

FIND AREA OF RECTANGLES

MINI LESSON

Let's Learn: Find Area

Way 1: Count the Squares

Way 2: Multiply Length x Width

Way 3: Tile to Find Area

What Is It?

The inside of the shape.

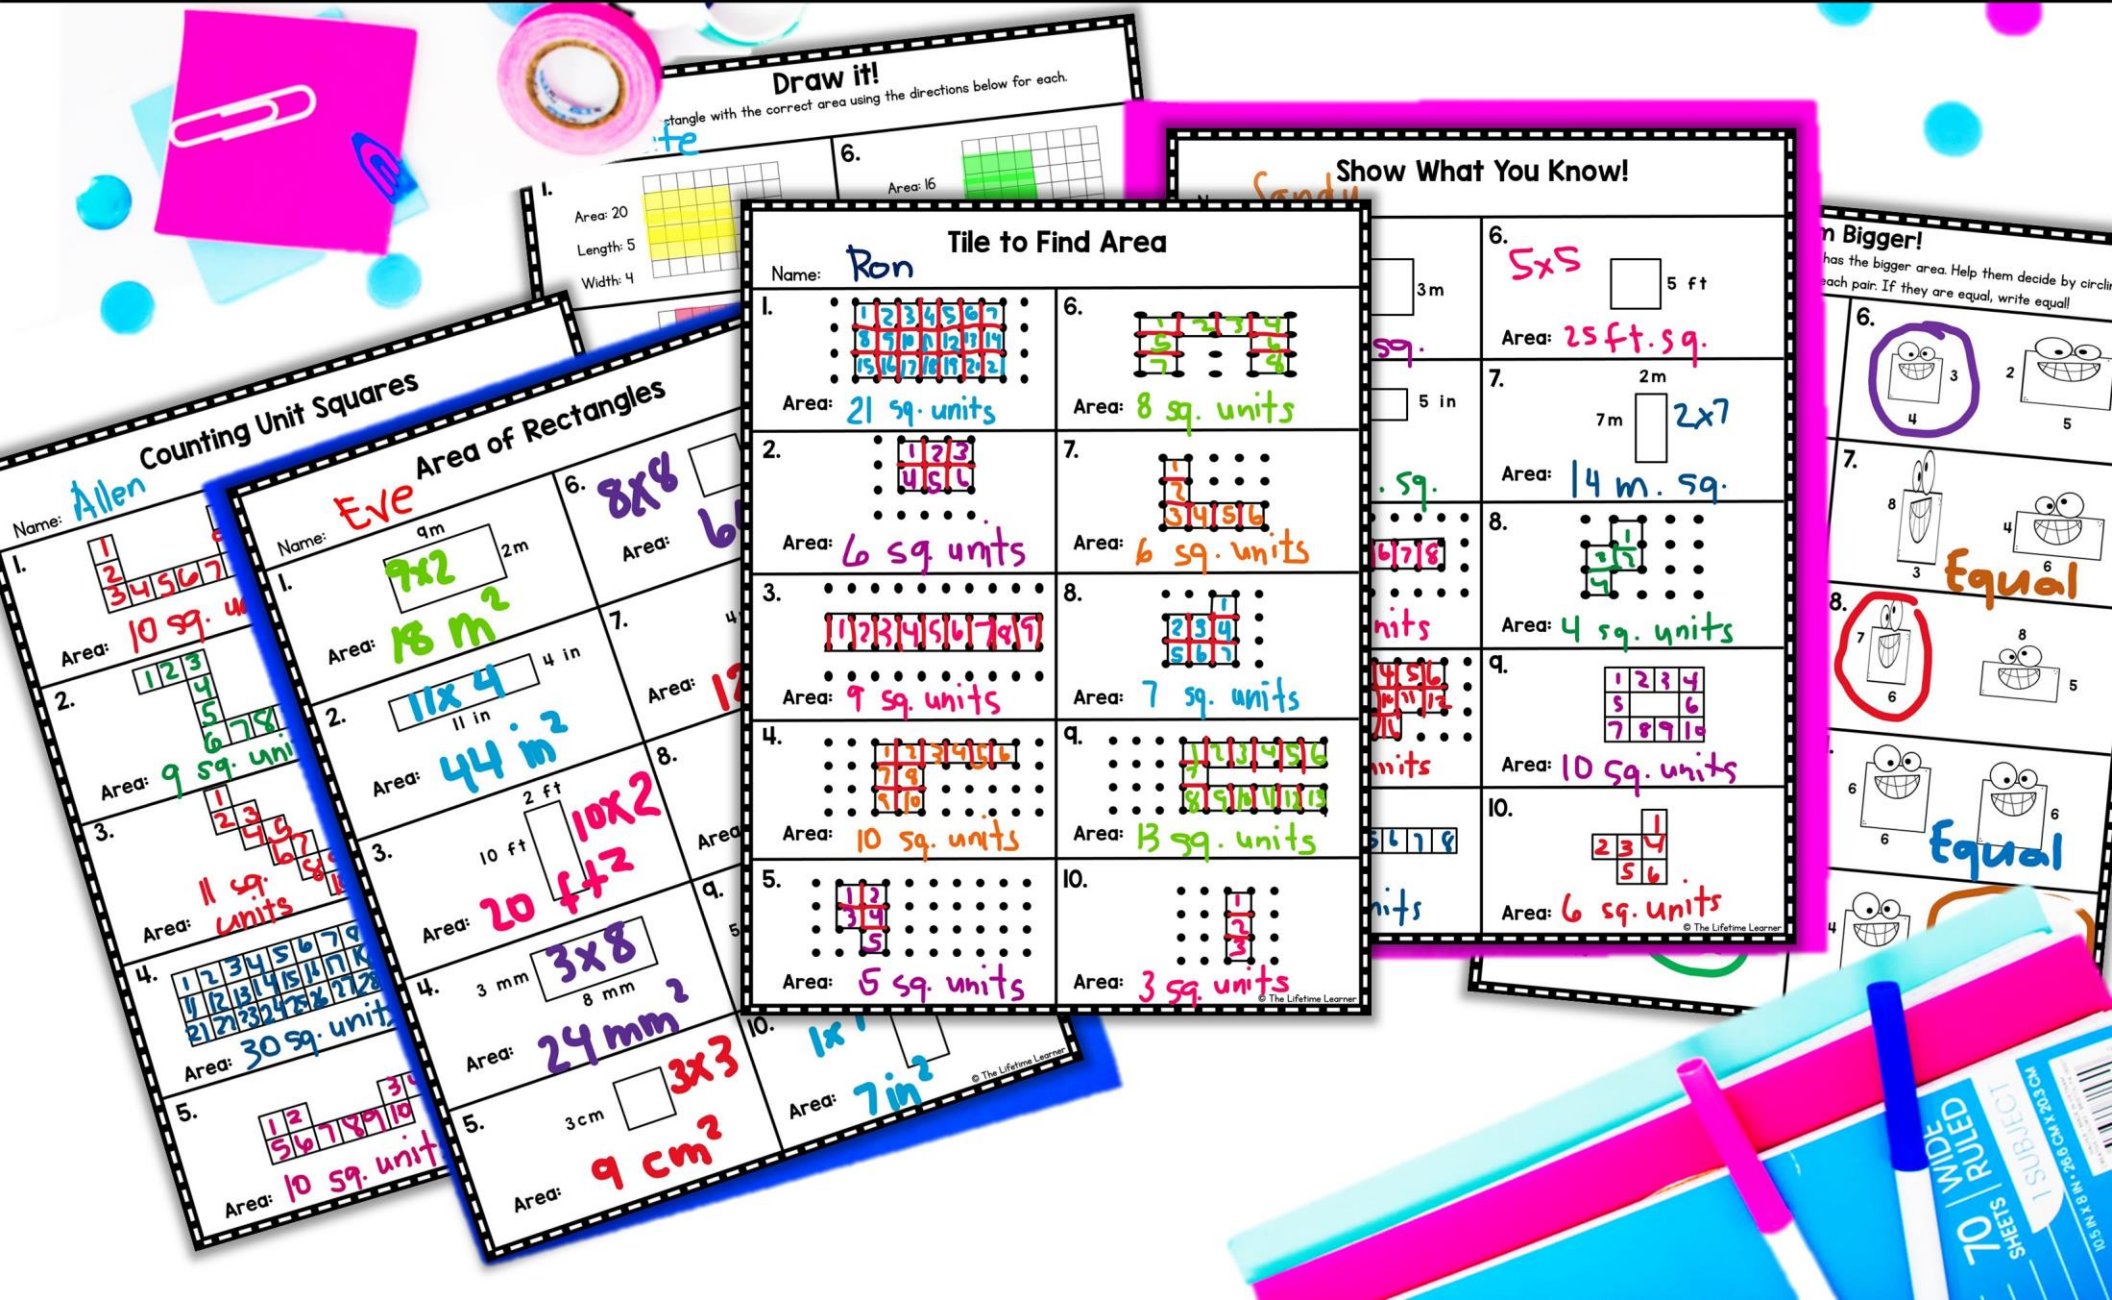

Length x Width

How to Solve:

Multiply length x width.

10 WORKSHEETS

EXPLORE AREA ACTIVITY

Provide students with manipulatives to create each of the areas on the paper. Perfect for hands-on learning.

Area Construction

1. Use your building bricks to create a rectangular structure with an area of 10.
2. Use your building bricks to create a rectangular structure with an area of 4.
3. Use your building bricks to create a structure with an area of 20.
4. Use your building bricks to create a structure with an area of 16.
5. Use your building bricks to create a structure with an area of 30.
6. Use your building bricks to create a structure with an area of 14.
7. Use your building bricks to create a structure with an area of 63.
8. Use your building bricks to create a structure with an area of 28.
9. Use your building bricks to create a structure with an area of 24.
10. Use your building bricks to create a structure with an area of 36.
11. Use your building bricks to create a structure with an area of 8.
12. Use your building bricks to create a structure with an area of 21.
13. Use your building bricks to create a structure with an area of 12.
14. Use your building bricks to create a structure with an area of 72.
15. Use your building bricks to create a structure with an area of 40.

ERROR ANALYSIS

Students decide if each kid solved the problem correctly or incorrectly. They explain their thinking at the bottom.

4 PAGES

Directions: Read the problem below and look at the work the student did. Decide if the work is correct or not.

Find the area of the rectangle below.

4 cm

9 cm

The student says:
The area is 26 square cm.

Explain if they are right or wrong. Put a check or X on their work.

This student accidentally found the perimeter instead of the area. Area means length times width. The correct equation is $3 \times 9 = 36$ square cm.

AREA CRAFT

Students create a drawing and find the area of each part of their drawing by counting the square units.

Students find the area of each rectangle.
They put a smile or frown on each card based on the answer.

Card #26
? 5
7 AREA: 35

Card #27
9 7 AREA: 63

Card #28
12 3 AREA: 36

Card #29
6 2 AREA: 12

Card #30
12 6 AREA: 72

Card #31
1 6 AREA: 6

Card #32
12 3 AREA: 36

Card #33
8 4 AREA: 32

Card #34
10 5 AREA: 50

Card #35
15 4 AREA: 60

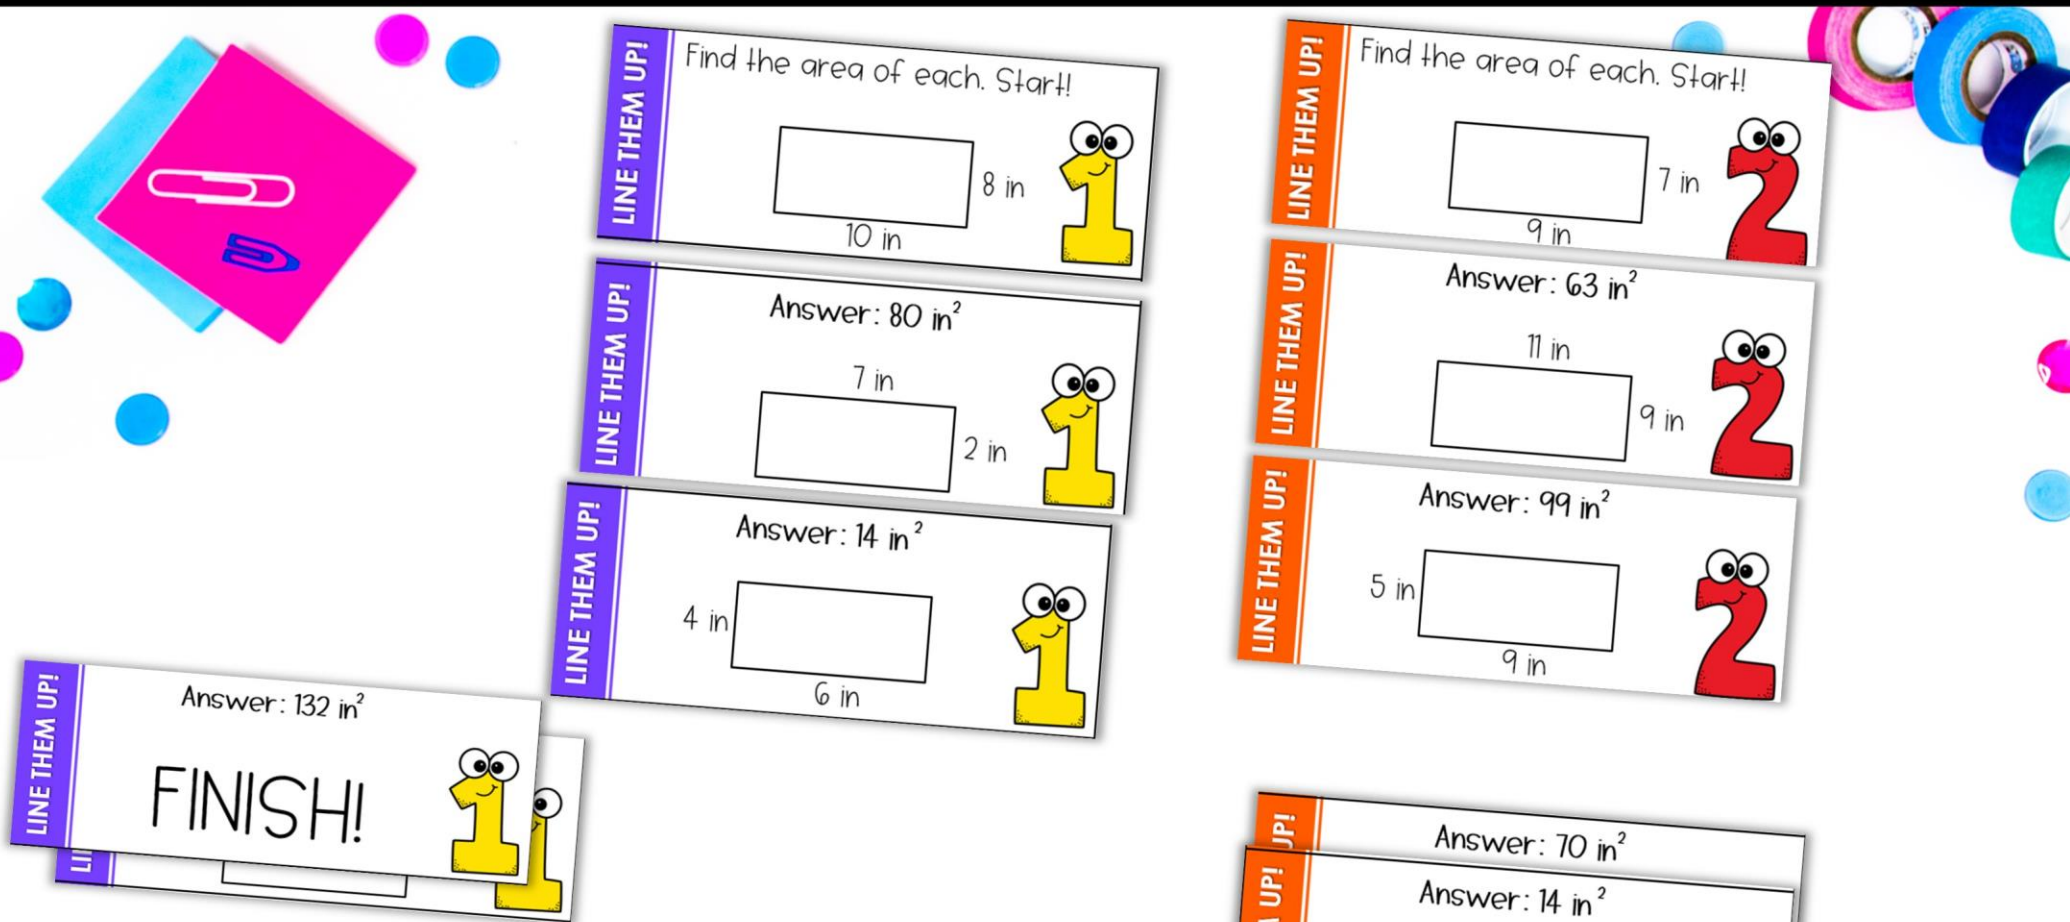

Card #36
12 6 AREA: 72

Card #37
10 8 AREA: 80

Card #38
15 6 AREA: 90

Card #39
12 9 AREA: 108

GAME #1

HOW TO PLAY:

- Students pair up in teams.
- Students race to line up their cards in order before the other team.

GAME #2

FOR 2-4 PLAYERS

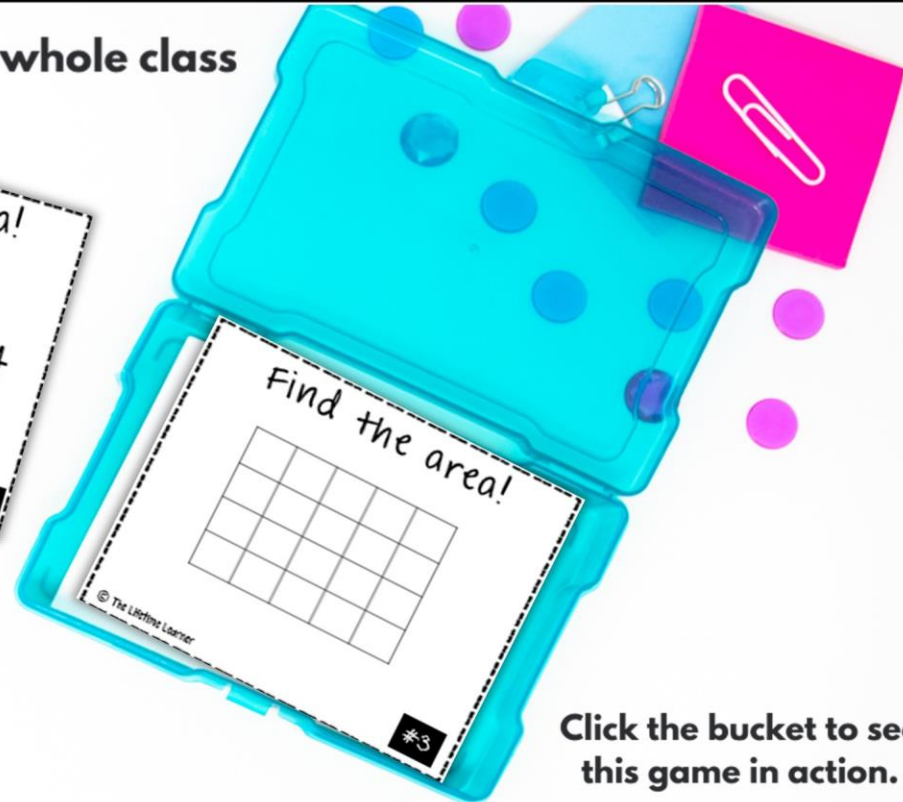

HOW TO PLAY:

1. All players receive a game mat.
2. Students answer a question card.
3. If they are correct, they earn an item.
4. The first person to earn 10 items wins.
5. Chance cards included to spice up gameplay.

GAME #3

the perfect game to play with the whole class

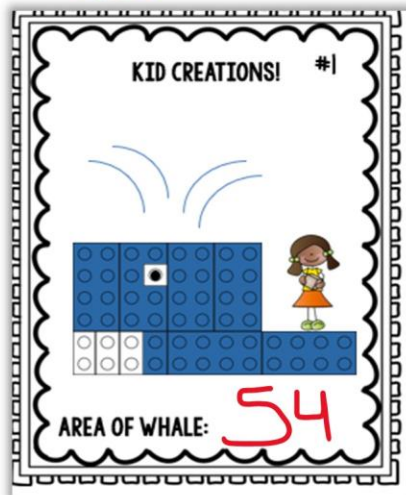

Click the bucket to see this game in action.

HOW TO PLAY:

1. Students answer task cards.
2. If they get it right, they drop it in the bucket.
3. Students play for a set amount of time.
4. At the end of gameplay, the teacher draws task cards out of the bucket.
5. Any student whose task card gets pulled out gets a small prize.

GAME #4

Find the area of the card you drew. Have your partner check the answer key. If you're correct, you get to add your answer in points to the scoreboard. Whoever has the most points at the end of the game wins.

21 POSTERS

Froggy

Put these posters up on the walls for students to reference during your unit.

3RD GRADE MATH BUNDLE

Name: Lindsay The Beach

Write the number of the matching word problem on each bucket to show which sandcastle goes with each word problem.

Sandcastle	Letter	Number
A	#6	
B	#5	
C	#2	
D	#4	
E	#1	
F	#3	

- There are 2 sharks. Each one has 5 teeth. How many teeth do the sharks have combined? $2 \times 5 = 10$
- There are 54 fish in the water. They are split between 6 small pools equally. How many fish are in each pool of water? $54 \div 6 = 9$
- There are 36 umbrellas for sale on the beach. 6 umbrellas are sold each hour. How many hours did it take to sell all of the umbrellas? $36 \div 6 = 6$
- There are 3 fences facing the beach. There are four seagulls sitting on each one. How many seagulls are there total? $3 \times 4 = 12$
- There are 12 surfers out in the water. They are chatting in groups of 4. How many groups are chatting? $12 \div 4 = 3$
- There are 50 seals out in the ocean. They are sitting in groups of 10. How many groups of seals are there? $50 \div 10 = 5$

My Castle

To win, you must have 10 items in your castle.
