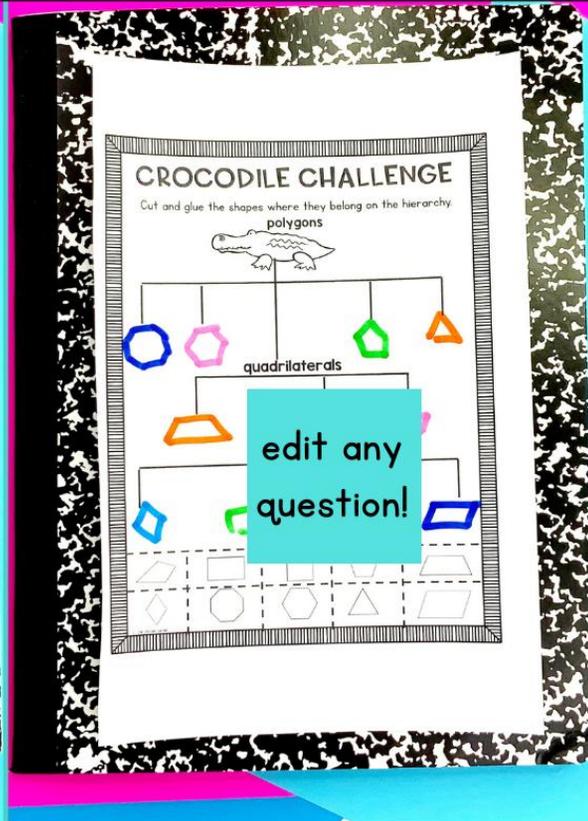

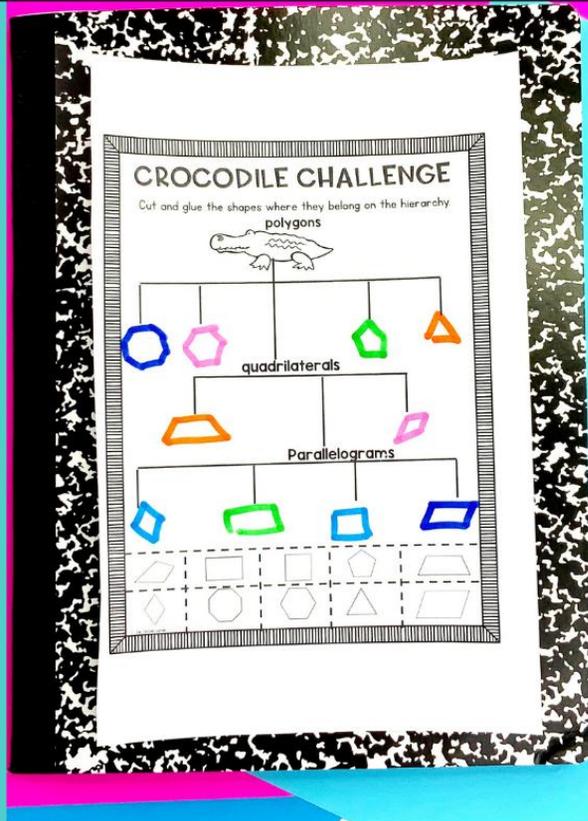

LION CHALLENGE

Each lion has been trapped in a cage by hunters. Figure out the volume of each cage below that the lions are trapped inside of.
