

WHAT IS THIS?

It's a low-prep room transformation!

Use the 10 math challenges, included decor, and more for a fun & easy room transformation!

Simply print the academic challenges, put up a few included decor items, and you're ready for a great day!

Room transformations can be stress-free and low-prep.

Keep scrolling to learn how!

Let's start with the basics...

What is a classroom transformation?

A classroom transformation changes your room into a certain setting or theme to engage students in their own learning with rigorous content.

Donut Shop Day

Rock Star Day

Camping Day

You don't have to spend hours of your time setting up a room transformation or spend lots of money to make it **SO MUCH FUN!**

STEP 1:

Tell your class they are vets today!

They will practice dividing large numbers in activities set up around the room. You can do this for a day, a few days, or over the course of a week!

Flexibility is key.

Need to modify? No problem!
Choose how many centers students will need to complete and what time frame they have to meet YOUR needs.

Set-up is quick and easy.

Simply print the posters, 10 activities, and a recording sheet for each student. Place them around your room and you're ready to begin!

STEP 2:

Let students move around the room and complete each center. They can be completed in any order. All centers include practicing dividing large numbers.

Optional Recording Sheet

When a student finishes a center, you sign that spot on their recording sheet to keep track of what they've completed.

Freedom to choose.

Students can work in partners, rotations, groups, or independently. Your choice!

PET HOSPITAL
Put a check next to each animal once you've completed the challenge.

Cat <input type="checkbox"/>	Bird <input type="checkbox"/>
Dog <input type="checkbox"/>	Mouse <input type="checkbox"/>
Puppy <input type="checkbox"/>	Snake <input type="checkbox"/>
Rabbit <input type="checkbox"/>	Hamster <input checked="" type="checkbox"/>
Fish <input type="checkbox"/>	Turtle <input type="checkbox"/>

HAMSTER
Your pet hospital has a lot of hamsters that love to play. In fact, you have 4,079 hamster toys. However, you only have 52 hamsters and you want to give them each the same amount of toys.

If each hamster at your hospital receives an equal share of the toys, how many do they each get?
$$\begin{array}{r} 78 \\ 52 \overline{)4079} \\ \underline{364} \\ 439 \\ \underline{416} \\ 23 \end{array}$$

How many toys will be left over?
23

STEP 3:

When students finish all activities you've assigned, they win! You can give them the included certificate, coloring page, or a small prize of your choice.

A shopping guide is also included to give you suggestions of optional "extras" you could add in.

Remember:

Anything different from a "normal" day in the classroom is special to students! A reward at the end isn't required during a classroom transformation.

Prize

STEP 4:

Most of the time, there are early finishers. These kiddos get to go around the room and read fun facts about the topic! No one is ever bored.

Choose from 3 versions!

THE CONTENT:

10 themed math challenges
aligned to math standards

RABBIT

You join a bunch of vets for a rabbit health day. Lots of rabbit owners bring their rabbits in to get their shots. If 4251 rabbits are split equally between 63 vets, how many rabbits will each vet see?

How many rabbits will be left over and need to be seen by you, the vet who agrees to see a few more rabbits?

CAT

2,646 cats have come in this week to get their vaccinations. The cats are split into 27 equal groups to make the vaccine process much quicker.

How many cats are in each group?

BIRD

At your pet hospital, you currently have 3,655 rescued birds. You allow up to 44 birds to be adopted a week. Lately, a lot of birds have been adopted and the maximum amount of birds are adopted every week. If this continues, how many weeks will it take for all of your birds to be adopted?

HOW TO USE THIS:

Ideas for Implementation:

- pick and choose the centers you want to use: do what works best for your class!
- you can have students work individually, in partners, or small groups--any way works!
- give students 1-2 hours to complete all 10 activities
- give less than 10 challenges to students if you are short on time
- OR spread the room transformation out over a couple of days

Every activity relates to real-life mathematics!

RABBIT

You join a bunch of vets for a rabbit health day. Lots of owners bring their rabbits in to get their shots. If the rabbits are split equally between 63 vets, how many rabbits are there?

DOG

Lots of dogs come into the Pet Hospital needing x-rays to see if they have any broken bones.

PUPPY

The most popular animal brought into your pet hospital today! You have 10 crates in the back while you check on other animals. There are 100 puppies in total. How many puppies are in each crate?

MOUSE

The mice at the vet squeak a lot each day. They squeak 100 times this month and about the same amount of times next month. About how many times do they squeak every day?

BIRD

At your pet hospital, you currently have 3,655 rescued birds. You allow up to 44 birds to be adopted a week. Lately, a lot of birds have been adopted and the maximum amount of birds are adopted every week. If this continues, how many weeks will it take for all of your birds to be adopted?

FISH

Eighty-five fish are seen at your pet hospital every day. You check on 8 fish a day, how many days will it take to check on all of the fish?

TURTLE

The pet store needs new cages for the 1,254 turtles for adoption. The cages can hold 3 turtles each. How many cages does she need for all of the turtles in cages using the least amount of cages she can, how many cages does she need for all of the turtles?

SNAKE

At your pet hospital, there are 508 boxes of snake food. You use one box per snake each day and need to feed 32 snakes each day. How many days can you feed your snakes in full before running out of food?

HAMSTER

Your pet hospital has a lot of hamsters that love to play. In fact, there are 100 hamster toys. However, you only have 52 hamsters. How many toys do you want to give them each the same amount of toys?

Each hamster at your hospital receives an equal share of the toys. How many toys do they each get?

**focuses on:
dividing large numbers**

The pet store needs new cages for the 1,254 turtles brought in for adoption. The cages can hold 3 turtles each. If the vet wants to put all of the turtles in cages using the least amount of cages she can, how many cages does she need for all of the turtles?

$$1254/3=418$$

The mice at the vet squeak a lot each day. They squeak 1,953 times this month and about the same amount each day. There are 31 days this month. About how many times a day do the mice squeak?

63

At your pet hospital, there are 508 boxes of snake food. You use one box per snake each day and need to feed 32 snakes each day. How many days can you feed your snakes in full before running out of food?

15

How much food will you have left on the last day?

28 boxes

Your pet hospital has a lot of hamsters that love to play. In fact, you have 4,079 hamster toys. However, you only have 52 hamsters and you want to give them each the same amount of toys.

If each hamster at your hospital receives an equal share of the toys, how many do they each get?

78

How many toys will be left over?
