

MULTIPLICATION

ARRAYS

MINI LESSON

Multiplication with Arrays	
	 $2 \times 3 = 6$
	 $4 \times 6 = 24$
Definition: An arrangement of objects, pictures, or numbers in columns and rows is called an array.	Your classroom has 2 rows of desks. Each row contains 6 desks. How many desks are in the entire classroom?  $2 \times 6 = 12$

CUT & PASTE ACTIVITIES

Students match up each family with the house they belong in.

The Array

There are the same number of floors as there are rooms on each floor where Charlotte and her dad live.

Bella and her baby live on the top floor (3rd floor) of the building. They are the fifth and last door on the hall.

Aliyah lives in a building with 6 floors and 4 apartments on each floor.

Maria owns a beautiful two-story home. There are 7 rooms on each floor.

Neighborhood!

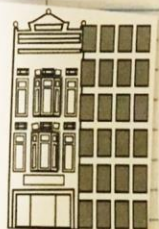

Carlos invites people over all the time since there are 42 rooms in his house!

Jake 5 floors in his house. Each floor has 10 bedrooms!

Donna and her daughter rent a one story house. BUT it does have six rooms!

Ling has to walk up 3 sets of stairs to get to her bedroom. She has to walk past 8 doors before she reaches her room each evening!

ERROR ANALYSIS

Students decide if each kid solved the problem correctly or incorrectly. They explain their thinking at the bottom.

4 PAGES

Directions: Read the problem below and look at the work the student did. Decide if the work is correct or not.

Solve 1×9 .

The student says:
I drew a 1 by 9 array. When you count all of the squares, it equals 10. The answer is 10.

Explain if they are right or wrong. Put a check or X on their work.

This student accidentally drew a 1×10 array instead of a 1×9 . The correct array would be 9 squares in a row, which means the answer is 9.

Students put together 9 different puzzles using their array skills.

GAME #1

Students match up each mom animal with the correct baby animal.

GAME #2

FOR 2-4 PLAYERS

HOW TO PLAY:

1. All players receive a game mat.
2. Students answer a question card.
3. If they are correct, they earn an item.
4. The first person to earn 10 items wins.
5. Chance cards included to spice up gameplay.

Write a multiplication equation and solve.

#3 $\square * \square = \square$

GAME #3

the perfect game to play with the whole class

Click the bucket to see this game in action.

HOW TO PLAY:

1. Students answer task cards.
2. If they get it right, they drop it in the bucket.
3. Students play for a set amount of time.
4. At the end of gameplay, the teacher draws task cards out of the bucket.
5. Any student whose task card gets pulled out gets a small prize.

GAME #4

Mix up all cards and scatter them around the room. Let students race to find as many matches as they can in a 5 minute period.

BUY THE BUNDLE AND SAVE BIG!

3RD GRADE MATH BUNDLE

Name: Lindsay The Beach

Write the number of the matching word problem on each bucket to show which sandcastle goes with each word problem.

Sandcastle	Letter	Number
1	A	6
2	B	5
3	C	2
4	D	4
5	E	1
6	F	3

- There are 2 sharks. Each one has 5 teeth. How many teeth do the sharks have combined? $2 \times 5 = 10$
- There are 54 fish in the water. They are split between 6 small pools equally. How many fish are in each pool of water? $54 \div 6 = 9$
- There are 36 umbrellas for sale on the beach. 6 umbrellas are sold each hour. How many hours did it take to sell all of the umbrellas? $36 \div 6 = 6$
- There are 3 fences facing the beach. There are four seagulls sitting on each one. How many seagulls are there total? $3 \times 4 = 12$
- There are 12 surfers out in the water. They are chatting in groups of 4. How many groups are chatting? $12 \div 4 = 3$
- There are 50 seals out in the ocean. They are sitting in groups of 10. How many groups of seals are there? $50 \div 10 = 5$

My Castle

To win, you must have 10 items in your castle.
